

***EU productivity
and competitiveness:
An industry perspective***

*Can Europe resume
the catching-up process?*

Mary O'Mahony and Bart van Ark (ed.)

B 352779

European
Commission

Table of Contents

Executive Summary	7
Report Overview	15
Chapter I: Productivity Performance Overview	17
<i>Mary O'Mahony* and Bart van Ark**</i>	
I.1 Introduction	17
I.2 An overview of EU-US productivity differentials	18
I.3 Performance measures and measurement issues	23
<i>I.3.1 Why adopt an industry perspective?</i>	23
<i>I.3.2 The industry databases</i>	24
I.4 A summary of the results	28
<i>I.4.1 Sector Results</i>	28
<i>I.4.2 Decomposition of EU-15 labour productivity growth by country</i>	29
<i>I.4.3 Results using industry taxonomies</i>	30
<i>I.4.4 Growth accounting results</i>	32
<i>I.4.5 Productivity and competitiveness in manufacturing</i>	33
<i>I.4.6 Cyclical influences on productivity growth</i>	33
<i>I.4.7 Results at the firm level</i>	34
I.5 Implications for policy	35
Chapter II: Industry Structure and Taxonomies	37
<i>Catherine Robinson*, Lucy Stokes*, Edwin Stuivenwold** and Bart van Ark**</i>	
II.1 Introduction	37
II.2 Data description	37
II.3 Industry structure	38
<i>II.3.1 Industry shares of aggregate economic activity</i>	38
<i>II.3.2 The size distribution of industries</i>	39
<i>II.3.3 Capital intensity</i>	45

II.4	Industry taxonomies	47
II.4.1	<i>ICT taxonomy</i>	47
II.4.2	<i>IT occupational taxonomy</i>	50
II.4.3	<i>General skills taxonomy</i>	52
II.4.3.1	<i>Using the detailed skills data for the UK and US</i>	53
II.4.3.2	<i>Using Eurostat Skills database to develop a taxonomy</i>	54
II.4.4	<i>Innovation taxonomy based on the Pavitt taxonomy</i>	61
II.4.5	<i>The taxonomies combined</i>	66
II.5	Conclusions	67
II.A	Appendix Tables	70
Chapter III:	Productivity and Competitiveness in the EU and the US	73
	<i>Robert Inklaar**</i> , <i>Mary O'Mahony*</i> , <i>Catherine Robinson*</i> and <i>Marcel Timmer**</i>	
III.1	Introduction	73
III.2	Labour productivity in the EU-15 and US: an overview	73
III.3	Productivity growth grouped by industry taxonomies	78
III.3.1	<i>ICT taxonomy</i>	78
III.3.2	<i>IT occupational, general skills and innovation taxonomies</i>	84
III.3.3	<i>Conclusions from the taxonomy approach</i>	89
III.4	Decomposition of EU-15 labour productivity growth by country	90
III.5	Growth accounting	92
III.5.1	<i>Data and methods</i>	92
III.5.2	<i>Growth accounting results</i>	93
III.5.3	<i>Further analysis of input contributions</i>	99
III.6	Competitiveness in manufacturing: productivity levels and unit labour costs	103
III.6.1	<i>Relative labour productivity levels</i>	104
III.6.2	<i>Unit labour costs</i>	107
III.7	Conclusions	110
III.A	Appendix Tables	111
Chapter IV:	Structural and Cyclical Performance	149
	<i>Robert Inklaar**</i> and <i>Robert McGuckin***</i>	
IV.1	Introduction	149
IV.2	Decomposing productivity growth rates into cycle and trend	150
IV.2.1	<i>Data</i>	152
IV.2.2	<i>Structural and cyclical effects in the productivity series</i>	153
IV.2.3	<i>A note on the sensitivity of the results to choice of lambda</i>	155
IV.3	Structural trends in productivity growth	156
IV.3.1	<i>Structural and cyclical decomposition by sector</i>	158

IV.4 Inventories and ICT	160
IV.4.1 <i>Inventories to sales ratios</i>	161
IV.4.2 <i>Inventories and volatility</i>	161
IV.4.3 <i>Data</i>	161
IV.4.4 <i>Empirical findings</i>	162
IV.5 Conclusions	166
IV.A Appendix Table	167
Chapter V: Productivity Performance at the Company Level	169
<i>Ana Rincon* and Michela Vecchi*</i>	
V.1 Introduction	169
V.2 Description of the data set	170
V.2.1 <i>Data sources and transformations</i>	170
V.2.2 <i>Descriptive statistics</i>	171
V.2.3 <i>Merging company and industry information</i>	173
V.3 Trends in labour productivity growth	175
V.3.1 <i>General trends</i>	175
V.3.2 <i>R&D, firm size and productivity performance</i>	177
V.4 Econometric analysis	180
V.4.1 <i>Modelling the impact of R&D on productivity growth</i>	180
V.4.2 <i>Basic production function results</i>	181
V.4.3 <i>Results for the sample split at 1995 and firm size</i>	184
V.4.4 <i>Introducing the taxonomy dummies</i>	192
V.5 Firm dynamics	195
V.6 Conclusions	201
V.A Appendix: Methods and Tables	202
V.B Appendix: Generalised Methods of Moments (GMM) estimates	205
Chapter VI: The Policy Framework: Does the EU need a Productivity Agenda	209
<i>Geoff Mason*, Mary O'Mahony* and Bart van Ark**</i>	
VI.1 Background	209
VI.2 Theoretical perspectives on productivity-enhancing policies	211
VI.3 Scope for improving productivity growth rates	213
VI.3.1 <i>Improvements through better use of ICT</i>	213
VI.3.2 <i>Non-ICT impacts on growth</i>	215
VI.4 The regulatory and institutional environment	218
VI.5 Policy implications	221
VI.6 Conclusions	224

Chapter VII: Data Sources and Methodology	227
<i>Robert Inklaar**</i> , <i>Lucy Stokes*</i> , <i>Edwin Stuivenwold**</i> , <i>Marcel Timmer**</i> & <i>Gerard Ypma**</i>	
VII.1 General Introduction on Performance Measurement Issues	227
VII.2 Databases for this project	230
A. <i>The 56-industry database for the European Union and the US</i>	230
B. <i>Industry growth accounting database for the European Union and the US</i>	239
C. <i>Manufacturing Productivity and Unit Labour Cost database for the European Union and the US</i>	249
