

Contents

1	Cooperative Game Theory	1
1.1	Aims and Outline of the Book	2
1.2	Game Forms	5
1.2.1	The Normal Form	7
1.2.2	The Characteristic Function Form	9
1.3	Cooperative Games	12
1.3.1	Basic Properties of Cooperative Games	13
1.3.2	The Standard Basis	14
1.3.3	The Unanimity Basis	15
1.3.4	Essential Games and Imputations	18
1.4	Multilinear Extensions	20
1.5	Problems	25
2	The Core of a Cooperative Game	29
2.1	Basic Properties of the Core	30
2.1.1	Representing the Core of a Three Player Game	31
2.1.2	The Core and Domination	35
2.1.3	Existence of Core Imputations	37
2.2	The Core Based on a Collection of Coalitions	39
2.2.1	Balanced Collections	45
2.2.2	Strongly Balanced Collections	47
2.2.3	Lattices and Hierarchies	48
2.3	Core Covers and Convex Games	51
2.3.1	The Weber Set	51
2.3.2	The Selectope	53
2.4	Appendix: Proofs of the Main Theorems	55
2.5	Problems	68
3	Axiomatic Value Theory	71
3.1	Equivalent Formulations of the Shapley Value	72
3.2	Three Axiomatizations of the Shapley Value	76
3.2.1	Shapley's Axiomatization	77

3.2.2	Young's Axiomatization	80
3.2.3	van den Brink's Axiomatization	82
3.3	The Shapley Value as a Utility Function	83
3.4	The Myerson Value	89
3.5	Appendix: Proofs of the Main Theorems	92
3.6	Problems	101
4	The Cooperative Potential	107
4.1	A Potential Function for Cooperative Games	108
4.2	The Cooperative Potential and the Shapley Value	112
4.3	Consistency and the Reductionist Approach	115
4.4	Beyond the Cooperative Potential	119
4.4.1	Value-Based Potentials	119
4.4.2	Share Functions and Share Potentials	122
4.5	Appendix: Proofs of the Main Theorems	126
4.6	Problems	138
5	Directed Communication Networks	143
5.1	Directed Networks	145
5.2	Measuring Dominance in Directed Networks	147
5.2.1	The Degree Measure	148
5.2.2	The β -Measure	151
5.2.3	Iterated Power Measures	158
5.3	Hierarchical Allocation Rules on Network Games	163
5.3.1	Cooperative Network Situations	164
5.3.2	Network Myerson Values	166
5.3.3	The Hierarchical Payoff Property	168
5.3.4	The α -Hierarchical Value	171
5.4	Appendix: Proofs of the Main Theorems	175
5.5	Problems	186
6	Cooperative Theories of Hierarchical Organizations	189
6.1	Games with a Permission Structure	191
6.1.1	The Conjunctive Approach	194
6.1.2	The Disjunctive Approach	198
6.2	Shapley Permission Values	210
6.2.1	The Conjunctive Permission Value	210
6.2.2	The Disjunctive Permission Value	216
6.3	Modeling Economic Phenomena	219
6.4	Appendix: Proofs of the Main Theorems	222
6.5	Discussion: More About the Disjunctive Restriction	237
6.6	Problems	239
	References	245
