

# Contents

**Preface**    xi

**I**    **Introduction**    **1**

1    Basic Concepts    3

    From Concept to Operation    5

*Hypothesis Generation*    6

*Operationalization*    8

    The Role of Theory in Social Inquiry    14

*Theory Testing as a Process*    14

    The Conduct of Research    17

2	Fitting Research Design to Research Purpose	19
	Causation	20
	<i>Phasing of Research</i>	21
	<i>Forms of Validity</i>	23
	The Role of Statistics or Statistical Validity	23
	<i>Field versus Laboratory Research</i>	24
	<i>Basic and Applied Research</i>	26
	Basic Issues of Internal Validity	27
	Random Assignment and Experimental Control	30
	<i>Subject Loss</i>	33
	<i>Other Sources of Invalidity</i>	34
	Basic Issues of External Validity	36
	<i>Validity of Operationalizations</i>	36
	<i>Generalizability</i>	38
3	Measuring Concepts: Reliability and Validity	40
	Reliability	40
	<i>Assessing Reliability</i>	43
	Validity	48
	<i>Predictive Validity</i>	49
	<i>Content Validity</i>	50
	<i>Construct Validity</i>	51
	Convergent and Discriminant Validity: The Multitrait-Multimethod Matrix	52
	<i>Threats to Measurement Validity</i>	54
	<i>Conclusion</i>	57

<b>II</b>	<b>Research Design Strategies</b>	<b>59</b>
4	Designing and Constructing Experiments	61
	Variations in Experimental Design	61
	<i>Expansion of Experimental Treatments</i>	65
	<i>Factorial Designs</i>	65
	<i>Interaction Effects</i>	68
	<i>Common Forms of Interaction Effects</i>	69
	<i>Repeated Measures and Counterbalancing</i>	70
	Constructing Experimental Manipulations	73
	<i>Environmental Manipulations</i>	75
	<i>Social Manipulations</i>	76
	<i>Instructional Manipulations</i>	77
	<i>Enhancing Experimental Realism</i>	78
5	Improving the Validity and Generalizability of Laboratory Experiments	80
	Generalizability Across Subjects	82
	<i>Restriction of Subject Populations</i>	82
	<i>Subject Awareness</i>	83
	<i>Subject Roles</i>	87
	<i>The Receptive Subject</i>	88
	Experimenter Expectancy and Bias	89
	Solutions to the Problems of Expectancy Bias	92
6	Simulations and Analogue Experiments	95
	Simulation Research	96
	<i>Active Role-Playing</i>	98
	<i>International Relations Simulation</i>	99
	<i>Economic System Simulation</i>	101
	<i>Bargaining Games</i>	102

	Analogue Experiments	106
	<i>Analogues of Individual Processes</i>	107
	<i>Analogues of Collective Decisions</i>	108
	<i>Analogues of Intergroup Relations</i>	110
7	Combining Field and Laboratory Experiments	112
	Research Settings and Issues of Validity	113
	<i>Selection of Subjects</i>	114
	<i>Control Over the Independent Variable</i>	114
	<i>Random Assignment in Field Settings</i>	116
	<i>Assessing Dependent Variables in Field Settings</i>	118
	<i>Field Experimentation and Application</i>	121
	Combining Results: Meta-Analysis	122
	<i>Other Review Techniques</i>	126
	<i>Conducting the Literature Search</i>	127
8	Correlational Design and Causal Analysis	130
	Types of Correlation	132
	<i>Linear Correlation and Regression</i>	133
	<i>Interpreting Null Results</i>	137
	<i>Multiple Correlation and Regression</i>	139
	Uses and Misuses of Correlational Analysis	140
	<i>Prediction versus Hypothesis Testing</i>	143
	Causal Models	144
9	Quasi-Experiments and Evaluation Research	152
	Evaluation Research	153
	<i>Special Characteristics of Evaluation Research</i>	155
	Quasi-Experimental Research Design	157

	<i>Regression Artifacts and Assessment of Change</i>	157
	<i>Regression and Matching: Comparison Group Designs</i>	163
	<i>Time Series Designs as Quasi-Experiments</i>	169
	<i>Time Series and Use of Archival Data</i>	173
	<i>Comparison Time-Series Designs</i>	174
	<i>Regression-Discontinuity Design</i>	175
10	Survey Design and Sampling	178
	Assignment versus Selection	179
	Sampling Models	182
	<i>The Simple Random Sample</i>	183
	<i>Systematic Sampling</i>	184
	<i>Stratification and Stratified Samples</i>	185
	<i>Other Sampling Formats</i>	189
	Additional Considerations	193
	<i>Sampling Frame</i>	193
	<i>Random Digit Dialing</i>	194
	<i>Sample Size</i>	195
	<i>Nonresponse</i>	198
<b>III</b>	<b>Methods of Assessment</b>	<b>201</b>
11	Systematic Observational Methods and Naturalistic Research	203
	Three Aspects of Naturalism	204
	<i>Natural Behavior</i>	204
	<i>Natural Treatment</i>	205
	<i>Natural Setting</i>	207
	Observer Involvement in the Setting: The Participant-Nonparticipant Distinction	208
	<i>Gaining Entry:</i>	209
	<i>Going Native</i>	210

*Restricted Participation Techniques* 211  
*Participant Observation: When and Why* 214

Coding Observations 215

*Nonstructured Approaches* 217  
*Structured Methods: Category Systems and Rating Scales* 218  
*Category System Construction* 220  
*Concluding Remarks* 227

12 Interviewing 229

Developing the Interview 231

Question/Interview Content 233

*Socio-demographic Information* 233

*Reconstruction* 234

*Attitudes and Behavioral Intentions* 235

*Private Beliefs and Actions* 237

Interview Structure 238

*The Exploratory Interview* 239

*The Structured-Nonscheduled Interview* 239

*The Structured-Scheduled Interview* 241

Question Administration: Conducting the Interview 245

*Obtaining Entry* 246

*After Entry* 248

*Interviewer Characteristics: Establishing Rapport* 250

*Informal Tactics* 250

13 Coding and Content Analysis 257

Preliminary Considerations 259

*Unit* 259

*Sampling* 262

	<i>Category Systems</i>	265	
	<i>The General Research Paradigm</i>	266	
	Representative Examples	269	
	<i>Who Said It</i>	269	
	<i>What Was Said</i>	270	
	<i>To Whom Was It Said</i>	273	
	<i>How Are the Facts Presented</i>	273	
	<i>What Effect</i>	275	
14	Scale Construction	278	
	Varieties of Scaling Procedures	279	
	Scaling Stimuli	280	
	<i>The Method of Pair Comparison</i>	281	
	<i>The Method of Rank Order</i>	284	
	Scaling Individuals	285	
	<i>Multidimensional Scaling Models</i>	296	
	<i>Indirect Approaches</i>	299	
15	Methods for Measuring Dyads and Groups	301	
	Measuring Reciprocity or Mutuality	303	
	Round Robin Designs	305	
	Measuring Interpersonal Accuracy	307	
	<i>Partitioning Judgments</i>	308	
	<i>Partitioning Criterion Scores and Defining Accuracy</i>	311	
	<i>Assessing Assumed Similarity</i>	314	
	Sociometric Analysis	314	
	Designs to Study Groups and the Problem of Unit of Analysis	317	
	Conclusion	320	

<b>IV</b>	<b>Concluding Perspectives</b>	<b>321</b>
16	Social Responsibility and Ethics in Social Research	323
	Ethics of Research Design and Methodology	323
	<i>Deception in the Laboratory</i>	324
	<i>Internal Reviews</i>	329
	<i>Disguised Field Experiments</i>	330
	<i>Data Banks</i>	332
	<i>Research and Ethical Codes</i>	333
	Ethical Issues Related to the Products of Scientific Research	334
	Scientific and Social Responsibilities of the Methodologist	336
	<i>The Methodologist as Critic</i>	336
	<i>The Methodologist and Social Relevance</i>	338
	References	340
