<i>Preface</i>	v
1. Introduction to Probability and Statistics	1
1.1 Quantitative Analysis in Economics	1
1.2 Fundamental Axioms of Statistical Analysis in Economics	2
1.3 Role of Statistics in Economics	6
1.4 Limitation of Statistical Analysis in Economics	10
1.5 Conclusion	11
EXERCISE 1	13
2. Foundation of Probability Theory	15
2.1 Random Experiments	15
2.2 Basic Concepts of Probability	17
2.3 Review of Set Theory	18
2.4 Fundamental Probability Laws	23
2.4.1 Interpretation of Probability	25
2.4.2 Basic Probability Laws	28
2.5 Methods of Counting	33
2.5.1 Permutations	34
2.5.2 Combinations	37
2.6 Conditional Probability	43
2.7 Bayes' Theorem	49
2.8 Independence	53
2.9 Conclusion	61
EXERCISE 2	62

3.	Random Variables and Univariate Probability Distributions	67
3.1	Random Variables	67
3.2	Cumulative Distribution Function	73
3.3	Discrete Random Variables	80
3.4	Continuous Random Variables	85
3.5	Functions of a Random Variable	92
3.5.1	The Discrete Case	93
3.5.2	The Continuous Case	94
3.6	Mathematical Expectations	110
3.7	Moments	113
3.8	Quantiles	124
3.9	Moment Generating Function	127
3.10	Characteristic Function	137
3.11	Conclusion	141
	EXERCISE 3	142
4.	Important Probability Distributions	151
4.1	Introduction	151
4.2	Discrete Probability Distributions	152
4.2.1	Bernoulli Distribution	152
4.2.2	Binomial Distribution	153
4.2.3	Negative Binomial Distribution	156
4.2.4	Geometric Distribution	157
4.2.5	Poisson Distribution	158
4.3	Continuous Probability Distributions	165
4.3.1	Uniform Distribution	165
4.3.2	Beta Distribution	167
4.3.3	Normal Distribution	169
4.3.4	Cauchy and Stable Distributions	175
4.3.5	Lognormal Distribution	178
4.3.6	Gamma and Generalized Gamma Distributions	181
4.3.7	Chi-Square Distribution	185
4.3.8	Exponential and Weibull Distributions	186
4.3.9	Double Exponential Distribution	190
4.4	Conclusion	191
	EXERCISE 4	192

5.	Multivariate Probability Distributions	195
5.1	Random Vectors and Joint Probability Distributions . . .	195
5.1.1	The Discrete Case	197
5.1.2	The Continuous Case	201
5.2	Marginal Distributions	207
5.2.1	The Discrete Case	207
5.2.2	The Continuous Case	210
5.3	Conditional Distributions	213
5.3.1	The Discrete Case	213
5.3.2	The Continuous Case	215
5.4	Independence	220
5.5	Bivariate Transformation	229
5.6	Bivariate Normal Distribution	242
5.7	Expectations and Covariance	247
5.8	Joint Moment Generating Function	258
5.9	Implications of Independence on Expectations	259
5.9.1	Independence and Moment Generating Functions	260
5.9.2	Independence and Uncorrelatedness	263
5.10	Conditional Expectations	271
5.11	Conclusion	287
	EXERCISE 5	289
6.	Introduction to Sampling Theory	299
6.1	Population and Random Sample	299
6.2	The Sampling Distribution of the Sample Mean	306
6.3	The Sampling Distribution of the Sample Variance	311
6.4	Student's t -Distribution	320
6.5	Snedecor's F Distribution	330
6.6	Sufficient Statistics	334
6.7	Conclusion	345
	EXERCISE 6	346
7.	Convergences and Limit Theorems	351
7.1	Limits and Orders of Magnitude: A Review	352
7.2	Motivation for Convergence Concepts	355
7.3	Convergence in Quadratic Mean and L_p -Convergence . . .	357
7.4	Convergence in Probability	360
7.5	Almost Sure Convergence	368

7.6	Convergence in Distribution	375
7.7	Central Limit Theorems	382
7.8	Conclusion	395
	EXERCISE 7	397
8.	Parameter Estimation and Evaluation	401
8.1	Population and Distribution Model	401
8.2	Maximum Likelihood Estimation	404
8.3	Asymptotic Properties of MLE	411
8.4	Method of Moments and Generalized Method of Moments	421
	8.4.1 Method of Moments Estimation	421
	8.4.2 Generalized Method of Moments Estimation	425
8.5	Asymptotic Properties of GMM	429
8.6	Mean Squared Error Criterion	433
8.7	Best Unbiased Estimators	437
8.8	Cramer-Rao Lower Bound — An Alternative Method	444
8.9	Conclusion	454
	EXERCISE 8	455
9.	Hypothesis Testing	463
9.1	Introduction to Hypothesis Testing	463
9.2	Neyman-Pearson Lemma	472
9.3	Wald Test	476
9.4	Lagrange Multiplier (LM) Test	480
9.5	Likelihood Ratio Test	483
9.6	Illustrative Examples	487
	9.6.1 Hypothesis Testing under the Bernoulli Distribution	487
	9.6.2 Hypothesis Testing under the Normal Distribution	490
9.7	Conclusion	492
	EXERCISE 9	494
10.	Classical Linear Regression	497
10.1	Classical Linear Regression Model	497
10.2	OLS Estimation	502
10.3	Goodness of Fit and Model Selection Criteria	505
10.4	Consistency and Efficiency of the OLS Estimator	511

10.5	Sampling Distribution of the OLS Estimator	516
10.6	Variance Estimator of the OLS Estimator	518
10.7	Hypothesis Testing	521
10.7.1	Student's t -Test	524
10.7.2	F -Test	528
10.8	Applications and Important Examples	533
10.8.1	Testing for Joint Significance of All Explanatory Variables	533
10.8.2	Testing for Omitted Variables	536
10.8.3	Testing for Linear Restrictions	539
10.9	Generalized Least Squares (GLS) Estimation	540
10.10	Conclusion	547
	EXERCISE 10	548
11.	Conclusion	557
	EXERCISE 11	563
	<i>Bibliography</i>	565
	<i>Index</i>	571
