Variational Analysis and Aerospace Engineering

Mathematical Challenges for the Aerospace
of the Future

 Springer

Contents

Molding Direction Constraints in Structural Optimization via a Level-Set Method	1
Grégoire Allaire, François Jouve, and Georgios Michailidis	
Adaptive Control for Weakly Minimum Phase Linear Infinite-Dimensional Systems in Hilbert Space Using a Zero Filter	41
Mark J. Balas and Susan A. Frost	
Aeroelasticity of the PrandtlPlane: Body Freedom Flutter, Freeplay, and Limit Cycle Oscillation	65
Rauno Cavallaro, Rocco Bombardieri, Simone Silvani, Luciano Demasi, and Giovanni Bernardini	
HyPSim: A Simulation Tool for Hybrid Aircraft Performance Analysis ..	95
Vittorio Cipolla and Fabrizio Oliviero	
Evolutionary and Heuristic Methods Applied to Problems in Optimal Control	117
Bruce A. Conway	
Composite Thin-Walled Beams by Γ-Convergence: From Theory to Application	145
Cesare Davini, Lorenzo Freddi, and Roberto Paroni	
The Variational Approach to Fracture: A Theoretical Model and Some Numerical Results	169
Gianpietro Del Piero	
Minimum Induced Drag Theorems for Nonplanar Systems and Closed Wings	191
Luciano Demasi, Giovanni Monegato, and Rauno Cavallaro	
On Aerodynamic Design with a POD Surrogate Model	219
Valentina Dolci and Renzo Arina	

Trust Region Filter-SQP Method for Multi-fidelity Wing Aerostructural Optimization	247
Ali Elham and Michel J.L. van Tooren	
Tensegrity Rings for Deployable Space Antennas: Concept, Design, Analysis, and Prototype Testing	269
Pier Luigi Ganga, Andrea Micheletti, Paolo Podio-Guidugli, Lucio Scolamiero, Gunnar Tibert, and Valfredo Zolesi	
Data Analytic UQ Cascade	305
Bijan Mohammadi	
Aerodynamic Design of ‘Box Blade’ and ‘Non-planar’ Wind Turbines ...	333
Luigi Molea, Emanuele Di Vitantonio, and Aldo Frediani	
A New Paradigm for the Optimum Design of Variable Angle Tow Laminates	375
Marco Montemurro and Anita Catapano	
Numerical Study of a Monolithic Fluid–Structure Formulation	401
Olivier Pironneau	
A New, General Neighboring Optimal Guidance for Aerospace Vehicles	421
Mauro Pontani	
State-of-the-Art of Optimum Shape Design Methods for Industrial Applications and Beyond	451
Bruno Stoufflet	
Variational Analysis and Euler Equation of the Optimum Propeller Problem	453
Francesco Torrigiani, Aldo Frediani, and Antonio Dipace	
Another View on Planar Anisotropy: The Polar Formalism	489
Paolo Vannucci
