

Yilei Li

Probing the Response of Two-Dimensional Crystals by Optical Spectroscopy

Doctoral Thesis accepted

by Columbia University, New York, NY, USA

Springer

Contents

1 Introduction and Background	1
1.1 Introduction.....	1
1.2 Overview of Optical Spectroscopy Methods	2
1.3 Optics of Graphene	3
1.4 Optics of Monolayer Transition Metal Dichalcogenides	4
References.....	6
2 Intrinsic Doping Dependence of Raman 2D Mode in Graphene: Signatures of Electron–Electron Interaction.....	9
2.1 Introduction.....	9
2.2 Experimental Details for Raman Measurement of Ultraclean Graphene on h-BN	10
2.3 Intrinsic Doping Dependence of the Raman G Mode: Signatures of $e-p$ Interactions.....	11
2.4 Intrinsic Doping Dependence of the Raman 2D Mode: Signatures of $e-e$ Interactions.....	12
2.5 Conclusion	15
References.....	16
3 Coupling of Strongly Localized Graphene Plasmons to Molecular Vibrations.....	19
3.1 Introduction.....	19
3.2 Sample Preparation and Experiment Setup for Mid-IR Transmission Spectroscopy.....	20
3.3 Determination of the Out-of-Plane Confinement of Graphene Plasmon	21
3.4 Hybridized Plasmon–Phonon Mode and Enhanced IR Sensing	22
3.5 Finite Difference Time Domain Simulation and a Phenomenological Model.....	23
3.6 Conclusion	26
References.....	27

4 Dielectric Response of a Thin Sheet	29
4.1 Introduction to the Dielectric Response of a Material	29
4.2 Linear Dielectric Response	29
4.3 Nonlinear Dielectric Response	30
4.4 Models for the Dielectric Response of a Thin Film.....	30
References.....	32
5 Measurement of the Optical Dielectric Function of Monolayer Transition Metal Dichalcogenides: MoS₂, MoSe₂, WS₂, and WSe₂	33
5.1 Introduction.....	33
5.2 Sample Preparation for Reflectance Measurement.....	34
5.3 Measurement of Reflectance of the Monolayer TMDCs.....	34
5.4 Determination of the Dielectric Function from Reflectance Spectrum Using Kramers–Kronig Constrained Analysis	36
5.5 Surface Conductivity and Absorbance.....	37
5.6 Extraction of the A and B Peaks Splitting.....	37
5.7 Comparison of the Monolayer and Bulk Dielectric Function.....	39
5.8 Conclusion	41
References.....	41
6 Measurement of the Second-Order Nonlinear Susceptibility and Probing Symmetry Properties of Few-Layer MoS₂ and h-BN by Optical Second-Harmonic Generation	45
6.1 Introduction.....	45
6.2 Experimental Setup for Optical SHG Measurement.....	47
6.3 Probing the Absence of Inversion Symmetry and the Crystal Rotational Symmetry by Polarization Resolved SHG	48
6.4 Measurement of the Second-Order Nonlinear Susceptibility	49
6.5 Probing Inversion Symmetry Breaking by SHG Intensity	50
6.6 SHG as an Optical Tool for the Characterization of Atomically Thin Layers	52
6.7 Conclusion	52
References.....	53
7 Valley Splitting and Polarization by Zeeman Effect in Monolayer MoSe₂	55
7.1 Introduction.....	55
7.2 Experimental Setup for Valley Selective Magneto-PL Spectroscopy	56
7.3 Demonstration of Valleys Splitting and Polarization.....	56
7.4 Determination of the Trion Configuration	59
7.5 Zeeman Effect in the High Doping Regime.....	60
7.6 Conclusion	62
References.....	63
8 Conclusion and Prospect	65
Curriculum Vitae	67
