|---|-----------|
| <b>1 Data Analysis</b>                                | <b>1</b>  |
| 1.1 Describing Data . . . . .                         | 1         |
| 1.1.1 Statistical Software Packages . . . . .         | 2         |
| 1.1.2 Observations . . . . .                          | 2         |
| 1.1.3 Frequency Distribution . . . . .                | 5         |
| 1.2 Inference Base . . . . .                          | 8         |
| 1.2.1 Random Variable . . . . .                       | 8         |
| 1.2.2 Distribution of a Random Variable . . . . .     | 10        |
| 1.2.3 Random Sample . . . . .                         | 22        |
| 1.3 Inference . . . . .                               | 23        |
| 1.3.1 Estimation . . . . .                            | 24        |
| 1.3.2 Sample Mean and Variance . . . . .              | 31        |
| 1.3.3 Maximum Likelihood Estimation . . . . .         | 34        |
| 1.3.4 Fitting Probability Density Functions . . . . . | 38        |
| 1.4 A Summary Illustration . . . . .                  | 43        |
| <b>2 The Normal Distribution</b>                      | <b>45</b> |
| 2.1 Definition of the Normal Distribution . . . . .   | 46        |
| 2.1.1 Location and Scale Parameter . . . . .          | 46        |
| 2.1.2 Expectation and Variance . . . . .              | 48        |
| 2.1.3 Alternative Parametrizations . . . . .          | 49        |
| 2.2 Standard Normal Distribution . . . . .            | 50        |
| 2.2.1 The Function $\phi(x)$ . . . . .                | 50        |
| 2.2.2 The Function $\Phi(x)$ . . . . .                | 51        |
| 2.2.3 Related Functions . . . . .                     | 54        |

|          |  |            |
|----------|--|------------|
| 2.3      | Moments . . . . .  | 56         |
| 2.3.1    | The 1, 2, 3 standard deviation intervals . . . . .           | 56         |
| 2.3.2    | Higher Moments . . . . .                                     | 57         |
| 2.3.3    | Skewness and Kurtosis . . . . .                              | 58         |
| 2.3.4    | Sample Skewness and Kurtosis . . . . .                       | 60         |
| 2.4      | Quantiles . . . . .  | 61         |
| 2.4.1    | Quantiles of the Normal Distribution . . . . .               | 62         |
| 2.4.2    | Sample Quantiles . . . . .                                   | 65         |
| 2.5      | Parameter Estimation . . . . .                               | 67         |
| 2.5.1    | Maximum Likelihood Estimators . . . . .                      | 67         |
| 2.5.2    | Properties of Estimators . . . . .                           | 68         |
| 2.6      | The Central Limit Theorem . . . . .                          | 71         |
| 2.6.1    | Approximate Normality of the Sample Mean . . . . .           | 71         |
| 2.6.2    | Cautionary Notes . . . . .                                   | 75         |
| 2.6.3    | Approximate Normality of Sample Statistics . . . . .         | 76         |
| 2.7      | Approximate Normality of the Binomial Distribution . . . . . | 79         |
| 2.7.1    | The Binomial Distribution . . . . .                          | 79         |
| 2.7.2    | Approximation by the Normal Distribution . . . . .           | 81         |
| 2.7.3    | The Galton Board . . . . .                                   | 84         |
| 2.8      | Random Sample Generation . . . . .                           | 85         |
| <b>3</b> | <b>Checking for Normality</b>                                | <b>89</b>  |
| 3.1      | Sample Characteristic Values . . . . .                       | 89         |
| 3.2      | Graphics . . . . .   | 92         |
| 3.2.1    | The Histogram . . . . .                                      | 92         |
| 3.2.2    | The ECDF . . . . .   | 95         |
| 3.2.3    | The Normal Quantile-Quantile Plot . . . . .                  | 97         |
| 3.3      | Summary . . . . .  | 101        |
| <b>4</b> | <b>Testing for Normality</b>                                 | <b>103</b> |
| 4.1      | General Remarks . . . . .                                    | 103        |
| 4.1.1    | Significance Tests . . . . .                                 | 103        |
| 4.1.2    | Classification of Tests . . . . .                            | 106        |
| 4.2      | The Chi-Square Test . . . . .                                | 107        |
| 4.3      | Tests Based on the ECDF . . . . .                            | 110        |
| 4.3.1    | The Lilliefors (Kolmogorov-Smirnov) Test . . . . .           | 111        |
| 4.3.2    | The Cramér-von Mises Test . . . . .                          | 114        |

|          |   |            |
|----------|---|------------|
| 4.3.3    | The Anderson-Darling Test . . . . .             | 115        |
| 4.4      | Correlation and Regression Tests . . . . .      | 116        |
| 4.4.1    | The Shapiro-Francia Test . . . . .              | 117        |
| 4.4.2    | The Shapiro-Wilk Test . . . . .                 | 118        |
| 4.5      | Summary . . . . .                               | 119        |
| <b>5</b> | <b>Variants of the Normal Distribution</b>      | <b>121</b> |
| 5.1      | Truncated Normal Distribution . . . . .         | 121        |
| 5.1.1    | Truncation of the Normal Distribution . . . . . | 122        |
| 5.1.2    | Estimation of Parameters . . . . .              | 125        |
| 5.1.3    | Random Sample Generation . . . . .              | 128        |
| 5.2      | Two-Normals-Mixture Distribution . . . . .      | 129        |
| 5.2.1    | Probability Density Function . . . . .          | 130        |
| 5.2.2    | Estimation of Parameters . . . . .              | 132        |
| 5.2.3    | Random Sample Generation . . . . .              | 139        |
| 5.3      | Skew-Normal Distribution . . . . .              | 139        |
| 5.3.1    | Probability Density Function . . . . .          | 140        |
| 5.3.2    | Estimation of Parameters . . . . .              | 143        |
| 5.3.3    | Random Sample Generation . . . . .              | 145        |
| <b>6</b> | <b>Transformations to Normality</b>             | <b>147</b> |
| 6.1      | Data Transformation . . . . .                   | 147        |
| 6.2      | The Johnson System of Distributions . . . . .   | 148        |
| 6.2.1    | Three Types of Distribution . . . . .           | 148        |
| 6.2.2    | Estimation of Parameters . . . . .              | 152        |
| 6.2.3    | Choice of Fit . . . . .                         | 158        |
| 6.3      | The Lognormal Distribution . . . . .            | 158        |
| 6.3.1    | Two- and Three-Parameter Lognormal Distribution | 160        |
| 6.3.2    | Estimation of Parameters . . . . .              | 161        |
| 6.4      | Power Transformations . . . . .                 | 163        |
| 6.4.1    | Box-Cox Transformation . . . . .                | 163        |
| 6.4.2    | Transformation for Proportions . . . . .        | 165        |
| <b>7</b> | <b>Two Normal Variables</b>                     | <b>169</b> |
| 7.1      | The Bivariate Normal Distribution . . . . .     | 169        |
| 7.1.1    | Probability Density Function . . . . .          | 170        |
| 7.1.2    | Some Properties . . . . .                       | 170        |

|                     |  |            |
|---------------------|--|------------|
| 7.1.3               | Uncorrelatedness and Independence . . . . .  | 173        |
| 7.1.4               | Estimation . . . . .   | 174        |
| 7.1.5               | Assessing Bivariate Normality . . . . .  | 174        |
| 7.1.6               | Random Sample Generation . . . . .   | 176        |
| 7.2                 | Two Normal Variables . . . . .   | 177        |
| 7.2.1               | Are Two Normals Jointly Normal? . . . . .  | 177        |
| 7.2.2               | Are Two Uncorrelated Normals Independent? . . . . .  | 180        |
| 7.2.3               | Does Uncorrelatedness of Two Normals Imply Independence Only If They Are Jointly Normal? . . . . . | 182        |
| 7.2.4               | Is Any Linear Combination of Two Normals Again Normal? . . . . .                                   | 182        |
| 7.3                 | Vector and Matrix Representation . . . . .   | 183        |
| <b>8</b>            | <b>Transformations of Normal Variables</b>   | <b>185</b> |
| 8.1                 | Functions of a Random Variable . . . . .   | 185        |
| 8.2                 | Functions of a Single Normal Variable . . . . .  | 187        |
| 8.2.1               | Distribution of the Absolute Value . . . . .   | 187        |
| 8.2.2               | Distribution of the Square . . . . .   | 189        |
| 8.2.3               | Distribution of the Reciprocal . . . . .   | 191        |
| 8.2.4               | Distribution of Minimum and Maximum . . . . .  | 192        |
| 8.3                 | Functions of Two Independent Normals . . . . .   | 193        |
| 8.3.1               | Distribution of the Sum . . . . .  | 194        |
| 8.3.2               | Distribution of Product and Quotient . . . . .   | 194        |
| 8.4                 | Functions Related to a Normal Sample . . . . .   | 197        |
| 8.4.1               | Standard Normal Sample . . . . .   | 197        |
| 8.4.2               | Distribution of Parameter-Sample Statistic Functions . . . . .                                     | 204        |
| 8.4.3               | Distribution of the Sample $z$ -Score . . . . .  | 208        |
| <b>Bibliography</b> |  | <b>211</b> |
| <b>Index</b>        |  | <b>217</b> |
