CONTENTS

Preface xiii

Prologue: The Exponential Function 1

Chapter 1 Abstract Integration 5

Set-theoretic notations and terminology 6
The concept of measurability 8
Simple functions 15
Elementary properties of measures 16
Arithmetic in $[0, \infty]$ 18
Integration of positive functions 19
Integration of complex functions 24
The role played by sets of measure zero 27
Exercises 31

Chapter 2 Positive Borel Measures 33

Vector spaces 33
Topological preliminaries 35
The Riesz representation theorem 40
Regularity properties of Borel measures 47
Lebesgue measure 49
Continuity properties of measurable functions 55
Exercises 57

Chapter 3 L^p-Spaces 61

Convex functions and inequalities 61
The L^p-spaces 65
Approximation by continuous functions 69
Exercises 71

Chapter 4 Elementary Hilbert Space Theory 76

Inner products and linear functionals 76
Orthonormal sets 82
Trigonometric series 88
Exercises 92

Chapter 5 Examples of Banach Space Techniques 95

Banach spaces 95
Consequences of Baire's theorem 97
Fourier series of continuous functions 100
Fourier coefficients of L^1-functions 103
The Hahn-Banach theorem 104
An abstract approach to the Poisson integral 108
Exercises 112

Chapter 6 Complex Measures 116

Total variation 116
Absolute continuity 120
Consequences of the Radon-Nikodym theorem 124
Bounded linear functionals on L^p 126
The Riesz representation theorem 129
Exercises 132

Chapter 7 Differentiation 135

Derivatives of measures 135
The fundamental theorem of Calculus 144
Differentiable transformations 150
Exercises 156

Chapter 8 Integration on Product Spaces 160

Measurability on cartesian products 160
Product measures 163
The Fubini theorem 164
Completion of product measures 167
Convolutions 170
Distribution functions 172
Exercises 174

Chapter 9 Fourier Transforms 178

Formal properties 178
The inversion theorem 180
The Plancherel theorem 185
The Banach algebra L^1 190
Exercises 193

Chapter 10 Elementary Properties of Holomorphic Functions 196

Complex differentiation 196
Integration over paths 200
The local Cauchy theorem 204
The power series representation 208
The open mapping theorem 214
The global Cauchy theorem 217
The calculus of residues 224
Exercises 227

Chapter 11 Harmonic Functions 231

The Cauchy-Riemann equations 231
The Poisson integral 233
The mean value property 237
Boundary behavior of Poisson integrals 239
Representation theorems 245
Exercises 249

Chapter 12 The Maximum Modulus Principle 253

Introduction 253
The Schwarz lemma 254
The Phragmen-Lindelöf method 256
An interpolation theorem 260
A converse of the maximum modulus theorem 262
Exercises 264

Chapter 13 Approximation by Rational Functions 266

Preparation 266
Runge's theorem 270
The Mittag-Leffler theorem 273
Simply connected regions 274
Exercises 276

Chapter 14 Conformal Mapping 278

Preservation of angles 278
Linear fractional transformations 279
Normal families 281
The Riemann mapping theorem 282
The class $\mathscr{S}$ 285
Continuity at the boundary 289
Conformal mapping of an annulus 291
Exercises 293

Chapter 15 Zeros of Holomorphic Functions 298

Infinite products 298
The Weierstrass factorization theorem 301
An interpolation problem 304
Jensen's formula 307
Blaschke products 310
The Müntz-Szasz theorem 312
Exercises 315

Chapter 16 Analytic Continuation 319

Regular points and singular points 319
Continuation along curves 323
The monodromy theorem 326
Construction of a modular function 328
The Picard theorem 331
Exercises 332

Chapter 17 H^p-Spaces 335

Subharmonic functions 335
The spaces H^p and N 337
The theorem of F. and M. Riesz 341
Factorization theorems 342
The shift operator 346
Conjugate functions 350
Exercises 352

Chapter 18 Elementary Theory of Banach Algebras 356

Introduction 356
The invertible elements 357
Ideals and homomorphisms 362
Applications 365
Exercises 369

Chapter 19 Holomorphic Fourier Transforms 371

Introduction 371
Two theorems of Paley and Wiener 372
Quasi-analytic classes 377
The Denjoy-Carleman theorem 380
Exercises 383

Chapter 20 Uniform Approximation by Polynomials 386

Introduction 386
Some lemmas 387
Mergelyan's theorem 390
Exercises 394

Appendix: Hausdorff's Maximality Theorem 395

Notes and Comments 397

Bibliography 405

List of Special Symbols 407

Index 409
