

# The Maglemose Culture

The reconstruction of the social organization  
of a mesolithic culture in Northern Europe

Ole Grøn

TEMPVS REPARATVM

BAR International Series 616

1995

# Contents

1. Introduction
  - 1.1. The sites as dynamic units
  - 1.2. Functional versus morphological types
  - 1.3. The use of statistical models
    - 1.4.1. Multivariate analysis
    - 1.4.2. Visual inspection
    - 1.4.3. Analytical strategies based on behavioural models observed ethnographically
      - 1.4.4.a. The present method of analysis - the basic assumption
      - 1.4.4.b. Choice of main object categories for analysis
      - 1.4.4.c. Method of graphical presentation
    - 1.5. The material
    - 1.6. Strategy
  2. The Ulkestrup Huts
    - 2.1. Hut I
      - 2.1.1. The floor
      - 2.1.2. Hearths
      - 2.1.3. Superstructure
      - 2.1.4. The coast line
      - 2.1.5. Deposition of waste outside the floor
        - 2.1.5.a. The 'waste layer' - waste concentration A
        - 2.1.5.b. The northern waste concentration - B
      - 2.1.6. Deposition of waste on the floor - the concentrations C and D
      - 2.1.7. Distribution of microlithic waste
      - 2.1.8. The hut and its organization
      - 2.1.9. Chronological unity of the material
    - 2.2. Hut II
      - 2.2.1. The floor
      - 2.2.2. Hearths
      - 2.2.3. Superstructure
      - 2.2.4. The coast line
      - 2.2.5. The distribution of waste
      - 2.2.6. Distribution of microlithic waste
      - 2.2.7. The hut, its organization and chronological factors
    - 2.3. Conclusion and a postulate
  3. Analysis of general distribution patterns
    - 3.1. Introduction
      - 3.1.1. References to the catalogue (column 1)
      - 3.1.2. Distances and directions to the prehistoric shore-line (columns 2 and 3)
      - 3.1.3. Structural remains of the dwellings (column 4)
        - 3.1.3.a. Bark floors
        - 3.1.3.b. Grey sand lenses
        - 3.1.3.c. Other structural features
      - 3.1.4. Area of the structures (column 5)
      - 3.1.5. Hearths (column 6)
      - 3.1.6. Microlith concentrations (column 7)
      - 3.1.7. Angle between the 'hearth-microlith axis' and the shore (column 8)
      - 3.1.8. Datings (column 9)
    - 3.2. Analysis of the sites
      - 3.2.1. Area of the units (column 5)
      - 3.2.2. Distance to the water (column 2)
      - 3.2.3. Angle between the 'hearth-microlith axis' and the shore (column 8)
      - 3.2.4. Orientation of the pairs of hearths and the pairs of microlith concentrations relative to the shore-line, at the Ulkestrup I type sites (columns 6 and 7)
      - 3.2.5. Direction to the nearby water
      - 3.2.6. Conclusion
  4. Interpretation of the units
    - 4.1. The double pattern as one contemporaneous unit or two overlapping units
    - 4.2. The physical structures of the units
    - 4.3. Seasonality
    - 4.4. The social implications of the spatial patterns
    - 4.5. The dwellings and settlements of the Maglemose Culture
    - 4.6. Cultural affinities of the two types of patterns - some further examples
  5. Discussion and conclusion
    - 5.1. The physical frames
    - 5.2. Different types of units and relative artifact composition
    - 5.3. Social organization
    - 5.4. Strategy for further research
  6. Catalogue
    - 1) *Ulkestrup II, upper floor*
    - 2) *Ulkestrup II, lower floor*
    - 3) *Duvensee W.8*
    - 4) *Duvensee W.13*
    - 5) *Klosterlund 1E*
    - 6) *Klosterlund 1W*
    - 7) *Magleby Nor A*

## 1. Introduction

- 8) *Bare Mosse II*
- 9) *Barmosen I*
- 10) *Hjemsted*
- 11) *Draved 35*
- 12) *Mullerup (Koch and Mathiassen's excavation)*
- 13) *Ulkestrup I*
- 14) *Sværdborg II*
- 15) *Duvensee W.6*
- 16) *Svanemosen 28*
- 17) *Mullerup (Sarauw's excavation)*
- 18) *Stallerupholm*
- 19) *Magleby Nor B*
- 20) *Flaadet*
- 21) *Bøllund*
- 22) *Rude Mark*
- 23) *Draved 31*
- 24) *Draved 32*
- 25, 26 and 27) *Three concentrations from Star Carr*
- 28) *Hasbjerg II*
- 29) *Tingby*
- 30) *Lavringe Mose*

7. Notes
