# Advanced Geometrical Optics

Springer

# Contents

**Part I A New Light on Old Geometrical Optics (Raytracing Equations of Geometrical Optics)**

**1 Mathematical Background** ..... 3
1.1 Foundational Mathematical Tools and Units ..... 3
1.2 Vector Notation ..... 5
1.3 Coordinate Transformation Matrix ..... 7
1.4 Basic Translation and Rotation Matrices ..... 9
1.5 Specification of a Pose Matrix by Using Translation and Rotation Matrices ..... 15
1.6 Inverse Matrix of a Transformation Matrix ..... 16
1.7 Flat Boundary Surface ..... 17
1.8 RPY Transformation Solutions ..... 19
1.9 Equivalent Angle and Axis of Rotation ..... 20
1.10 The First- and Second-Order Partial Derivatives of a Vector ..... 22
1.11 Introduction to Optimization Methods ..... 26
References ..... 28

**2 Skew-Ray Tracing of Geometrical Optics** ..... 29
2.1 Source Ray ..... 29
2.2 Spherical Boundary Surfaces ..... 32
2.2.1 Spherical Boundary Surface and Associated Unit Normal Vector ..... 32
2.2.2 Incidence Point ..... 34
2.2.3 Unit Directional Vectors of Reflected and Refracted Rays ..... 37

2.3 Flat Boundary Surfaces . . . 44
2.3.1 Flat Boundary Surface and Associated Unit Normal Vector . . . 44
2.3.2 Incidence Point . . . 46
2.3.3 Unit Directional Vectors of Reflected and Refracted Rays . . . 47
2.4 General Aspherical Boundary Surfaces . . . 55
2.4.1 Aspherical Boundary Surface and Associated Unit Normal Vector . . . 55
2.4.2 Incidence Point . . . 57
2.5 The Unit Normal Vector of a Boundary Surface for Given Incoming and Outgoing Rays . . . 64
2.5.1 Unit Normal Vector of Refractive Boundary Surface . . . 65
2.5.2 Unit Normal Vector of Reflective Boundary Surface . . . 67
References . . . 68

**3 Geometrical Optical Model** . . . 71
3.1 Axis-Symmetrical Systems . . . 71
3.1.1 Elements with Spherical Boundary Surfaces . . . 76
3.1.2 Elements with Spherical and Flat Boundary Surfaces . . . 77
3.1.3 Elements with Flat and Spherical Boundary Surfaces . . . 78
3.1.4 Elements with Flat Boundary Surfaces . . . 79
3.2 Non-axially Symmetrical Systems . . . 87
3.3 Spot Diagram of Monochromatic Light . . . 97
3.4 Point Spread Function . . . 99
3.5 Modulation Transfer Function . . . 104
3.6 Motion Measurement Systems . . . 109
References . . . 113

**4 Raytracing Equations for Paraxial Optics** . . . 115
4.1 Raytracing Equations of Paraxial Optics for 3-D Optical Systems . . . 115
4.1.1 Transfer Matrix . . . 117
4.1.2 Reflection and Refraction Matrices for Flat Boundary Surface . . . 118
4.1.3 Reflection and Refraction Matrices for Spherical Boundary Surface . . . 119
4.2 Conventional 2 × 2 Raytracing Matrices for Paraxial Optics . . . 123
4.2.1 Refracting Boundary Surfaces . . . 124
4.2.2 Reflecting Boundary Surfaces . . . 125

4.3 Conventional Raytracing Matrices for Paraxial Optics Derived from Geometry Relations . . . . . 128
4.3.1 Transfer Matrix for Ray Propagating Along Straight-Line Path . . . . . 129
4.3.2 Refraction Matrix at Refractive Flat Boundary Surface . . . . . 131
4.3.3 Reflection Matrix at Flat Mirror . . . . . 133
4.3.4 Refraction Matrix at Refractive Spherical Boundary Surface . . . . . 135
4.3.5 Reflection Matrix at Spherical Mirror . . . . . 138
References . . . . . 142

**5 Cardinal Points and Image Equations** . . . . . 143
5.1 Paraxial Optics . . . . . 143
5.2 Cardinal Planes and Cardinal Points . . . . . 145
5.2.1 Location of Focal Points . . . . . 146
5.2.2 Location of Nodal Points . . . . . 148
5.3 Thick and Thin Lenses . . . . . 149
5.4 Curved Mirrors . . . . . 151
5.5 Determination of Image Position Using Cardinal Points . . . . . 153
5.6 Equation of Lateral Magnification . . . . . 154
5.7 Equation of Longitudinal Magnification . . . . . 155
5.8 Two-Element Systems . . . . . 156
5.9 Optical Invariant . . . . . 159
5.9.1 Optical Invariant and Lateral Magnification . . . . . 160
5.9.2 Image Height for Object at Infinity . . . . . 161
5.9.3 Data of Third Ray . . . . . 162
5.9.4 Focal Length Determination . . . . . 164
References . . . . . 165

**6 Ray Aberrations** . . . . . 167
6.1 Stops and Aperture . . . . . 167
6.2 Ray Aberration Polynomial and Primary Aberrations . . . . . 169
6.3 Spherical Aberration . . . . . 171
6.4 Coma . . . . . 173
6.5 Astigmatism . . . . . 177
6.6 Field Curvature . . . . . 179
6.7 Distortion . . . . . 180
6.8 Chromatic Aberration . . . . . 181
References . . . . . 183

**Part II New Tools for Optical Analysis and Design (First-Order Derivative Matrices of a Ray and its OPL)**

**7 Jacobian Matrices of Ray $\bar{R}_i$ with Respect to Incoming Ray $\bar{R}_{i-1}$ and Boundary Variable Vector $\bar{X}_i$** ..... 187
7.1 Jacobian Matrix of Ray ..... 188
7.2 Jacobian Matrix $\partial\bar{R}_i/\partial\bar{R}_{i-1}$ for Flat Boundary Surface ..... 189
7.2.1 Jacobian Matrix of Incidence Point ..... 190
7.2.2 Jacobian Matrix of Unit Directional Vector of Reflected Ray ..... 191
7.2.3 Jacobian Matrix of Unit Directional Vector of Refracted Ray ..... 191
7.2.4 Jacobian Matrix of $\bar{R}_i$ with Respect to $\bar{R}_{i-1}$ for Flat Boundary Surface ..... 192
7.3 Jacobian Matrix $\partial\bar{R}_i/\partial\bar{R}_{i-1}$ for Spherical Boundary Surface ..... 195
7.3.1 Jacobian Matrix of Incidence Point ..... 196
7.3.2 Jacobian Matrix of Unit Directional Vector of Reflected Ray ..... 197
7.3.3 Jacobian Matrix of Unit Directional Vector of Refracted Ray ..... 198
7.3.4 Jacobian Matrix of $\bar{R}_i$ with Respect to $\bar{R}_{i-1}$ for Spherical Boundary Surface ..... 198
7.4 Jacobian Matrix $\partial\bar{R}_i/\partial\bar{X}_i$ for Flat Boundary Surface ..... 201
7.4.1 Jacobian Matrix of Incidence Point ..... 202
7.4.2 Jacobian Matrix of Unit Directional Vector of Reflected Ray ..... 203
7.4.3 Jacobian Matrix of Unit Directional Vector of Refracted Ray ..... 203
7.4.4 Jacobian Matrix of $\bar{R}_i$ with Respect to $\bar{X}_i$ ..... 204
7.5 Jacobian Matrix $\partial\bar{R}_i/\partial\bar{X}_i$ for Spherical Boundary Surface ..... 206
7.5.1 Jacobian Matrix of Incidence Point ..... 207
7.5.2 Jacobian Matrix of Unit Directional Vector of Reflected Ray ..... 208
7.5.3 Jacobian Matrix of Unit Directional Vector of Refracted Ray ..... 208
7.5.4 Jacobian Matrix of $\bar{R}_i$ with Respect to $\bar{X}_i$ ..... 209
7.6 Jacobian Matrix of an Arbitrary Ray with Respect to System Variable Vector ..... 210
Appendix 1 ..... 213
Appendix 2 ..... 215
References ..... 218

**8 Jacobian Matrix of Boundary Variable Vector $\bar{X}_i$ with Respect to System Variable Vector $\bar{X}_{sys}$** ..... 219
8.1 System Variable Vector ..... 219
8.2 Jacobian Matrix $d\bar{X}_0/d\bar{X}_{sys}$ of Source Ray ..... 220
8.3 Jacobian Matrix $d\bar{X}_i/d\bar{X}_{sys}$ of Flat Boundary Surface ..... 221
8.4 Jacobian Matrix $d\bar{X}_i/d\bar{X}_{sys}$ of Spherical Boundary Surface ..... 226
Appendix 1 ..... 233
Appendix 2 ..... 236
Appendix 3 ..... 238
Appendix 4 ..... 241
References ..... 243

**9 Prism Analysis** ..... 245
9.1 Retro-reflectors ..... 245
9.1.1 Corner-Cube Mirror ..... 245
9.1.2 Solid Glass Corner-Cube ..... 247
9.2 Dispersing Prisms ..... 248
9.2.1 Triangular Prism ..... 249
9.2.2 Pellin-Broca Prism and Dispersive Abbe Prism ..... 250
9.2.3 Achromatic Prism and Direct Vision Prism ..... 251
9.3 Right-Angle Prisms ..... 253
9.4 Porro Prism ..... 254
9.5 Dove Prism ..... 255
9.6 Roofed Amici Prism ..... 256
9.7 Erecting Prisms ..... 257
9.7.1 Double Porro Prism ..... 257
9.7.2 Porro-Abbe Prism ..... 259
9.7.3 Abbe-Koenig Prism ..... 260
9.7.4 Roofed Pechan Prism ..... 261
9.8 Penta Prism ..... 262
Appendix 1 ..... 263
References ..... 264

**10 Prism Design Based on Image Orientation** ..... 267
10.1 Reflector Matrix and Image Orientation Function ..... 267
10.2 Minimum Number of Reflectors ..... 274
10.2.1 Right-Handed Image Orientation Function ..... 275
10.2.2 Left-Handed Image Orientation Function ..... 277
10.3 Prism Design Based on Unit Vectors of Reflectors ..... 277
10.4 Exact Analytical Solutions for Single Prism with Minimum Number of Reflectors ..... 282
10.4.1 Right-Handed Image Orientation Function ..... 284
10.4.2 Left-Handed Image Orientation Function ..... 284

10.4.3 Solution for Right-Handed Image Orientation Function ..... 285
10.4.4 Solution for Left-Handed Image Orientation Function ..... 288
10.5 Prism Design for Given Image Orientation Using Screw Triangle Method ..... 291
References ..... 294

**11 Determination of Prism Reflectors to Produce Required Image Orientation** ..... 295
11.1 Determination of Reflector Equations ..... 295
11.2 Determination of Prism with n = 4 Boundary Surfaces to Produce Specified Right-Handed Image Orientation ..... 298
11.3 Determination of Prism with n = 5 Boundary Surfaces to Produce Specified Left-Handed Image Orientation ..... 302
Reference ..... 307

**12 Optically Stable Systems** ..... 309
12.1 Image Orientation Function of Optically Stable Systems ..... 309
12.2 Design of Optically Stable Reflector Systems ..... 312
12.2.1 Stable Systems Comprising Two Reflectors ..... 312
12.2.2 Stable Systems Comprising Three Reflectors ..... 313
12.2.3 Stable Systems Comprising More Than Three Reflectors ..... 314
12.3 Design of Optically Stable Prism ..... 316
Reference ..... 318

**13 Point Spread Function, Caustic Surfaces and Modulation Transfer Function** ..... 319
13.1 Infinitesimal Area on Image Plane ..... 320
13.2 Derivation of Point Spread Function Using Irradiance Method ..... 322
13.3 Derivation of Spot Diagram Using Irradiance Method ..... 326
13.4 Caustic Surfaces ..... 327
13.4.1 Caustic Surfaces Formed by Point Source ..... 328
13.4.2 Caustic Surfaces Formed by Collimated Rays ..... 330
13.5 MTF Theory for Any Arbitrary Direction of OBDF ..... 333
13.6 Determination of MTF for Any Arbitrary Direction of OBDF Using Ray-Counting and Irradiance Methods ..... 336
13.6.1 Ray-Counting Method ..... 336
13.6.2 Irradiance Method ..... 337
Appendix 1 ..... 344
Appendix 2 ..... 345
Appendix 3 ..... 346
Appendix 4 ..... 346
References ..... 349

**14 Optical Path Length and Its Jacobian Matrix** ..... 353
14.1 Jacobian Matrix of $OPL_i$ Between (i−1)th and ith Boundary Surfaces ..... 353
14.1.1 Jacobian Matrix of $OPL_i$ with Respect to Incoming Ray $\bar{R}_{i-1}$ ..... 354
14.1.2 Jacobian Matrix of $OPL_i$ with Respect to Boundary Variable Vector $\bar{X}_i$ ..... 355
14.2 Jacobian Matrix of OPL Between Two Incidence Points ..... 357
14.3 Computation of Wavefront Aberrations ..... 362
14.4 Merit Function Based on Wavefront Aberration ..... 368
References ..... 369

**Part III A Bright Light for Geometrical Optics (Second-Order Derivative Matrices of a Ray and its OPL)**

**15 Wavefront Aberration and Wavefront Shape** ..... 373
15.1 Hessian Matrix $\partial^2\bar{R}_i/\partial\bar{R}_{i-1}^2$ for Flat Boundary Surface ..... 374
15.1.1 Hessian Matrix of Incidence Point $\bar{P}_i$ ..... 375
15.1.2 Hessian Matrix of Unit Directional Vector $\bar{\ell}_i$ of Reflected Ray ..... 375
15.1.3 Hessian Matrix of Unit Directional Vector $\bar{\ell}_i$ of Refracted Ray ..... 375
15.2 Hessian Matrix $\partial^2\bar{R}_i/\partial\bar{R}_{i-1}^2$ for Spherical Boundary Surface ... 376
15.2.1 Hessian Matrix of Incidence Point $\bar{P}_i$ ..... 376
15.2.2 Hessian Matrix of Unit Directional Vector $\bar{\ell}_i$ of Reflected Ray ..... 377
15.2.3 Hessian Matrix of Unit Directional Vector $\bar{\ell}_i$ of Refracted Ray ..... 377
15.3 Hessian Matrix of $\bar{R}_i$ with Respect to Variable Vector $\bar{X}_0$ of Source Ray ..... 378
15.4 Hessian Matrix of $OPL_i$ with Respect to Variable Vector $\bar{X}_0$ of Source Ray ..... 380
15.5 Change of Wavefront Aberration Due to Translation of Point Source $\bar{P}_0$ ..... 382
15.6 Wavefront Shape Along Ray Path ..... 387
15.6.1 Tangent and Unit Normal Vectors of Wavefront Surface ..... 389
15.6.2 First and Second Fundamental Forms of Wavefront Surface ..... 390
15.6.3 Principal Curvatures of Wavefront ..... 392
Appendix 1 ..... 399
Appendix 2 ..... 400
References ..... 403

**16 Hessian Matrices of Ray $\bar{R}_i$ with Respect to Incoming Ray $\bar{R}_{i-1}$ and Boundary Variable Vector $\bar{X}_i$** ..... 405
16.1 Hessian Matrix of a Ray with Respect to System Variable Vector ..... 405
16.2 Hessian Matrix $\partial^2\bar{R}_i/\partial\bar{X}_i^2$ for Flat Boundary Surface ..... 407
16.2.1 Hessian Matrix of Incidence Point $\bar{P}_i$ ..... 407
16.2.2 Hessian Matrix of Unit Directional Vector $\bar{\ell}_i$ of Reflected Ray ..... 408
16.2.3 Hessian Matrix of Unit Directional Vector $\bar{\ell}_i$ of Refracted Ray ..... 408
16.3 Hessian Matrix $\partial^2\bar{R}_i/\partial\bar{X}_i\partial\bar{R}_{i-1}$ for Flat Boundary Surface ..... 409
16.3.1 Hessian Matrix of Incidence Point $\bar{P}_i$ ..... 410
16.3.2 Hessian Matrix of Unit Directional Vector $\bar{\ell}_i$ of Reflected Ray ..... 411
16.3.3 Hessian Matrix of Unit Directional Vector $\bar{\ell}_i$ of Refracted Ray ..... 411
16.4 Hessian Matrix $\partial^2\bar{R}_i/\partial\bar{X}_i^2$ for Spherical Boundary Surface ..... 412
16.4.1 Hessian Matrix of Incidence Point $\bar{P}_i$ ..... 412
16.4.2 Hessian Matrix of Unit Directional Vector $\bar{\ell}_i$ of Reflected Ray ..... 413
16.4.3 Hessian Matrix of Unit Directional Vector $\bar{\ell}_i$ of Refracted Ray ..... 413
16.5 Hessian Matrix $\partial^2\bar{R}_i/\partial\bar{X}_i\partial\bar{R}_{i-1}$ for Spherical Boundary Surface ..... 414
16.5.1 Hessian Matrix of Incidence Point $\bar{P}_i$ ..... 415
16.5.2 Hessian Matrix of Unit Directional Vector $\bar{\ell}_i$ of Reflected Ray ..... 415
16.5.3 Hessian Matrix of Unit Directional Vector $\bar{\ell}_i$ of Refracted Ray ..... 416
Appendix 1 ..... 417
Appendix 2 ..... 420
Reference ..... 423

**17 Hessian Matrix of Boundary Variable Vector $\bar{X}_i$ with Respect to System Variable Vector $\bar{X}_{sys}$** ..... 425
17.1 Hessian Matrix $\partial^2\bar{X}_0/\partial\bar{X}_{sys}^2$ of Source Ray ..... 425
17.2 Hessian Matrix $\partial^2\bar{X}_i/\partial\bar{X}_{sys}^2$ for Flat Boundary Surface ..... 426
17.3 Design of Optical Systems Possessing Only Flat Boundary Surfaces ..... 430
17.4 Hessian Matrix $\partial^2\bar{X}_i/\partial\bar{X}_{sys}^2$ for Spherical Boundary Surface ..... 433
17.5 Design of Retro-reflectors ..... 437
