<i>Preface</i>	vii
<i>About the Author</i>	ix
1. Introduction	1
1.1 Chapter Outline . . . . .	4
1.2 Related Studies . . . . .	8
1.3 Notation . . . . .	12
<b>Part I Drawdown Measures</b>	<b>15</b>
2. Drawdowns Preceding Drawups in a Finite Time-Horizon	17
2.1 Random Walk Model . . . . .	18
2.2 Brownian Motion with Drift Model . . . . .	24
2.3 One-Dimensional Linear Diffusion Model . . . . .	28
2.3.1 Analytical results . . . . .	29
2.3.2 Example: Brownian motion with drift . . . . .	34
2.4 Applications . . . . .	35
2.5 Concluding Remarks . . . . .	38
2.6 Proof of Lemmas . . . . .	39
3. Drawdowns and the Speed of Market Crashes	41
3.1 Mathematical Formulation and Analytical Results . . . . .	43
3.2 Progressive Enlargement of Filtrations by $g_a$ . . . . .	44
3.3 Proof of the Main Results . . . . .	46

3.4	Applications . . . . .	52
3.4.1	Brownian motion with drift . . . . .	53
3.4.2	The CEV model . . . . .	54
3.5	Concluding Remarks . . . . .	56
3.6	Proof of Lemmas . . . . .	56
4.	Frequency of Drawdowns in a Brownian Motion Model . . . . .	59
4.1	Preliminaries . . . . .	61
4.2	Sequences of Drawdown Times . . . . .	63
4.2.1	Drawdown times with recovery . . . . .	63
4.2.2	Drawdown times without recovery . . . . .	66
4.3	Numerical Results . . . . .	74
4.4	Insurance of Frequent Relative Drawdowns . . . . .	74
4.5	Concluding Remarks . . . . .	78
4.6	Proof of Lemmas . . . . .	79
5.	Occupation Times Related to Drawdowns . . . . .	81
5.1	Definition of Occupation Times . . . . .	83
5.2	Analytical Results . . . . .	84
5.2.1	Occupation time below a level until the first exit time . . . . .	84
5.2.2	Occupation time below a level until the first passage of drawdown . . . . .	85
5.2.3	Occupation time of the drawdown process until the first passage of drawdown . . . . .	86
5.2.4	Occupation time of the drawup process until the first passage of drawdown . . . . .	89
5.2.5	Occupation time of the drawdown process at an independent exponential time . . . . .	90
5.3	Examples . . . . .	91
5.3.1	Brownian motion with drift . . . . .	91
5.3.2	Three-dimensional Bessel process (BES(3)) . . . . .	92
5.4	Applications . . . . .	93
5.4.1	Probabilities regarding drawdowns and defaults . . . . .	93
5.4.2	Option pricing for the drawdown process . . . . .	94
5.5	Concluding Remarks . . . . .	96
5.6	Proof of Lemmas . . . . .	96

6.	Duration of Drawdowns under Lévy Models	99
6.1	Preliminaries . . . . .	101
6.1.1	Spectrally negative Lévy processes and scale functions . . . . .	101
6.1.2	The ascending ladder process of general Lévy processes . . . . .	104
6.2	Magnitude of Drawdowns Revisited . . . . .	106
6.3	Asymptotics of Magnitude of Drawdowns . . . . .	107
6.3.1	Spectrally negative Lévy processes . . . . .	108
6.3.2	A class of Lévy models with two-sided jumps . . . . .	110
6.4	Duration of Drawdowns . . . . .	112
6.4.1	Bounded variation case . . . . .	114
6.4.2	Unbounded variation case . . . . .	118
6.5	Examples . . . . .	122
6.6	Concluding Remarks . . . . .	125
6.7	Proof of Lemmas and the Extended Continuity Theorem . . . . .	125

**Part II Applications of Drawdown 131**

7.	Maximum Drawdown Insurance Using Options	133
7.1	Setup and Replicating Instruments . . . . .	136
7.2	Static Hedging of the $K$ -drawdown Preceding a $K$ -drawup with One-Touch Knockouts . . . . .	139
7.3	Semi-static Hedging of the Maximum Drawdown with One-Touch Knockouts . . . . .	141
7.4	Semi-static Replication with One-Touches . . . . .	143
7.4.1	Hedging the maximum drawdown . . . . .	145
7.4.2	Hedging the $K$ -drawdown preceding a $K$ -drawup . . . . .	146
7.5	Semi-static Replication with Path-Independent Options . . . . .	148
7.5.1	Hedging the maximum drawdown . . . . .	150
7.5.2	Hedging the $K$ -drawdown preceding a $K$ -drawup . . . . .	151
7.6	Static Hedging of the $K$ -relative Drawdown Preceding a $K$ -relative Drawup with One-Touch Knockouts . . . . .	152

7.7	Semi-static Replication with One-Touches in Geometric Models . . . . .	153
7.7.1	Hedging the maximum relative drawdown . . . . .	155
7.7.2	Hedging the $K$ -relative drawdown preceding a $K$ -relative drawup . . . . .	159
7.8	Semi-static Replication with Path-Independent Options in Geometric Models . . . . .	162
7.8.1	Hedging the maximum relative drawdown . . . . .	164
7.8.2	Hedging the $K$ -relative drawdown preceding a $K$ -relative drawup . . . . .	165
7.9	Poisson Jump Processes . . . . .	167
7.9.1	Arithmetic case . . . . .	167
7.9.2	Geometric case . . . . .	169
7.10	Concluding Remarks . . . . .	172
7.11	Proof for GBM . . . . .	172
8.	Fair Premiums of Drawdown Insurances . . . . .	175
8.1	Model for Drawdown Insurance . . . . .	176
8.1.1	Drawdown insurance and fair premium . . . . .	178
8.2	Cancellable Drawdown Insurance . . . . .	180
8.2.1	Contract value decomposition . . . . .	181
8.2.2	Optimal cancellation strategy . . . . .	182
8.3	Incorporating Drawup Contingency . . . . .	187
8.3.1	The finite maturity case . . . . .	187
8.3.2	Perpetual case . . . . .	189
8.4	Drawdown Insurance on a Defaultable Stock . . . . .	191
8.5	Concluding Remarks . . . . .	197
8.6	Proof of Lemmas . . . . .	197
9.	Optimal Trading with a Trailing Stop . . . . .	203
9.1	Model Formulation . . . . .	204
9.1.1	Standing assumption . . . . .	207
9.2	Optimal Trading with a Fixed Stop-Loss . . . . .	208
9.2.1	Optimal liquidation subject to a stop-loss exit . . . . .	209
9.3	Optimal Trading with a Trailing Stop . . . . .	210
9.3.1	Optimal liquidation . . . . .	210
9.3.2	Optimal acquisition with a trailing stop . . . . .	214

9.4	Case Study: Trading with a Trailing Stop under the Exponential OU Model . . . . .	216
9.4.1	Value function and optimal strategy . . . . .	217
9.4.2	Sensitivity analysis . . . . .	220
9.5	Concluding Remarks . . . . .	222
Appendix. Briefly on One-Dimensional Linear Diffusions		225
