

CONTENTS

Series Editor's Introduction 5

1. Introduction 7

- What This Monograph Is About 7
- How This Monograph Is Organized 8
- What Is Bias? 10
- Assumptions and Terms 12
- Strategies Preview 14
- Quick but Incomplete Methods 16
- New Territory 18

2. Analysis of Variance 20

- The Theory 23
- Post Hoc Procedures 25
- Problems and Limitations 26
- Research Examples 27

3. Transformed Item Difficulties 28

- Advantages 29
- Tested Hypothesis 29
- The Procedures 30
- Transforming the Scale 32
- Major Axis and Distance Points 33
- How Far Is Far? 35
- Difficulties with TID 35
- Variations of TID 36

4. Chi Square 38

- Establishing Ability Levels 41
- Notation 42
- The Methods 44

5. Item Characteristic Curve 54

- Item Response Theory 54
- Assumptions of IRT 56
- The Three-Parameter Model 60
- Estimation of the Parameters 61
- Equating the Scales 65
- Comparing the Curves 67
- What Researchers Think of ICC 68

6. Distractor Response Analysis 69

The Procedures 70

Significance Tests 73

Post Hoc Procedures 74

7. Summary 76
