Covered Karsts

 Springer

Contents

1	General Description of Karst	1
1.1	Introduction	1
1.2	Karst Hydrology	1
1.3	Karst Features	2
1.3.1	Surface Karst Features	2
1.3.2	Caves.....	9
1.4	Karst Types	10
	References	18
2	Study Areas	23
2.1	Introduction	23
2.2	Areas of Detailed Field Research	29
2.2.1	Aggtelek Karst.....	29
2.2.2	The Asiago Plateau	31
2.2.3	The Bakony Mountains	31
2.2.4	The Bükk Mountains	34
2.2.5	Durmitor	35
2.2.6	Northern Limestone Alps	38
2.2.7	The Julian Alps	43
2.2.8	Madagascar.....	43
2.2.9	The Mecsek Mountains	45
2.2.10	Padis.....	47
2.3	Observation Areas.....	49
2.3.1	Atacama Desert	49
2.3.2	The Biokovo Mountains	50
2.3.3	The Cerknjško polje.....	50
2.3.4	The Dolomiti	51
2.3.5	Iceland	51
2.3.6	Middle Lena.....	53

2.3.7	Crimean Peninsula.....	54
2.3.8	The Lunan Region (South Chinese Mountains)	55
2.3.9	The Salt Hill of Parajd	56
	References.....	57
3	Methods.....	65
3.1	Morphometry	65
3.1.1	The Parameter Space	66
3.1.2	Depth–Width Function	68
3.1.3	Distribution of Dolines by Elevation Above Sea Level.....	68
3.1.4	Calculation of Karren Parameters.....	69
3.2	Investigation of the Structure of the Bearing Rock (Bedrock)	71
3.3	Mapping.....	71
3.3.1	Topographic and Groundplan Maps	71
3.3.2	Morphological Maps	72
3.3.3	Denudation Maps.....	72
3.3.4	Aerial Photographs	73
3.3.5	Karst Morphological Cross-Sections.....	75
3.3.6	Oblique Views and Block Diagrams.....	76
3.4	Investigation of Cover Thickness, Composition and Structure	76
3.4.1	Establishing Cover Thickness, Composition and Bedrock Map by Spiral Drilling	76
3.4.2	Measuring Cover Thickness Using Metal Rod.....	76
3.4.3	Constructing Geoelectric–Geological Profiles	77
3.4.4	Analysis of the Composition of the Cover	78
3.5	Changes of Karst Features.....	79
3.5.1	Measurements of Mass Movements in Dolines.....	81
3.5.2	Measuring Size Changes of Dolines.....	81
3.6	Laboratory Model Experiments.....	84
3.6.1	Modelling the Formation of Subsidence Dolines on Cover with Ground Ice.....	84
3.6.2	Modelling Grike Evolution.....	84
3.6.3	Modelling the Development of Subsidence Dolines in Cover Deposit Without Ground Ice.....	85
3.6.4	Influence of Particle Size on Water Lifting and Water Overlifting	86
3.6.5	Sedimentation in the Flood Lakes of Subsidence Dolines	87
	References.....	91
4	Classification of Covered Karsts.....	97
4.1	Introduction	98
4.2	Crypto and Concealed Karsts	101
4.3	Age of the Covered Karst	110

4.4	Classification of Covered Karst According to Their Rocks.....	112
4.4.1	Bedrock Material	112
4.4.2	The Cover Material.....	114
4.5	Covered Karst of Landforms	118
4.6	Patterns of the Cover Sediment of Covered Karst.....	130
4.6.1	General Description.....	130
4.6.2	Cover Pattern of Climatic Covered Karst	138
4.6.3	Structural Covered Karsts.....	197
4.7	Conclusion	197
	References.....	199
5	Covered Karst Landforms	207
5.1	Introduction	207
5.2	Subsoil Karren	209
5.2.1	General Description.....	209
5.2.2	Subsoil Karren on Carbonate Rocks.....	212
5.2.3	Evaporite Karren.....	223
5.2.4	Subsidence Pseudokarren	225
5.3	Caprock Dolines	228
5.4	Subsidence Dolines	236
5.4.1	General Description.....	236
5.4.2	Morphology of Subsidence Dolines	238
5.4.3	Classification of Subsidence Depressions	258
5.5	Ponors	273
5.5.1	General Description.....	273
5.5.2	Classification of Ponors.....	277
5.6	Depressions of Superficial Deposit (DSD).....	285
5.6.1	Characteristics of the DSDs.....	286
5.6.2	Classification of DSDs	287
5.7	Karst Valleys.....	292
5.7.1	Allogenic Valley	292
5.7.2	Epigenetic Valley	292
5.7.3	Blind Valley	298
5.8	Remnant Caves	299
5.9	Conclusions	302
	References.....	305
6	Covered Karst Processes	313
6.1	Introduction	313
6.2	Activity	315
6.2.1	Conditions of Activity	315
6.2.2	The Characteristics of the Activity	320
6.2.3	Activity Phenomena	323
6.2.4	Types of Activity.....	331

6.3	Sedimentation in Flood Lakes	333
6.3.1	Sedimentation in the Laboratory	333
6.3.2	Sedimentation Under Natural Conditions	343
6.4	Development of Partial Features	356
6.4.1	Examples of the Intensity of Geomorphic Evolution of Covered Karst.....	356
6.4.2	Characteristics of Partial Feature Development	359
6.5	Change in Size.....	363
6.5.1	Pointlike Depth Change.....	364
6.5.2	Areal Distribution of Depth Change.....	369
6.5.3	Material Budget of Dolines	369
6.6	Conclusion.....	371
	References.....	373
7	Landform Evolution and Development.....	377
7.1	Karren Formation	377
7.1.1	General Characteristics of Karren Development.....	377
7.1.2	Formation of Vertical Karren.....	382
7.1.3	Formation of Linear Karren.....	383
7.1.4	Formation of Horizontal Karren.....	387
7.1.5	Formation of Karren with Circular Platform.....	388
7.1.6	Karren Formed Under Temporary Inundation.....	389
7.1.7	Formation of Rock Salt Karren	389
7.1.8	Pseudokarren Formation.....	389
7.2	Formation of Caprock Dolines	391
7.2.1	Formation of C ₁ Caprock Dolines	392
7.2.2	Formation of C ₂ Caprock Dolines	394
7.2.3	Formation of C ₃ Caprock Dolines	395
7.3	The Development Environment, Conditions of Formation and Origin of Subsidence Dolines.....	398
7.3.1	Modelling the Development of Subsidence Dolines	398
7.3.2	Conditions of Doline Formation.....	407
7.3.3	Formation of Subsidence Dolines.....	413
7.3.4	Origin of Subsidence Pseudokarst Depressions	464
7.4	Origin of Ponors	469
7.4.1	Main Characteristics of Ponor Formation	469
7.4.2	Ponor Formation on Various Covered Karsts	470
7.5	Origin of Depressions of Superficial Deposit (DSD).....	473
7.5.1	General Characteristics of DSD Formation.....	473
7.5.2	Origin and Evolution of DSDs	474
7.5.3	Material Budget and Transformation of the DSDs.....	479
7.6	Formation of Remnant Caves	481
7.7	Conclusions	483
	References.....	488

8 Evolution of Covered Karst Surfaces	495
8.1 Introduction	495
8.2 Surface Evolution on Tundra and Taiga Covered Karsts.....	498
8.3 Surface Evolution on Temperate Karst.....	499
8.3.1 Surface Evolution on Recent Allogenic Covered Karst.....	499
8.3.2 Surface Evolution on Renewed Allogenic Covered Karst....	505
8.3.3 Surface Evolution on Mantled Allogenic Covered Karst	505
8.3.4 Surface Evolution on Horst Covered Karst	507
8.4 Surface Evolution on Glaciokarst Covered Karst.....	508
8.4.1 Surface Evolution on Cirque Covered Karst	511
8.4.2 Surface Evolution on Glacial Valley Covered Karst.....	511
8.5 Surface Evolution on Tropical Covered Karst.....	512
8.5.1 Surface Evolution of Pinnacle Terrains	513
8.5.2 Surface Evolution of Autogenic Karst.....	513
8.5.3 Surface Evolution of Mixed Allogenic–Autogenic Karst.....	516
8.6 Surface Evolution on Platform Karst.....	516
8.7 Conclusions	516
References.....	517
Index	519
