                   xiii
Introduction
    Exploration vs. Exploitation
    A Justification for Learning to Program?
    Creative Computing and Programming as Inquiry
    Programming Breakthroughs
    Programming Languages Used
    Free Software and No-Cost Software
                                         10
    How to Program and Explore
    Programming as You Go
    Essential Concepts
          Creative Computing and Programming as Inquiry
                                                        17
          Programming Is a Practice and Requires Practice
                                                       17
Installation and Setup
    Text Editor
                 19
    Python
             20
          GNU/Linux
                      22
          Mac OS X and Windows
                                  22
          Checking the Installation
                                  23
    Python Libraries: Pillow/PIL
    Python Libraries: TextBlob
    Processing
                 25
    The Command Line
1
    Modifying a Program 27
         Appropriating a Page
    1.1

viii Contents

	Exerci	ise: Tautonyms 123
	Essen	tial Concepts 123
		Examining and Manipulating Strings 123
		Iterating over Strings, Accepting Strings, Returning Strings 123
7	Text I	I 125
	7.1	Verifying Palindromes by Reversing 125
	7.2	Verifying Palindromes with Iteration and Recursion 128
	7.3	Introducing Regular Expressions 133
		A Simple Python Program with Regular Expressions 138
		Counting Words Again, with Regular Expressions 142
	7.4	Verifying Palindromes—This Time, with Feeling 144
	Exerci	se: Match within Text 145
	Free F	Project: A Poetry vs. Prose Shootout 145
	Essent	tial Concepts 145
		Solving Problems with Recursion and Iteration 145
		Regular Expressions 145
8	Image	e I 147
	8.1	A New Data Type: Tuples 148
	8.2	Generating Very Simple Images 150
	8.3	Pixel-by-Pixel Image Manipulation 155
		Generalizing to Images of Any Size 158
		Loading an Existing Image 160
		Lightening and Darkening an Image 161
		Increasing the Contrast of an Image 164
	8.4	Flipping an Image 165
	Exerci	ise: Flipping along the Other Axis 167
		Project: Cell-by-Cell Generator 167
	Essen	tial Concepts 168
		Using a Library 168
		Image Basics 168
		Two-Dimensional, Nested Iteration 168
		Swapping Values 168
9	Image	e II 169
	9.1	Blurring an Image 169
		Visiting Every Pixel 177

	11.5 Gathering and Preparing Data 231	
	11.6 Probability and Generating Numbers 232	
	Free Project: Reweighting Your Text Generator 235	
	11.7 Correlations and Causality 235	
	11.8 More with Statistics, Visualization, and Processing 2	38
	Free Project: An End-to-End Statistical Exploration 239	
	Essential Concepts 240	
	Programming Fundamentals Span Languages 240	
	Different Averages Have Different Meanings 240	
		240
	Principled Visualization 240	
12	Animation 241	
	12.1 Drawing in Frames 241	
	Exercise: The Bounce Test 244	
	12.2 Changing Intensity 245	
	Exercise: Multiple Rectangles with Color 246	
	Exercise: Fifty Rectangles 246	
	12.3 Exploring Animation Further 247	
	Free Project: A Novel Clock 247	
	Essential Concepts 248	
	Functions as Part of a Framework 248	
	Drawing in Time 248	
13	Sound 249	
	13.1 Bytebeat from Zero 250	
	Sidebar: The Math Joke 251	
	13.2 Exploring Bytebeat, Bit by Bit 252	
	Free Project: Two Bytebeat Songs 255	
	13.3 Further Exploration of Sound 255	
	Essential Concepts 255	
	Bitwise Operations 255	
	Sound as a Stream of Bytes 256	
14	Interaction 257	
	14.1 Typed Input in Python 257	
	Free Project: Word to You 258	
	14.2 Key Presses in Processing 258	
	Free Project: Create a Virtual Navigable Space 260	

## **Essential Concepts 261**

Accepting Input 261
Controlling a Window 261

## 15 Onward 263

Appendix A: Why Program? 267

How People Benefit from Learning to Program 267

Cognitively: Programming Helps Us Think 269

Modeling Humanistic and Artistic Processes Is a Way of Thinking 270

Programming Could Improve Our Thinking Generally 272

Culturally: Programming Gives Insight into Cultural Systems 273

Programming Allows Better Analysis of Cultural Systems 273

Programming Enables the Development of Cultural Systems 274

Socially: Computation Can Help to Build a Better World 275

Programming Is Creative and Fun 277

Appendix B: Contexts for Learning 279

Semester-Long (Fourteen-Week) Course 280

Quarter-Long (Ten-Week) Course 280

One-Day Workshop 281

Individual and Informal Learning 281

A Final Suggestion for Everyone 281

Glossary 283
