

Fluorescence Studies of Polymer Containing Systems

Volume Editor:
Karel Procházka

With contributions by

J. Duhamel · M. Karayianni · Z. Limpouchová · S. Pispas ·
K. Procházka · M. Štěpánek · I.K. Voets · D. Wöll

 Springer

Contents

Conformational and Dynamic Behavior of Polymer and Polyelectrolyte Chains in Dilute Solutions	1
Karel Procházka	
Self-Assembly of Amphiphilic Block Copolymers in Selective Solvents . . .	27
Maria Karayianni and Stergios Pispas	
Electrostatically Driven Assembly of Polyelectrolytes	65
Ilja Karina Voets	
Theoretical Principles of Fluorescence Spectroscopy	91
Zuzana Limpouchová and Karel Procházka	
Historical Perspective of Advances in Fluorescence Research on Polymer Systems	151
Karel Procházka	
Fluorescence Spectroscopy Studies of Amphiphilic Block Copolymer Micelles in Aqueous Solutions	203
Miroslav Štěpánek	
Pyrene-Labeled Water-Soluble Macromolecules as Fluorescent Mimics of Associative Thickeners	217
Jean Duhamel	
Fluorescence Correlation Spectroscopy Studies of Polymer Systems	255
Dominik Wöll	
Index	299
