Contents

CHAPTER	1	Preliminaries
	1.1	Self-Adjoint Operators
		Fourier Coefficients
		Exercises
	1.2	Curvilinear Coordinates
		Scaling Factors
		Volume Integrals
		The Gradient
		The Laplacian
		Spherical Coordinates
		Other Curvilinear Systems
		Applications
		An Alternate Approach (Optional)
		Exercises
	1.3	Approximate Identities and the Dirac- δ Function
		Approximate Identities
		The Dirac- δ Function in Physics
		Some Calculus for the Dirac- δ Function
		The Dirac- δ Function in Curvilinear Coordinates
		Exercises
	1.4	The Issue of Convergence
		Series of Real Numbers
		Convergence Versus Absolute Convergence
		Series of Functions
		Power Series
		Taylor Series
		Exercises
	1.5	Some Important Integration Formulas
		Other Facts We Shall Use Later
		Another Important Integral
		Exercises
CHAPTER	2	Vector Calculus
	2.1	Vector Integration.
		Path Integrals
		Line Integrals

digitalisiert durch: I**Ø9** Basel Bern

		Parameterized Surfaces78
		Integrals of Scalar Functions Over Surfaces
		Surface Integrals of Vector Functions
		Exercises
	2.2	The Divergence and Curl90
		Divergence
		Cartesian Coordinate Case
		Cylindrical Coordinate Case
		Spherical Coordinate Case
		The Curl101
		The Curl in Cartesian Coordinates101
		The Curl in Cylindrical Coordinates106
		The Curl in Spherical Coordinates112
		Exercises119
	2.3	Green's Theorem, the Divergence Theorem, and Stokes'
		Theorem
		Conservative Fields140
		Exercises146
CHAPTER	3	Green's Functions
	3.1	Introduction
	3.2	Construction of Green's Function Using the Dirac-Delta
		Function
		Exercises161
	3.3	Green's Function Using Variation of Parameters
		Exercises
	3.4	Construction of Green's Function From Eigenfunctions 166
		Exercises
	3.5	More General Boundary Conditions
		Exercises170
	3.6	The Fredholm Alternative (or, What If 0 Is an Eigenvalue?) 171
		Exercises178
	3.7	Green's Function for the Laplacian in Higher Dimensions178
		Exercises184
CHAPTER	14	Fourier Series
	4.1	Introduction
	4.2	Basic Definitions

.

	4.3	Methods of Convergence of Fourier Series	194
		Schwarz Inequality	198
		Exercises	205
	4.4	The Exponential Form of Fourier Series	207
		Exercises	210
	4.5	Fourier Sine and Cosine Series	212
		Exercises	215
	4.6	Double Fourier Series	215
		Exercises	216
CHAPTER	5	Three Important Equations	217
	5.1	Introduction	217
	5.2	Lanlace's Equation	218
	•	Maximum Modulus Principle	
		Exercises	220
	5.3	Derivation of the Heat Equation in One Dimension	220
		Exercises	222
	5.4	Derivation of the Wave Equation in One Dimension	223
		Exercises	226
	5.5	An Explicit Solution of the Wave Equation	226
		Exercises	232
	5.6	Converting Second-Order Partial Differential Equations	
	5.6	Converting Second-Order Partial Differential Equations to Standard Form	232
	5.6	Converting Second-Order Partial Differential Equations to Standard Form Exercises	232
CUADTED	5.6 6	Converting Second-Order Partial Differential Equations to Standard Form Exercises	232 232 236
CHAPTER	5.6 6	Converting Second-Order Partial Differential Equations to Standard Form Exercises	232 232 236 237
CHAPTER	5.6 6 6.1	Converting Second-Order Partial Differential Equations to Standard Form Exercises	232 236 237 237 237
CHAPTER	5.6 6 6.1	Converting Second-Order Partial Differential Equations to Standard Form Exercises	232 236 236 237 238 238
CHAPTER	5.6 6 6.1 6.2	Converting Second-Order Partial Differential Equations to Standard Form	232 232 236 237 237 238 238 238 238
CHAPTER	5.6 6 6.1 6.2	Converting Second-Order Partial Differential Equations to Standard Form	232 232 236 237 237 238 238 240
CHAPTER	5.6 6 6.1 6.2 6.3	Converting Second-Order Partial Differential Equations to Standard Form	232 232 236 237 237 238 238 240 241
CHAPTER	5.6 6 6.1 6.2 6.3	Converting Second-Order Partial Differential Equations to Standard Form	232 232 236 237 237 238 238 240 241 241
CHAPTER	5.6 6 6.1 6.2 6.3	Converting Second-Order Partial Differential Equations to Standard Form	232 232 236 237 238 238 240 241 250 251
CHAPTER	5.6 6.1 6.2 6.3 6.4	Converting Second-Order Partial Differential Equations to Standard Form	232 232 236 237 238 238 238 240 241 250 251
CHAPTER	5.6 6.1 6.2 6.3 6.4 7	Converting Second-Order Partial Differential Equations to Standard Form Exercises Sturm—Liouville Theory Introduction Exercises The Self-Adjoint Property of a Sturm—Liouville Equation Exercises Completeness of Eigenfunctions for Sturm—Liouville Equations Exercises Uniform Convergence of Fourier Series Using Generating Functions to Solve Specialized	232 232 236 237 237 238 238 240 241 250 251

Contents

	7.4	Generating Function for Legendre's Equation	266
		Exercises	270
	7.5	Generator for Bessel Functions of the First Kind	270
		Exercise	273
CHAPTER	8	Separation of Variables in Cartesian	
		Coordinates	275
	8.1	Introduction	275
	8.2	Solving Laplace's Equation on a Rectangle	275
		Exercises	281
	8.3	Laplace's Equation on a Cube	283
		Exercises	286
	8.4	Solving the Wave Equation in One Dimension by	
		Separation of Variables	287
		Exercises	292
	8.5	Solving the Wave Equation in Two Dimensions in Cartesian	1
		Coordinates by Separation of Variables	294
		Exercises	297
	8.6	Solving the Heat Equation in One Dimension Using	
		Separation of Variables	297
		No Heat Source	297
		The Initial Condition Is the Dirac-Delta Function	300
		Exercises	301
	8.7	Steady State of the Heat Equation	303
		Exercises	308
	8.8	Checking the Validity of the Solution	310
CHAPTER	8 9	Solving Partial Differential Equations in	
		Cylindrical Coordinates Using Separation of	
		Variables	315
	9.1	Introduction	315
		An Example Where Bessel Functions Arise	315
		Exercises	320
	9.2	The Solution to Bessel's Equation in Cylindrical	
		Coordinates	320
		Exercises	323
	9.3	Solving Laplace's Equation in Cylindrical Coordinates	
		Using Separation of Variables	323
		Exercises	327

	9.4	The Wave Equation on a Disk (The Drumhead Problem) 328
