CONTENTS

Volumes 62–63

- 1 Special Issue Dedicated to Professor Zdeněk Bittnar on the Occasion of his Seventieth Birthday: Part I
J. KRUIS (Czech Republic)
- 3 Mathematical conditions for and physical meaning of a maximum of the determinant of \mathbf{K} , in the prebuckling regime
H.A. MANG (Austria, China) & X. JIA (Austria)
- 9 Design and optimization of roof trusses using morphological indicators
L. PYL (Belgium), C.W.M. SITTERS (Kenya) & W.P. DE WILDE (Belgium)
- 20 Distributed computing for the nonlinear analysis of multiphase composites
K. SCHRADER & C. KÖNKE (Germany)
- 33 An integrated computer model of a solar updraft power plant
W.B. KRÄTZIG (Germany)
- 39 Using the recursive subdivision and the advancing front technique for the discretization of multi-phase microstructures
D. RYPL & Z. BITTNAR (Czech Republic)
- 51 Modeling of soil structure interaction during tunnel excavation: An engineering approach
T. JANDA, M. ŠEJNOHA & J. ŠEJNOHA (Czech Republic)
- 61 Fracture properties of cement and alkali activated fly ash based concrete with application to segmental tunnel lining
M. ŠEJNOHA, M. BROUČEK, E. NOVOTNÁ, Z. KERŠNER, D. LEHKÝ & P. FRANTÍK (Czech Republic)
- 72 Probabilistic models for tunnel construction risk assessment
O. ŠPAČKOVÁ (Czech Republic, Germany), E. NOVOTNÁ, M. ŠEJNOHA & J. ŠEJNOHA (Czech Republic)
- 85 Hybrid fuzzy-genetic system for optimising cabled-truss structures
V.C. FINOTTO, W.R.L. DA SILVA, M. VALÁŠEK & P. ŠTEMBERK (Czech Republic)
- 97 Fuzzy modeling of combined effect of winter road maintenance and cyclic loading on concrete slab bridge
P. ŠTEMBERK, W.R.L. DA SILVA, J. SÝKOROVÁ & J. BARTOVÁ (Czech Republic)
- 109 Application of multiscale elastic homogenization based on nanoindentation for high performance concrete
W.R.L. DA SILVA, J. NĚMEČEK & P. ŠTEMBERK (Czech Republic)
- 119 Temperature heterogeneity during travelling fire on experimental building
K. HOROVÁ, T. JÁNA & F. WALD (Czech Republic)
