A The experiences of an engineer	10
Episode 1.....	10
Episode 2.....	13
Episode 3.....	15
Episode 4.....	17
Episode 5.....	21
B Practically oriented texts	25
The conversion of cruise liner “Queen Elizabeth 2”	25
Passenger ship ‘Oriana’ at 25 knots	27
Large through simply doubling.....	28
Such is accuracy	29
Keep an eye on the voltage level	29
Fuel cell engine ready for the industry	30
Significant reduction of engine exhausts	32
Increasing demand for cruise vessels	33
Market for well-maintained engines.....	34
IEEE recommendations for engineers	35
Food for thought	37
Spelling it out	38
William Shockley, famous inventor	38
Silicon Valley reveals Tech Museum	39
Engine fuel in Europe and America	40
The electronic weatherman at home.....	41
History for yoo-hoo.....	42
A major engineering achievement: Pioneer 10.....	43
Reinventing the diesel engine.....	45
Worldwatch Institute reports on means of transport.....	46
Slim and willowy	47
Language barrier.....	48
Theatrical air.....	48
Relying on solar energy	48
Novel four-seat aircraft.....	49
Synthetic diamonds for science and engineering	50
Career guidance	51
Novel household-control system	52

Radio telescopes for “interstellar TV”	54
Refuelling hydrogen or fuel cells	55
Engineers are hoping to revive the airship era	57
Amphibious vehicles in unsafe waters	58
Cross-Channel bootlegging	58
A special April 15th for U.S. citizens	59
Saxony – evolving into a high-tech state	60
Towards California’s zero-emissions law	61
Engineering profession in America	61
Boeing’s engineering feat	62
Charles Babbage – a computer pioneer	64
The English language and the Internet secure servers	65
What did you say?	65
Answering the telephone	66
Transmission-line towers, telegraph poles and lighting	66
Corporate discretion	67
Tower of power	68
Geothermal power in Britain	69
Konrad Zuse – pioneer and visionary	69
Work on the Z1 prototype	70
Continuing work during wartime	71
IBM not sure about future	72
Travelling by train in Europe	73
Alitalia flight to Dublin	74
Pleasurable pastime	74
Puritans and convicts	75
The engineers’ common language	75
English in Europe	76
Speeding on Route 120	78
Such is impressive business	79
Solar power all over Europe	80
Heavy currents drive the Queen	81
Why high transmission voltages?	82
C Letter openings	84
D Letter endings	85
E Formulae – how to express in words	87

F	Important abbreviations and units of measurement	88
G	How to pronounce these tricky words	90
H	Modern English for Mechanical Engineers on MP3 CD	93
No.	1. How to avoid misunderstandings when handling specifications . . .	93
No.	2. Bedplate and frames of a marine diesel engine	94
No.	3. Cylinder liner of a marine diesel engine	96
No.	4. Starting a centrifugal pump	97
No.	5. Circuit diagram showing principle of automatic swivelling of deburring device for a milling machine	99
No.	6. Faulty control equipment	100
No.	7. Starting up the motors of an automatic bar machine	102
No.	8. Drilling holes in plastics	103
No.	9. Calling for the machine tool expert	103
No.	10. A powerful hand ratchet	105
No.	11. Throttling case	106
No.	12. Kenneth Benton, a machine tool expert	106
	<i>Episode 1. A new hydraulic fluid for machine tools</i>	106
No.	13. <i>Episode 2. New TM lathe being prepared for tests</i>	109
No.	14. <i>Episode 3. Preparing for a business trip</i>	110
No.	15. <i>Episode 4. Investigations in the Gloucester plant</i>	112
No.	16. <i>Episode 5. Introducing a junior engineer</i>	114
No.	17. <i>Episode 6. A badly needed contract</i>	116
I	Verbs frequently used in drawing up specifications	118
I 1	Verbs as used in engineering specifications English-German	118
I 2	Verbs as used in engineering specifications German-English	132
