Hongsheng He (Eds.)

# Social Robotics

9th International Conference, ICSR 2017  
Tsukuba, Japan, November 22–24, 2017  
Proceedings

# Contents

Learning Affordances for Assistive Robots . . . . .	1
<i>Mohan Sridharan and Ben Meadows</i>	
Initial Design, Implementation and Technical Evaluation of a Context-aware Proxemics Planner for a Social Robot . . . . .	12
<i>Kheng Lee Koay, Dag Syrdal, Richard Bormann, Joe Saunders, Michael L. Walters, and Kerstin Dautenhahn</i>	
An Image Based Non-verbal Behaviour Analysis of HRI . . . . .	23
<i>Omar Mubin, Hiren Patel, Aila Khan, and Mohammad Obaid</i>	
Do Social Rewards from Robots Enhance Offline Improvements in Motor Skills? . . . . .	32
<i>Soto Okumura, Mitsuhiro Kimoto, Masahiro Shiomi, Takamasa Iio, Katsunori Shimohara, and Norihiro Hagita</i>	
How the Timing and Magnitude of Robot Errors Influence Peoples’ Trust of Robots in an Emergency Scenario . . . . .	42
<i>Alessandra Rossi, Kerstin Dautenhahn, Kheng Lee Koay, and Michael L. Walters</i>	
The Iterative Development of the Humanoid Robot Kaspar: An Assistive Robot for Children with Autism . . . . .	53
<i>Luke J. Wood, Abolfazl Zaraki, Michael L. Walters, Ori Novanda, Ben Robins, and Kerstin Dautenhahn</i>	
The Interaction Between Voice and Appearance in the Embodiment of a Robot Tutor . . . . .	64
<i>Helen Hastie, Katrin Lohan, Amol Deshmukh, Frank Broz, and Ruth Aylett</i>	
Shape It – The Influence of Robot Body Shape on Gender Perception in Robots . . . . .	75
<i>Jasmin Bernotat, Friederike Eyssel, and Janik Sachse</i>	
A Telepresence Robot in Residential Care: Family Increasingly Present, Personnel Worried About Privacy . . . . .	85
<i>Marketta Niemelä, Lina van Aerschot, Antti Tammela, and Iina Aaltonen</i>	
Influence of Robot’s Interaction Style on Performance in a Stroop Task . . . .	95
<i>Roxana Agrigoroaie and Adriana Tapus</i>	

‘Autistic Robots’ for Embodied Emulation of Behaviors Typically Seen in Children with Different Autism Severities . . . . .	105
<i>Kim Baraka, Francisco S. Melo, and Manuela Veloso</i>	
Learning Relationships Between Objects and Places by Multimodal Spatial Concept with Bag of Objects . . . . .	115
<i>Shota Isobe, Akira Taniguchi, Yoshinobu Hagiwara, and Tadahiro Taniguchi</i>	
There Once Was a Robot Storyteller: Measuring the Effects of Emotion and Non-verbal Behaviour . . . . .	126
<i>Hendrik Striepe and Birgit Lugin</i>	
Field Testing of the Influence of Assistive Wear on the Physical Fitness of Nursing-Care Workers . . . . .	137
<i>Yumeko Imamura, Takayuki Tanaka, and Kazuki Takizawa</i>	
Developing Interaction Scenarios with a Humanoid Robot to Encourage Visual Perspective Taking Skills in Children with Autism – Preliminary Proof of Concept Tests . . . . .	147
<i>Ben Robins, Kerstin Dautenhahn, Luke Wood, and Abolfazl Zaraki</i>	
Human-Like Hand Reaching by Motion Prediction Using Long Short-Term Memory . . . . .	156
<i>Phongtharin Vinayavekhin, Michiaki Tatsubori, Daiki Kimura, Yifan Huang, Giovanni De Magistris, Asim Munawar, and Ryuki Tachibana</i>	
User’s Personality and Activity Influence on HRI Comfortable Distances. . . .	167
<i>Silvia Rossi, Mariacarla Staffa, Luigi Bove, Roberto Capasso, and Giovanni Ercolano</i>	
A Need for Service Robots Among Health Care Professionals in Hospitals and Housing Services . . . . .	178
<i>Kimmo J. Vänni and Sirpa E. Salin</i>	
Do You Think I Approve of That? Designing Facial Expressions for a Robot . . . . .	188
<i>Peter E. McKenna, Mei Yii Lim, Ayan Ghosh, Ruth Aylett, Frank Broz, and Gnanathusharan Rajendran</i>	
Robotic Device to Mediate Human-Human Hug-Driven Remote Communication. . . . .	198
<i>Eleuda Nunez, Masakazu Hirokawa, Hiroya Igarashi, and Kenji Suzuki</i>	

*RoMa: A Hi-tech Robotic Mannequin for the Fashion Industry* . . . . . 209  
*Minoo Alemi, Ali Meghdari, Ehsan Saffari, Ahmad Zibafar, Leila Faryan, ALi Ghorbandaei Pour, Amin RezaSoltani, and Alireza Taheri*

Walk the Talk: Gestures in Mobile Interaction . . . . . 220  
*Zeynep Yücel, Francesco Zanlungo, and Masahiro Shiomi*

Gaze Behavioral Adaptation Towards Group Members for Providing Effective Recommendations . . . . . 231  
*Silvia Rossi and Pasquale D’Alterio*

Subtle Reaction and Response Time Effects in Human-Robot Touch Interaction . . . . . 242  
*Masahiro Shiomi, Takashi Minato, and Hiroshi Ishiguro*

Young EFL Learners’ Attitude Towards RALL: An Observational Study Focusing on Motivation, Anxiety, and Interaction . . . . . 252  
*Minoo Alemi, Ali Meghdari, and Nafiseh Sadat Haeri*

Design of a Cloud-Based Robotic Platform for Accompanying and Interacting with Humans . . . . . 262  
*Bruno Leme, Chiara Piezzo, Masakazu Hirokawa, and Kenji Suzuki*

Influence of Environmental Context on Recognition Rates of Stylized Walking Sequences . . . . . 272  
*Madison Heimerdinger and Amy LaViers*

Creating Lively Behaviors in Social Robots . . . . . 283  
*Inés Jara-Rivera, Álvaro Castro-González, José Carlos Castillo, Fernando Alonso-Martín, Maria Malfaz, and Miguel A. Salichs*

What Went Wrong and Why? Diagnosing Situated Interaction Failures in the Wild. . . . . 293  
*Sean Andrist, Dan Bohus, Ece Kamar, and Eric Horvitz*

Toward 3D Printed Prosthetic Hands that Can Satisfy Psychosocial Needs: Grasping Force Comparisons Between a Prosthetic Hand and Human Hands. . . . . 304  
*Ahmad Yaser Alhaddad, Sami Emad AlKhatib, Rahib Ahmed Khan, Salman Mohammad Ismail, Al-Sendibad Said Shehadeh, Abdellatif Mohammad Sadeq, and John-John Cabibihan*

Integrating a Humanoid Robot into ECHONET-Based Smart Home Environments. . . . . 314  
*Ha-Duong Bui, Cu Pham, Yuto Lim, Yasuo Tan, and Nak Young Chong*

A Robot that Encourages Self-disclosure by Hug . . . . .	324
<i>Masahiro Shiomi, Aya Nakata, Masayuki Kanbara, and Norihiro Hagita</i>	
Hand Gestures and Verbal Acknowledgments Improve Human-Robot Rapport. . . . .	334
<i>Jason R. Wilson, Nah Young Lee, Annie Saechao, Sharon Hershenson, Matthias Scheutz, and Linda Tickle-Degnen</i>	
Do Audio-Visual Stimuli Change Hug Impressions? . . . . .	345
<i>Masahiro Shiomi and Norihiro Hagita</i>	
Impact of Tutoring Strategies in Grounded Lexicon Learning . . . . .	355
<i>Jens Nevens and Michael Spranger</i>	
Yes, of Course? An Investigation on Obedience and Feelings of Shame Towards a Robot . . . . .	365
<i>Isabelle M. Menne</i>	
Dance with Me! Child-Robot Interaction in the Wild. . . . .	375
<i>Gentiane Venture, Bipin Indurkha, and Takamune Izui</i>	
Rethinking the Why of Socially Assistive Robotics Through Design . . . . .	383
<i>Ioana Ocnarescu and Isabelle Cossin</i>	
Role-Oriented Designing: A Methodology to Designing for Appearance and Interaction Ways of Customized Professional Social Robots. . . . .	394
<i>Yang Su and Shuzhi Sam Ge</i>	
Exploring Users' Reactions Towards Tangible Implicit Probes for Measuring Human-Robot Engagement . . . . .	402
<i>Mohammad Obaid, Yuan Gao, Wolmet Barendregt, and Ginevra Castellano</i>	
Gaze-Based Hints During Child-Robot Gameplay . . . . .	413
<i>Eunice Mwangi, Emilia I. Barakova, Marta Diaz, Andreu Català Mallofre, and Matthias Rauterberg</i>	
Gender Difference in Expectations for Domestic Robots: A Survey in Japan. . . . .	423
<i>Tatsuya Nomura and Tsuyoshi Nakazawa</i>	
Motor Actions Prediction and Control for the Nao Robot Playing Hand Clapping Games. . . . .	432
<i>Yang Yi, Jishen Chu, and Ryad Chellali</i>	
The Importance of Mutual Gaze in Human-Robot Interaction . . . . .	443
<i>Kyveli Kompatsiari, Vadim Tikhonoff, Francesca Ciardo, Giorgio Metta, and Agnieszka Wykowska</i>	

About Decisions During Human-Robot Shared Plan Achievement: Who Should Act and How? . . . . .	453
<i>Sandra Devin, Aurélie Clodic, and Rachid Alami</i>	
Improving User's Performance by Motivation: Matching Robot Interaction Strategy with User's Regulatory State . . . . .	464
<i>Arturo Cruz-Maya, Roxana Agrigoroaie, and Adriana Tapus</i>	
Social Group Motion in Robots . . . . .	474
<i>Francesco Zanlungo, Zeynep Yücel, Florent Ferreri, Jani Even, Luis Yoichi Morales Saiki, and Takayuki Kanda</i>	
Shopping Mall Robots – Opportunities and Constraints from the Retailer and Manager Perspective . . . . .	485
<i>Marketta Niemelä, Päivi Heikkilä, Hanna Lammi, and Virpi Oksman</i>	
Dynamic Gesture Recognition for Social Robots . . . . .	495
<i>José Carlos Castillo, David Cáceres-Domínguez, Fernando Alonso-Martín, Álvaro Castro-González, and Miguel Ángel Salichs</i>	
Embodiment, Privacy and Social Robots: May I Remember You? . . . . .	506
<i>Meg Tonkin, Jonathan Vitale, Suman Ojha, Jesse Clark, Sammy Pfeiffer, William Judge, Xun Wang, and Mary-Anne Williams</i>	
A TV Chat Robot with Time-Shifting Function for Daily-Use Communication . . . . .	516
<i>Shogo Nishimura, Hiromichi Kawanami, Masayuki Kanbara, and Norihiro Hagita</i>	
Naturalistic Conversational Gaze Control for Humanoid Robots - A First Step . . . . .	526
<i>Hagen Lehmann, Ingo Keller, Reza Ahmadzadeh, and Frank Broz</i>	
Design and Implementation of a Device Management System for Healthcare Assistive Robots: Sensor Manager System Version 2 . . . . .	536
<i>Sheng Zhang, Ho Seok Ahn, Jong Yoon Lim, Min Ho Lee, and Bruce A. MacDonald</i>	
Dialogue Design for a Robot-Based Face-Mirroring Game to Engage Autistic Children with Emotional Expressions. . . . .	546
<i>Pauline Chevalier, Jamy J. Li, Eloise Ainger, Alyssa M. Alcorn, Snezana Babovic, Vicky Charisi, Suncica Petrovic, Bob R. Schadenberg, Elizabeth Pellicano, and Vanessa Evers</i>	
Look but Don't Stare: Mutual Gaze Interaction in Social Robots. . . . .	556
<i>Yanxia Zhang, Jonas Beskow, and Hedvig Kjellström</i>	

Recognition of Gestural Behaviors Expressed by Humanoid Robotic Platforms for Teaching Affect Recognition to Children with Autism - A Healthy Subjects Pilot Study . . . . .	567
<i>Brittney A. English, Alexis Coates, and Ayanna Howard</i>	
A Visual Environment for Reactive Robot Programming of Macro-level Behaviors . . . . .	577
<i>Floris Erich, Masakazu Hirokawa, and Kenji Suzuki</i>	
Hand in Hand with Robots: Differences Between Experienced and Naive Users in Human-Robot Handover Scenarios . . . . .	587
<i>Sebastian Meyer zu Borgsen, Jasmin Bernotat, and Sven Wachsmuth</i>	
Subjective Stress in Hybrid Collaboration. . . . .	597
<i>Sarah L. Müller, Sebastian Stiehm, Sabina Jeschke, and Anja Richert</i>	
Development of Control Mechanism for Safety Enhancement in Bilateral Control Robot Applications . . . . .	607
<i>R.M. Maheshi Ruwanthika and Seiichiro Katsura</i>	
Understanding Anthropomorphism: Anthropomorphism is not a Reverse Process of Dehumanization. . . . .	618
<i>Jakub Złotowski, Hidenobu Sumioka, Christoph Bartneck, Shuichi Nishio, and Hiroshi Ishiguro</i>	
An Evaluation Tool of the Effect of Robots in Eldercare on the Sense of Safety and Security . . . . .	628
<i>Neziha Akalin, Andrey Kiselev, Annica Kristoffersson, and Amy Loutfi</i>	
Becoming Real: An Anthropological Approach to Evaluating Robots in the Real World. . . . .	638
<i>Louise Veling</i>	
Human Perceptions of the Severity of Domestic Robot Errors. . . . .	647
<i>Alessandra Rossi, Kerstin Dautenhahn, Kheng Lee Koay, and Michael L. Walters</i>	
What Can We Learn from the Long-Term Users of a Social Robot? . . . . .	657
<i>Csaba Kertész and Markku Turunen</i>	
Adaptive Emotional Chatting Behavior to Increase the Sociability of Robots . . . . .	666
<i>Igor Rodriguez, José María Martínez-Otzeta, Elena Lazkano, and Txelo Ruiz</i>	

Measuring Children’s Perceptions of Robots’ Social Competence: Design and Validation . . . . .	676
<i>Vicky Charisi, Daniel P. Davison, Frances M. Wijnen, Dennis Reidsma, and Vanessa Evers</i>	
Rule Extraction Method Considering Reliability for Synchronized Behavior of Group Robots in Multi-party Conversations . . . . .	687
<i>Kazuki Sakai, Yuichiro Yoshikawa, and Hiroshi Ishiguro</i>	
Omnidirectional Traveling Instruction for Behavior Navigation . . . . .	697
<i>Yuuya Suzuki, Naoji Shiroma, Arvin Agah, and Eimei Oyama</i>	
News Application Adaptation Based on User Sensory Profile . . . . .	708
<i>Roxana Agrigoroaie, Stefan Dan Ciocirlan, and Adriana Tapus</i>	
Robot Compliant Behaviour with Mixed-Initiative Interaction in an Obstacle Avoidance Scenario . . . . .	718
<i>Chiara Piezzo, Bruno Leme, Masakazu Hirokawa, and Kenji Suzuki</i>	
“Xylotism”: A Tablet-Based Application to Teach Music to Children with Autism . . . . .	728
<i>Maryam Tavakol Elahi, Amin Habibnejad Korayem, Azadeh Shariati, Ali Meghdari, Minoos Alemi, Ehsan Ahmadi, Alireza Taheri, and Rozita Heidari</i>	
Starting a Conversation by Multi-robot Cooperative Behavior . . . . .	739
<i>Takamasa Iio, Yuichiro Yoshikawa, and Hiroshi Ishiguro</i>	
Adaptive Strategies for Multi-party Interactions with Robots in Public Spaces . . . . .	749
<i>Saida Mussakhoyeva, Nazerke Kalidolda, and Anara Sandygulova</i>	
<b>Author Index . . . . .</b>	<b>759</b>
