CONTRIBUTORS	xiii
PREFACE	xv

Chapter 1

Sample Surveys: History, Current Practice, and Future Prospects

Peter H. Rossi, James D. Wright, and Andy B. Anderson

1.1. Introduction	1
1.2. A Short History of Sample Surveys	2
1.3. Survey Research in the 1980s	9
1.4. Current Developments and Issues in Survey Research	15
1.5. The Handbook of Survey Research	18
References	19

Chapter 2

Sampling Theory

Martin Frankel

2.1. Introduction	21
2.2. Stratified Sampling	37
2.3. Cluster Sampling	47
2.4. Advanced Topics	57
2.5. Further Reading and Other Topics	65
Bibliography	66

Chapter 3

Measurement

George W. Bohrnstedt

3.1. Measurement	70
3.2. Platonic and Classical True Scores	70

3.3. Reliability and Validity Defined	73
3.4. The Effect of Unreliability on Statistical Estimates	74
3.5. Reliability as a Function of the Number of Independent Measures	77
3.6. Types of Reliability	79
3.7. Factor Analysis and Internal Consistency	89
3.8. Validity	97
3.9. Conclusion	114
References	115

Chapter 4

Management of Survey Organizations

Kenneth Prewitt

4.1. Introduction	123
4.2. The Goals of a Survey Research Organization	125
4.3. The Management Issue	133
4.4. A Personal Postscript	143
References	144

Chapter 5

Applied Sampling

Seymour Sudman

5.1. Introduction	145
5.2. How Good Does the Sample Need to Be?	146
5.3. Inappropriate Sample Designs	149
5.4. The Use of Biased Samples for Screening	150
5.5. Defining the Population	150
5.6. Problems with Overdefining the Population	152
5.7. Operational Definitions of the Population	153
5.8. Small-Scale Sampling with Limited Resources	153
5.9. A Credibility Scale	154
5.10. Examples	158
5.11. Simple Random Sampling	163
5.12. Random Numbers	164
5.13. Systematic Sampling	166
5.14. Are Systematic Samples Simple Random Samples?	169
5.15. The Uses and Limitations of Lists	170
5.16. Blanks and Ineligibles on Lists	172
5.17. Duplications	173
5.18. Omissions from Lists	175
5.19. The Use of Telephone Directories and Random Digit Dialing	177
5.20. Screening for Special Populations	179
5.21. How Big Should the Sample Be?	180
5.22. Current Sample Sizes Used	180
5.23. The Reasons for Stratified Sampling	182
5.24. Appropriate and Inappropriate Uses of Stratification	182
5.25. The Strata Are of Primary Interest	185
5.26. Variances Differ between Strata	186

5.27. Costs Differ by Strata	190
5.28. Additional Reading	191
References	192

Chapter 6

Questionnaire Construction and Item Writing

Paul B. Sheatsley

6.1. Introduction	195
6.2. Standardized Questionnaires	196
6.3. Mode of Administration	198
6.4. Type of Sample to Be Interviewed	199
6.5. Qualities of a Good Questionnaire	200
6.6. Deciding on Content	202
6.7. Writing the Questions	205
6.8. Question Order and Format	219
6.9. Pretesting	225
6.10. Back to the Drawing Board	227
6.11. Data-Base Considerations	228
6.12. Other Types of Instruments and Materials	229
6.13. Summary	230
References	230

Chapter 7

Measurement: Theory and Techniques

Andy B. Anderson, Alexander Basilevsky, and Derek P. J. Hum

7.1. Introduction	231
7.2. Measurement Theory	236
7.3. Scaling Techniques	246
7.4. Concluding Remarks	281
Bibliography	281

Chapter 8

Response Effects

Norman M. Bradburn

8.1. Introduction	289
8.2. Model for Conceptualizing Factors That Affect Responses	291
8.3. Empirical Studies of Response Effects	293
8.4. Conclusions	318
References	318

Chapter 9

Data Collection: Planning and Management

Eve Weinberg

9.1. Objectives of the Survey Interview	329
9.2. Tasks to Accomplish the Objectives	330

9.3. Summary	357
References	357

Chapter 10

Mail and Other Self-Administered Questionnaires

Don A. Dillman

10.1. Introduction	359
10.2. The Total Design Method	360
10.3. Limitations of Mail Surveys	368
10.4. Costs	370
10.5. Other Self-Administered Questionnaires	373
10.6. Conclusion	376
References	376

Chapter 11

Computers in Survey Research

Nancy Karweit and Edmund D. Meyers, Jr.

11.1. Introduction	379
11.2. Instrument Design	379
11.3. Sampling	382
11.4. Field Monitoring	384
11.5. Coding and Editing	386
11.6. Data Capture	387
11.7. Data Cleaning	392
11.8. Scale-Index Construction	397
11.9. Data Base Organization	398
11.10. Data Retrieval	404
11.11. Statistical Analysis	408
11.12. Documentation	409
11.13. Report Writing	411
11.14. Concluding Remarks	412
References	413

Chapter 12

Missing Data

Andy B. Anderson, Alexander Basilevsky, and Derek P. J. Hum

12.1. Introduction	415
12.2. The Analysis of Experimental Design Models Using Incomplete Data	420
12.3. Missing Data in Survey Samples	434
12.4. Regression Analysis with Incomplete Observations	449
12.5. Other Multivariate Models	469
12.6. Summary	479
References	481

Chapter 13

**Applications of the General Linear Model
to Survey Data**

Richard A. Berk

13.1. Introduction	495
13.2. The Two-Variable Regression Model	496
13.3. The Multivariate Model	522
13.4. Some Common Problems with the Multivariate Model	534
13.5. Some Concluding Observations	542
References	543

Chapter 14

Analyzing Qualitative Data

D. Garth Taylor

14.1. Introduction	547
14.2. Modeling the Distribution of Cases in a Contingency Table	549
14.3. Latent Structure Analysis	564
14.4. Linear Models for Qualitative Data	574
14.5. Conclusion	601
References	606

Chapter 15

Causal Modeling and Survey Research

Ross M. Stolzenberg and Kenneth C. Land

15.1. Introduction	613
15.2. Some Basic Principles of Nonexperimental Causal Inference	615
15.3. Some Types of Recursive Causal Models and Their Representation	631
15.4. Some Uses of Nonrecursive Causal Models	658
15.5. Conclusion	671
References	672

Chapter 16

**Surveys as Social Indicators:
Problems in Monitoring Trends**

Elizabeth Martin

16.1. Introduction	677
16.2. Two Puzzles: Assessing Trends in Criminal Victimization and Confidence in American Institutions	679
16.3. Sources of Survey Noncomparability	681
16.4. Conclusions and Recommendations	729
References	737
