

CONTENTS

Preface **viii** ■ Study Tips **xi** ■ Acknowledgments **xiii**

PART I

Overview of the Research Process

1

1	Introduction to Research in Physical Activity	3
	The Nature of Research	3
	Unscientific Versus Scientific Methods of Problem Solving	10
	Alternative Models of Research	14
	Types of Research	18
	Overview of the Research Process	22
	Parts of a Thesis: A Reflection on the Steps in the Research Process	22
	Summary	24
2	Developing the Problem and Using the Literature	27
	Identifying the Research Problem	27
	Purpose of the Literature Review	31
	Basic Literature Search Strategies	33
	Steps in the Literature Search	34
	Summary	54
3	Presenting the Problem	57
	Choosing the Title	57
	Writing the Introduction	58
	Stating the Research Problem	60
	Presenting the Research Hypothesis	62
	Operationally Defining Terms	63
	Basic Assumptions, Delimitations, and Limitations	64
	Justifying the Significance of the Study	66
	Differences Between the Thesis and the Research Article	68
	Summary	69
4	Formulating the Method	71
	How to Present Methodological Details	72
	Why Planning the Methods Is Important	72
	Two Principles for Planning Experiments	73
	Describing Participants	73
	Describing Instruments	76
	Describing Procedures	77
	Describing Design and Analysis	79
	Establishing Cause and Effect	80
	Interaction of Participants, Measurements, and Treatments	82
	Summary	82

5	Ethical Issues in Research and Scholarship	83
	Seven Areas of Scientific Dishonesty	83
	Ethical Issues Regarding Copyright	88
	Model for Considering Scientific Misconduct	88
	Working With Faculty	91
	Protecting Human Participants	93
	Protecting Animal Subjects	95
	Summary	96

PART II**Statistical and Measurement
Concepts in Research****101**

6	Becoming Acquainted With Statistical Concepts	103
	Why We Need Statistics	103
	Use of Computers in Statistical Analysis	105
	Description and Inference Are Not Statistical Techniques	105
	Ways to Select a Sample	106
	Justifying Post Hoc Explanations	107
	Difficulty of Random Sampling and Assignment: How Good Does It Have to Be?	108
	Unit of Analysis	108
	Measures of Central Tendency and Variability	109
	Basic Concepts of Statistical Techniques	114
	Data for Use in the Remaining Statistical Chapters	117
	Summary	119
7	Statistical Issues in Research Planning and Evaluation	121
	Probability	121
	Meaningfulness (Effect Size)	124
	Power	124
	Using Information in the Context of the Study	128
	Summary	131
8	Relationships Among Variables	133
	What Correlational Research Investigates	133
	Understanding the Nature of Correlation	134
	What the Coefficient of Correlation Means	140
	Using Correlation for Prediction	143
	Partial Correlation	146
	Semipartial Correlation	147
	Procedures for Multiple Regression	147
	Logistic Regression	150
	Discriminant Function Analysis	150
	Multivariate Forms of Correlation	151
	Summary	153

9	Differences Among Groups	155
	How Statistics Test Differences	155
	Types of <i>t</i> Tests	156
	Interpreting <i>t</i>	162
	Relationship of <i>t</i> and <i>r</i>	165
	Analysis of Variance	166
	Analysis of Covariance	180
	Experimentwise Error Rate	181
	Understanding Multivariate Techniques	181
	Summary	186
10	Nonparametric Techniques	189
	Chi Square: Testing the Observed Versus the Expected	190
	Procedures for Rank-Order Data	195
	Correlation	196
	Differences Among Groups	198
	Summary	201
11	Measuring Research Variables	203
	Validity	203
	Reliability	208
	Methods of Establishing Reliability	211
	Intertester Reliability (Objectivity)	213
	Standard Error of Measurement	214
	Using Standard Scores to Compare Performance	215
	Measuring Movement	216
	Measuring Written Responses	216
	Measuring Affective Behavior	217
	Scales for Measuring Affective Behavior	218
	Measuring Knowledge	221
	Item Response Theory	222
	Summary	223

PART III**Types of Research****225**

12	Sociohistorical Process in Sport Studies	227
	Development of the Discipline	228
	Theory and Sport History	229
	Relationship Between Theory and Method	230
	Research Sources	235
	Research Topics	235
	Research Design	237
	Data Analysis and Interpretation	238
	Research Findings	241
	Exemplary Studies in Sport History	241
	Summary	242

13	Philosophical Research in Physical Activity	245
	Identifying the Purposes of Philosophical Research	247
	Identifying the Range of Philosophical Research	249
	Locating a Research Problem	254
	Analyzing a Research Problem	255
	Summary	262
14	Research Synthesis (Meta-Analysis)	265
	Using Meta-Analysis to Synthesize Research	266
	Presenting Effect Size Data	275
	Summary	275
15	Surveys	285
	Questionnaires	285
	Electronic Surveys	296
	Delphi Method	298
	Personal Interviews	298
	Normative Surveys	301
	Summary	302
16	Other Descriptive Research Methods	305
	Developmental Research	305
	Case Studies	309
	Job Analysis	311
	Observational Research	312
	Unobtrusive Research Techniques	316
	Correlational Research	317
	Summary	318
17	Physical Activity Epidemiology Research	321
	Observational Versus Experimental Research	324
	What Is Epidemiology?	324
	Physical Activity Measurement Definitions	326
	Assessment of Physical Activity	327
	Epidemiological Study Designs	330
	Reading and Interpreting a Physical Activity Epidemiological Study	340
	Summary	342
18	Experimental and Quasi-Experimental Research	345
	Sources of Invalidity	346
	Threats to Internal Validity	348
	Threats to External Validity	351
	Controlling Threats to Internal Validity	352
	Controlling Threats to External Validity	354
	Types of Designs	355
	Summary	369

19	Qualitative Research	371
	Procedures in Qualitative Research	372
	Data Analysis	378
	Concluding Remarks	387
	Summary	388
20	Mixed-Methods Research	391
	Combining Quantitative and Qualitative Methods	392
	Designing Mixed-Methods Research	393
	Issues in Mixed-Methods Research	393
	Examples of Mixed-Methods Research	395
	Summary	395

PART IV**Writing the Research Report****397**

21	Completing the Research Process	399
	Research Proposal	399
	Thesis and Dissertation Proposal	399
	Advisor and Dissertation Committee	400
	The Good Scholar Must Research and Write	400
	Scientific Writing	400
	First Things Are Sometimes Best Done Last	401
	Developing a Good Introduction	402
	Describing the Methods	403
	The Proposal Process	404
	Preparing and Presenting Qualitative Research Proposals	408
	Writing Proposals for Granting Agencies	409
	Submitting Internal Proposals	410
	Completing Your Thesis or Dissertation	410
	Results and Discussion	410
	Handling Multiple Experiments in a Single Report	415
	Using Tables and Figures	415
	Summary	423
22	Ways of Reporting Research	425
	Basic Writing Guidelines	425
	A Brief Word About Acknowledgments	426
	Thesis and Dissertation Format: Traditional Versus Journal	426
	Helpful Hints for Successful Journal Writing	434
	Revising Research Papers	436
	Writing Abstracts	439
	Making Oral and Poster Presentations	441
	Summary	444

Appendix: Statistical Tables **445**References **459** ■ Author Index **469**Subject Index **473** ■ About the Authors **481**
