Pseudo-Complex General Relativity

 Springer

Contents

1	Mathematics of Pseudo-complex General Relativity	1
1.1	Definitions and Properties.	1
1.2	Calculus.	9
	References	14
2	Pseudo-complex General Relativity	15
2.1	The Attempt by A. Einstein	16
2.2	Caianiello's Observation.	17
2.3	Concerns Brought Forward by M. Born	22
2.4	Hermitian Gravity	23
2.5	The Approach in pc-GR.	26
2.6	Construction of Pseudo-complex General Relativity.	33
2.7	A Modification of the Variational Principle.	38
	References	53
3	Solutions for Central Masses: pc-Schwarzschild, pc-Kerr and pc-Reissner-Nordström.	55
3.1	Modified Variational Procedure in an 8-dimensional Space.	55
3.1.1	Isotropic and Anisotropic Fluids	57
3.2	The pc-Schwarzschild Solution	58
3.3	The pc-Kerr Solution	76
3.4	The pc-Reissner-Nordström Solution	85
	References	91
4	Pseudo-complex Robertson-Walker Metric.	93
4.1	Solving the Equations of Motion.	102
4.2	Some Consequences	113
4.3	An Oscillating Universe.	122
4.3.1	The Adiabatic Expansion and Contraction of the Universe.	127
	References	130

5	Observational Verifications of pc-GR	131
5.1	Motion of a Particle in a Circular Orbit: Orbital Frequency and Redshift	133
5.1.1	Radial Dependence of the Angular Frequency and Stable Orbits	133
5.1.2	Redshift for Schwarzschild- and Kerr-Type of Solutions	142
5.1.3	Effective Potentials and Circular Orbits	144
5.1.4	Galactic “Black-Holes” and Observational Verification by pc-GR	152
5.2	Raytracing Method and the Imaging of the Accretion Disk	153
5.2.1	Theoretical Background	154
5.2.2	Predictions	171
5.3	Conclusions	179
	References	180
6	Neutron Stars Within the Pseudo-complex General Relativity	183
6.1	Theoretical Background	185
6.1.1	Interior Region	185
6.1.2	Equation of State for Standard Matter	191
6.1.3	Equation of State for the Λ -term	192
6.1.4	Exterior Shell	193
6.1.5	Boundary Conditions	195
6.1.6	Energy Conditions	196
6.2	Numerical Framework, Results and Discussions	203
6.3	Resuming the Results Presented in This Chapter	213
	References	214
7	Pseudo-complex Differential Geometry	217
7.1	A Short Introduction to Differential Geometry	218
7.1.1	Topology	218
7.1.2	Differential Manifolds	219
7.1.3	Vectors and Tensors	220
7.1.4	Metric and Curvature	223
7.2	Pseudo-complex Differential Geometry	231
7.2.1	Pseudo-complex Manifolds as Product Manifolds	231
7.3	Pseudo-complex Tangent and Cotangent Spaces	232
7.3.1	Real Tangent and Cotangent Space of a Pseudo-complex Manifold	232
7.3.2	Pseudo-complexified Tangent and Cotangent Space	234
7.4	Metric	239
7.5	Connection and Curvature	240
7.6	Pseudo-complex General Relativity	242
	References	244
	Index	247
