

# Contents

Preface	vii
Frequently Used Symbols and Notation	xxi
List of Figures and Tables	xxv
<b>CHAPTER 1</b>	
Linear Regression and Classical Path Analysis	1
Overview and Key Points	1
Linear Ordinary Least Squares Regression	3
Simple Linear Regression	3
Multiple Linear Regression	13
Classical Path Analysis	22
Path Diagrams and Structural Equations	22
The Decomposition of Covariances and the Direct, Indirect, and Total Structural Effects	32
Identification	47
Summary	56
Exercises	59
Recommended Readings	61
<b>CHAPTER 2</b>	
Confirmatory Factor Analysis	62
Overview and Key Points	62
Specification and Identification of a CFA Model	64
Model Specification	64
The Unrestricted Versus Model-Implied Variance/Covariance Matrix	69
Identification	72
Data-Model Fit	80
Overall Measures of Fit	81
Model Modification	93

Validity and Reliability from a CFA Perspective	110
Validity	110
Reliability	112
<i>The Hutchins Behavior Inventory: An Example</i>	113
Summary	124
Exercises	125
Recommended Readings	127
CHAPTER 3	
General Structural Equation Modeling	129
Overview and Key Points	129
Specification and Identification of a General Structural Equation Model	131
Model Specification	131
Identification	139
The Direct, Indirect, and Total Structural Effect Components	141
Parameter Estimation	151
The Model-Implied Variance/Covariance Matrix	151
Iterative Methods	152
The Structural Equation Modeling Process: An Illustrated Review and Summary	159
Model Specification and Identification	159
Estimation, Data Fit, and Modification	163
Conclusion	175
Exercises	177
Recommended Readings	178
APPENDIX A	
The Simplis Command Language	179
Overview and Key Points	179
APPENDIX B	
Location, Dispersion, and Association	197
Overview and Key Points	197
Statistical Expectation	198
A Measure of a Distribution's Location	198
A Measure of a Distribution's Dispersion	198
A Measure of Association Between Two Variables	199
Statistical Standardization	201
Standardized Variables	201
A Standardized Measure of Association Between Two Variables	202
Recommended Readings	202
APPENDIX C	
Matrix Algebra	203
Overview and Key Points	203
Some Basic Definitions	203

Contents	xix
Algebra with Matrices	204
The Variance/Covariance Matrix	206
Recommended Readings	207
APPENDIX D	
Descriptive Statistics for the SES Analysis	209
APPENDIX E	
Descriptive Statistics for the <i>HBI</i> Analysis	213
References	216
Index	223
