Hamlet K. Avetissian

Relativistic Nonlinear Electrodynamics

The QED Vacuum and Matter in Super-Strong Radiation Fields

Second Edition

Springer

Contents

1 Interaction of a Charged Particle with Strong Plane Electromagnetic Wave in Vacuum 1

1.1 Classical Dynamics of a Particle in the Field of Strong Plane Electromagnetic Wave 1

1.2 Intensity Effect. Mass Renormalization 4

1.3 Radiation of a Particle in the Field of Strong Monochromatic Wave 10

1.4 Nonlinear Radiation Effects in Superstrong Wave Fields 14

1.5 Quantum Description. Volkov Solution of the Dirac Equation 19

1.6 Nonlinear Compton Effect 25

Bibliography 32

2 Interaction of Charged Particles with Strong Electromagnetic Wave in Dielectric Media. Induced Nonlinear Cherenkov Process 35

2.1 Particle Classical Motion in the Field of Strong Plane EM Wave in a Medium 36

2.2 Nonlinear Cherenkov Resonance and Critical Field. Threshold Phenomenon of Particle "Reflection" 37

2.3 Particle Capture by a Plane Electromagnetic Wave in a Medium 45

2.4 Laser Acceleration in Gaseous Media. Cherenkov Accelerator 48

2.5 Nonlinear Compton Scattering in a Medium 54

2.6 Radiation of a Particle in Capture Regime. Cherenkov Amplifier 57

Bibliography 67

3 Quantum Theory of Induced Multiphoton Cherenkov Process 69
3.1 Quantum Description of Induced Cherenkov Process in Strong Wave Field 69
3.2 Quantum Description of "Reflection" Phenomenon. Particle Beam Quantum Modulation at X-Ray Frequencies 75
3.3 Exact Solution of the Dirac Equation for Induced Cherenkov Process 79
3.4 Secular Perturbation at Nonlinear Cherenkov Resonance 83
3.5 Inelastic Diffraction Scattering on a Traveling Wave 90
3.6 Quantum Modulation of Charged Particles 93
Bibliography 96

4 Cyclotron Resonance at the Particle–Strong Wave Interaction 97
4.1 Autoresonance in the Uniform Magnetic Field in Vacuum 98
4.2 Exact Solution of the Dirac Equation for Cyclotron Resonance 102
4.3 Multiphoton Excitation of Landau Levels by Strong EM Wave 110
4.4 Cyclotron Resonance in a Medium. Nonlinear Threshold Phenomenon of "Electron Hysteresis" 115
4.5 High Harmonics Radiation at Cyclotron Resonance 123
Bibliography 127

5 Nonlinear Dynamics of Induced Compton and Undulator Processes 129
5.1 Interaction of Charged Particles with Superstrong Counterpropagating Waves of Different Frequencies 130
5.2 Interaction of Charged Particles with Superstrong Wave in a Wiggler 136
5.3 Inelastic Diffraction Scattering on a Moving Phase Lattice 140
5.4 Inelastic Diffraction Scattering on a Traveling Wave in an Undulator 144
5.5 Quantum Modulation of Particle Beam in Induced Compton Process 147
5.6 Quantum Modulation of Particle Beam in the Undulator 150
5.7 Nonlinear Acceleration of Ions by Counterpropagating Laser Pulses: Generation of Ion/Nuclei Bunches from Nanotargets 154
Bibliography 159

6 Induced Nonstationary Transition Process 161
6.1 Effect of Abrupt Temporal Variation of Dielectric Permittivity of a Medium 162
6.2 Classical Description of Induced Nonstationary Transition Process 164
6.3 Quantum Description of Multiphoton Interaction 169

6.4 Electron–Positron Pair Production by a γ-Quantum in a Medium 175
6.5 Annihilation of Electron–Positron Pairs in a Medium 181
6.6 Electron–Positron Pair Production by Strong EM Wave in Nonstationary Medium 186
Bibliography 191

7 Induced Channeling Process in a Crystal 193
7.1 Positron–Strong Wave Interaction at the Planar Channeling in a Crystal 193
7.2 Induced Interaction of Electrons with Strong EM Wave at the Axial Channeling 200
7.3 Quantum Description of the Induced Planar Channeling Effect 203
7.4 Quantum Description of the Induced Axial Channeling Effect 208
7.5 Multiphoton Induced Channeling Effect 213
Bibliography 220

8 Nonlinear Mechanisms of Free Electron Laser 221
8.1 Self-consistent Maxwell and Relativistic Quantum Kinetic Equations for Compton FEL with Strong Pump Laser Field 222
8.2 Nonlinear Quantum Regime of X-Ray Compton Backscattering Laser 229
8.3 Quantum Description of FEL Nonlinear Dynamics in a Wiggler 234
8.4 High-Gain Regime of FEL 238
8.5 Quantum SASE Regime of FEL 242
8.6 High-Gain FEL on the Coherent Bremsstrahlung in a Crystal 246
8.7 Nonlinear Scheme of X-Ray FEL on the Channeling Particle Beam in a Crystal 251
8.8 Compton FEL on the Channeling Particle Beam 258
8.9 Nonlinear Scheme of X-Ray Laser on the Ion and Pump Laser Beams 261
8.10 Crystal Potential as a Pump Field for Generation of Coherent X-Ray 264
Bibliography 270

9 Electron–Positron Pair Production in Superstrong Laser Fields 273
9.1 Vacuum in Superstrong Electromagnetic Fields. Klein Paradox 274
9.2 Electron–Positron Pair Production by Superstrong Laser Field and γ-Quantum 280

9.3 Pair Production via Superstrong Laser Beam Scattering on a Nucleus 286
9.4 Nonlinear e^-, e^+ Pair Production in Plasma by Strong EM Wave 291
9.5 Pair Production by Superstrong EM Waves in Vacuum. 300
Bibliography 306

10 Relativistic Quantum Theory of Scattering on Arbitrary Electrostatic Potential and Stimulated Bremsstrahlung 309
10.1 Relativistic Wave Function of Spinor Particle Elastic Scattering on Arbitrary Electrostatic Potential in Generalized Eikonal Approximation 310
10.2 Spinor Particle Scattering in the Coulomb Field by Generalized Eikonal Approximation 315
10.3 Elastic Scattering Cross Section in Generalized Eikonal Approximation 319
10.4 Bremsstrahlung in Superstrong Radiation Fields: Born Approximation 321
10.5 Generalized Eikonal Approximation for Stimulated Bremsstrahlung 331
10.6 Discussion of the GEA Wave Function in Various Limits 341
Bibliography 347

11 Interaction of Strong Laser Radiation with Highly Charged Atoms-Ions 349
11.1 Highly Charged Hydrogen-Like Atoms-Ions in the Strong High-Frequency Laser Field. 350
11.2 Above-Threshold Ionization of Atoms-Ions By Superstrong Laser Fields. 359
11.3 The Relativistic Born Approximation by the Potential of Atomic Remainder in ATI. 365
11.4 Probability of ATI Process for Circular and Linear Polarizations of an EM Wave 368
11.5 Acceleration or Deceleration of the Atoms by Counterpropagating Laser Beams 376
Bibliography 386

12 Interaction of Superstrong Laser Radiation with Plasma 389
12.1 Electron Wavefunction in SB Process with Exact Consideration of Scattering Coulomb Field 390
12.2 Radiation Absorption in Plasma via Inverse SB at the Exact Consideration of Scattering Field 394
12.3 Absorption at Anisotropic Electron Distribution 397
12.4 Absorption at Isotropic Electron Distribution 400
12.5 Nonlinear Inverse-Bremsstrahlung Absorption Coefficient 404

12.6 Asymptotic Formulas for Plasma Nonlinear Absorption at Arbitrary Large Intensities 409
12.7 Microscopic Quantum Theory of Absorption of Powerful X-Ray in Plasma 414
Bibliography 421

13 High Harmonic Generation and Coherent X-Ray–γ-Ray Radiation in Relativistic Atomic-Ionic Systems 423
13.1 Relativistic HHG in the Counterpropagating Waves Field 424
13.2 Relativistic High-Order Harmonic Emission 431
13.3 Relativistic HHG with Copropagating Ultrastrong Laser and Ion Beams in Plasma 433
13.4 HHG by Intense Coherent X-Ray on Highly-Charged Hydrogen-like Ions 440
13.5 Effective Hamiltonian for Collective Two-Photon Decay of Positronium Atoms 446
13.6 Spontaneous Two-Photon Decay of a Para-Positronium 449
13.7 Gamma-Ray Laser Based on the Collective Decay of Positronium Atoms in Bose–Einstein Condensate 452
13.8 The Influence of the Confinement and Interaction Between the Positronium Atoms on the γ-Ray Generation Process 458
Bibliography 460

14 "Relativistic" Nonlinear Electromagnetic Processes in Graphene 463
14.1 Effective "Relativistic" Hamiltonian for Graphene Quasiparticles 464
14.2 Microscopic Theory of Strong Laser Fields Interaction with Graphene 468
14.3 Multiphoton Resonant Excitation and Rabi Oscillations in Graphene 473
14.4 Particle-Hole Multiphoton Excitation and High Harmonics Generation in Graphene 478
14.5 Graphene Interaction with Strong Laser Radiation Beyond the Dirac Cone Approximation 481
14.6 Coherent Effects and Control of Macroscopic Quantum States in Graphene 483
14.7 Resonant Excitations of Fermi-Dirac Sea in a Bilayer Graphene 488
14.8 Generation of Harmonics in a Bilayer Graphene at the Particle-Hole Multiphoton Excitation 495
Bibliography 498
