

M. Sc. Yingjie Gao, Mülheim a.d.Ruhr

**A near field measurement
system for measuring electric
and magnetic fields in planar
high-frequency circuits**

Reihe **21**: Elektrotechnik

Nr. **244**

Contents

1 Introduction	1
1.1 Electro - optic sampling technique	3
1.2 Scanning force microscope based test system	4
1.3 Microwave circuit electric field imaging systems	5
1.4 Near-field measurement system with passive probes	6
1.4.1 Electric near-field measurement system	6
1.4.2 Magnetic near-field measurement system	8
1.5 Summary of some field mapping systems	11
2 The design and fabrication of miniature near field probes	13
2.1 Electric dipole probe - EPXY	15
2.2 Electric monopole probe - EPZ.....	19
2.3 Magnetic dipole probe - MPXY.....	21
2.4 Magnetic dipole probe - MPZ.....	25
2.5 Probe characterizations	27
2.5.1 Influence of the height above the DUT and input power of the DUT... 27	
2.5.2 Spatial resolution.....	29
3 Measurement system set up.....	33
3.1 Microwave detection system.....	35
3.2 Mechanical system	37
4 Measurements of the field distribution on microstrip circuits.....	40
4.1 Electric field measurements using the field probe EPXY	41
4.1.1 Microstrip band pass filter	41
4.2 Electric field measurements using the field probe EPZ	46
4.2.1 Meander line.....	46

4.2.2 Hybrid 2.4 GHz power amplifier	50
4.2.3 Amplifier for a 2.46 GHz spread spectrum receiver.....	53
4.3 Magnetic field measurements using the field probe MPZ.....	56
4.3.1 Short terminated microstrip line at 20 GHz.....	57
4.3.2 Stub filter at 14 GHz	64
4.4 Magnetic field measurements using the field probe MPXY	67
4.4.1 Short terminated microstrip line at 20 GHz.....	67
5 Antenna diagnostics, measurements of scattering parameters, applications in EMC and investigations of coplanar microwave circuits.....	75
5.1 Microstrip patch antenna diagnostics	75
5.1.1 Rectangular patch antenna for the TM_{01} mode	77
5.1.2 Square patch antenna for the TM_{10} mode	80
5.2 Measurements of scattering parameters.....	83
5.3 Application in Electromagnetic Compatibility (EMC)	87
5.3.1 Microstrip line at 50 MHz.....	87
5.3.2 Microstrip interdigital capacitor	89
5.4 Investigation in coplanar microwave circuits.....	94
5.4.1 Coplanar waveguide transmission line	94
5.4.2 Coplanar T-junctions for mode investigation.....	98
5.4.3 Coplanar band pass filter.....	113
6 Probe calibration and measurement error analysis	116
6.1 Probe calibration	116
6.1.1 Theoretical analysis of the probe	119
6.1.2 Probe calibration	123
6.2 Measurement error analysis	127
6.2.1 Errors inherent in the probes themselves.....	127
6.2.2 Mechanical system error	128
6.2.3 Coupling effect between the probes and the DUT	129
7 Conclusions and future work	133
8 Reference	136
