# Advances in Proof Theory

 Birkhäuser

# Contents

<b>A Survey on Ordinal Notations Around the Bachmann-Howard Ordinal</b> . . . . .	1
Wilfried Buchholz	
<b>About Truth and Types</b> . . . . .	31
Andrea Cantini	
<b>Lindenbaum’s Lemma via Open Induction</b> . . . . .	65
Francesco Ciraulo, Davide Rinaldi and Peter Schuster	
<b>Ordinal Analysis of Intuitionistic Power and Exponentiation</b>	
<b>Kripke Platek Set Theory</b> . . . . .	79
Jacob Cook and Michael Rathjen	
<b>Machine-Checked Proof-Theory for Propositional Modal Logics</b> . . . . .	173
Jeremy E. Dawson, Rajeev Goré and Jesse Wu	
<b>Intuitionistic Decision Procedures Since Gentzen</b> . . . . .	245
Roy Dyckhoff	
<b>The Operational Perspective: Three Routes</b> . . . . .	269
Solomon Feferman	
<b>Some Remarks on the Proof-Theory and the Semantics of Infinitary Modal Logic</b> . . . . .	291
Pierluigi Minari	
<b>From Subsystems of Analysis to Subsystems of Set Theory</b> . . . . .	319
Wolfram Pohlers	
<b>Restricting Initial Sequents: The Trade-Offs Between Identity, Contraction and Cut</b> . . . . .	339
Peter Schroeder-Heister	
<b>Higman’s Lemma and Its Computational Content</b> . . . . .	353
Helmut Schwichtenberg, Monika Seisenberger and Franziskus Wiesnet	

<b>How to Reason Coinductively Informally</b> .....	377
Anton Setzer	
<b>Pointwise Transfinite Induction and a Miniaturized Predicativity</b> .....	409
Stanley S. Wainer
