Contents

The Role of Computational Intelligence in Quantitative Software Engineering .................................. 1
Witold Pedrycz, Alberto Sillitti and Giancarlo Succi

Computational Intelligence: An Introduction ................................................................. 13
Witold Pedrycz, Alberto Sillitti and Giancarlo Succi

Towards Benchmarking Feature Subset Selection Methods for Software Fault Prediction .................... 33
Wasif Afzal and Richard Torkar

Evolutionary Computation for Software Product Line Testing: An Overview and Open Challenges ............ 59
Roberto E. Lopez-Herrejon, Javier Ferrer, Francisco Chicano, Alexander Egyed and Enrique Alba

Metaheuristic Optimisation and Mutation-Driven Test Data Generation ......................................... 89
Matthew Patrick

Measuring the Utility of Functional-Based Software Using Centroid-Adjusted Class Labelling .................. 117
Nick J. Pizzi

Toward Accurate Software Effort Prediction Using Multiple Classifier Systems .................................. 135
Bhekisipho Twala and June Verner

Complex Fuzzy Logic Reasoning-Based Methodologies for Quantitative Software Requirements Specifications .................................................. 153
Dan E. Tamir, Carl J. Mueller and Abraham Kandel

Possibilistic Assessment of Process-Related Disclosure Risks on the Cloud ....................................... 173
Valerio Bellandi, Stelvio Cimato, Ernesto Damiani and Gabriele Gianini
