

Robin Doss · Selwyn Piramuthu
Wei Zhou (Eds.)

Future Network Systems and Security

Third International Conference, FNSS 2017
Gainesville, FL, USA, August 31 – September 2, 2017
Proceedings

Contents

Protocol Design and Secure Implementation

- Efficient Certificate Verification for Vehicle-to-Grid Communications 3
*Nico Saputro, Samet Tonyali, Kemal Akkaya, Mumin Cebe,
and Mohamed Mahmoud*
- The GENI Test Automation Framework for New Protocol Development 19
*Erik Golen, Sai Varun Prasanth, Shashank Rudroju,
and Nirmala Shenoy*
- Computational Security and the Economics of Password Hacking 30
Kanwalinderjit Gagneja and Luis G. Jaimes

Security Protocols and Attack Countermeasures

- DNS DDoS Mitigation, via DNS Timer Design Changes 43
Todd Booth and Karl Andersson
- RFID-Based Non-repudiation Protocols for Supply Chains 56
Selwyn Piramuthu
- Towards Realizing a Distributed Event and Intrusion Detection System 70
Qian Chen, Hisham A. Kholidy, Sherif Abdelwahed, and John Hamilton
- Adjusting Matryoshka Protocol to Address the Scalability Issue
in IoT Environment. 84
Gaith Al, Robin Doss, and Morshed Chowdhury

Big Data and Future Applications

- Is High Performance Computing (HPC) Ready to Handle Big Data? 97
Biplob R. Ray, Morshed Chowdhury, and Usman Atif
- Transportation at the Confluence of Engineering and Big Data:
Design of Automated Motorway Lane-Changing Systems 113
*Michael Lawry, Asfahaan Mirza, Yidi Wendy Wang,
and David Sundaram*
- Efficient Transportation - Does the Future Lie in Vehicle Technologies
or in Transportation Systems? 126
*Michael Lawry, Asfahaan Mirza, Yidi Wendy Wang,
and David Sundaram*
