PART I

From Early Modern Economics to Imperfect Knowledge Economics **1**

1	Recognizing the Limits of Economists' Knowledge	3
	The Overreach of Contemporary Economics	3
	The Aim of This Book	6
	Contemporary Models in a World of Imperfect Knowledge	8
	The Non-Fully Intelligible Individual	13
	IKE Models	14
	IKE of Exchange Rates and Risk	20
	Imperfect Knowledge and Policy Analysis	23
	From Contemporary Economics to Imperfect Knowledge Economics	24
2	A Tradition Interrupted	26
	The Stranglehold of the Contemporary Approach	27
	The Non-Fully Intelligible Individual in Early Modern Economics	34
	Jettisoning Insights from Early Modern Analysis	38

3	Flawed Foundations: The Gross Irrationality of “Rational Expectations” and Behavioral Models	41
	Conventional and Behavioral Representations of Preferences with Uncertain Outcomes	42
	Self-Interest, Social Context, and Individual Decisions	45
	Individual Behavior and Aggregate Outcomes	48
	From Early Modern to Phelps’s Microfoundations	49
	“Rational Expectations”: Abandoning the Modern Research Program	49
	Diversity of Forecasting Strategies: The Gross Irrationality of “Rational Expectations”	51
	Inconsistency in Behavioral Models	54
4	Reconsidering Modern Economics	58
	Sharp Predictions and Fully Predetermined Representations	60
	Qualitative Predictions of Change in Fully Predetermined Models	65
	IKE Models of Change	66
	IKE Causal-Transition Paths	70
	Appendix 4.A: Fully Prespecifying Change in the Social Context	71
	Appendix 4.B: Modeling Change in Outcomes with Fully Predetermined Probabilistic Rules	72
5	Imperfect Knowledge Economics of Supply and Demand	74
	Fully Predetermined Representations of Supply and Demand	76
	Supply and Demand Analysis in Contemporary Models	79
	History as the Future and Vice Versa	81
	Supply and Demand Analysis in IKE Models	82
	Irreversibility of History in IKE Models	86
	PART II	
	“Anomalies” in Contemporary Models of Currency Markets	89
6	The Overreach of Contemporary Models of Asset Markets	91
	Describing Forecasting Behavior	92
	Fully Predetermined Representations of Forecasting Strategies and Their Revisions	93
	Modeling Economic Change with a Time-Invariant Structure	96
	Models with Fully Predetermined Changes in Structure	101

	Prespecifying Collective Beliefs in Currency Markets: Bubble Models	104
	Appendix 6.A: A Conventional Macroeconomic Model	107
7	The “Puzzling” Behavior of Exchange Rates: Lost Fundamentals and Long Swings	113
	Exchange Rates and Macroeconomic Fundamentals: The Futile Search for a Fully Predetermined Relationship	114
	The Exchange Rate Disconnect Puzzle: An Artifact of the Contemporary Approach	120
	Macroeconomic Fundamentals over Long Horizons: Self-Limiting Long Swings	121
	Can REH Models Explain Long Swings in Exchange Rates?	126
	REH Bubble Models and the Pattern of Long Swings in Real World Markets	131
	Lost Fundamentals and Forsaken Rationality: Behavioral Models	134
8	“Anomalous” Returns on Foreign Exchange: Is It Really Irrationality?	138
	The Record on Foreign Exchange Returns	140
	An REH Risk Premium?	144
	Is Irrationality the Answer?	147
	The Forward-Discount “Anomaly”: Another Artifact of the Contemporary Approach	151
	PART III	
	Imperfect Knowledge Economics of Exchange Rates and Risk	153
9	Modeling Preferences in Asset Markets: Experimental Evidence and Imperfect Knowledge	155
	Prospect Theory and Speculative Decisions	159
	Endogenous Loss Aversion and Limits to Speculation	167
	Experimental Evidence and Behavioral Finance Models	170
	Moving beyond Behavioral Finance Models	173
	IKE Representations of Preferences in Asset Markets: Individual Uncertainty Premiums	176
	Imperfect Knowledge and Preferences over Gambles: Endogenous Prospect Theory	179
	Appendix 9.A: Limits to Speculation under Endogenous Loss Aversion	180

10	Modeling Individual Forecasting Strategies and Their Revisions	183
	Theories Consistent Expectations Hypothesis	185
	IKE Representations of Revisions: An Overview	191
	Trend Restriction	192
	Conservative Revisions	194
	Revisions of the Expected Unit Loss	197
11	Bulls and Bears in Equilibrium: Uncertainty-Adjusted Uncovered Interest Parity	203
	Momentary Equilibrium in the Foreign Exchange Market	204
	Equilibrium under Risk Aversion	205
	Uncertainty-Adjusted UIP	210
12	IKE of the Premium on Foreign Exchange: Theory and Evidence	218
	An IKE House Money Model: Time-Varying Preferences	220
	An IKE Gap Plus Model: Autonomous Revisions in Forecasting Strategies	223
	Confronting the Gap Plus and House Money Models with Time-Series Data	225
	The Gap Plus Model and the Frequency of Sign Reversals	238
	Avoiding the Presumption of Gross Irrationality	241
	Appendix 12.A	242
13	The Forward Discount “Anomaly”: The Peril of Fully Prespecifying Market Efficiency	243
	Bilson-Fama Regression and the Forward Discount “Anomaly”	245
	Structural Instability of the BF Regression and the Gap Plus Model	246
	BF Regression and Market Efficiency	252
14	Imperfect Knowledge and Long Swings in the Exchange Rate	258
	A Monetary Model	260
	Invariant Representations and an Unbounded Swing Away from PPP	266
	Fixed Policy Rules and Invariant Representations?	272
	An IKE Model of Exchange Rate Swings	272
	Conventional and Behavioral Views of Reversals	278
	Imperfect Knowledge and Self-Limiting Long Swings	279
	Appendix 14.A: Solution with an Invariant Representation	283
	Appendix 14.B: Exchange Rate Swings and Sticky Goods Prices	283

15	Exchange Rates and Macroeconomic Fundamentals: Abandoning the Search for a Fully Predetermined Relationship	292
	Structural Change in the Causal Mechanism	295
	Macroeconomic Fundamentals and the Exchange Rate in the 1970s	297
	Are the Monetary Models Consistent with Empirical Evidence? Macroeconomic Fundamentals and the Exchange Rate in the 1980s	304
	Appendix 15.A: Description of Data	309
	References	312
	Index	313
