
Inorganic Reactions and Methods

Volume 8

For Formation of Bonds to
N, P, As, Sb, Bi (Part 2)

Founding Editor

J.J. Zuckerman

Editor

Arlan D. Norman

Contents of Volume 8

How to Use This Book	xv
Preface to the Series	xxi
Editorial Consultants to the Series	xxv
Contributors to Volume 8	xxvii

4.6. Formation of Bonds Between Elements of Group-VB (N, P, As, Sb, Bi) and Group-IA (Li, Na, K, Rb, Cs, Fr) or Group-IIA (Be, Mg, Ca, Sr, Ba, Ra) 1

4.6.1.	Introduction	1
4.6.2.	From the Elements	1
4.6.3.	In Amines	3
4.6.4.	In Nitrides and Amides	3
4.6.4.1.	From Ammonia and Amines	3
4.6.4.2.	From Molecular Nitrogen	7
4.6.4.3.	From Other Nitrogen Compounds	7
4.6.5.	In Phosphides	8
4.6.6.	In Arsenides	9
4.6.7.	In Antimonides	9
4.6.8.	In Bismuthides	10

4.7. Formation of Bonds Between the Elements of Group-VB (N, P, As, Sb, Bi) and Group-IB (Cu, Ag, Au) or Group-IIB (Zn, Cd, Hg) 11

4.7.1.	Introduction	11
4.7.2.	Formation of the Nitrogen—Group-IB or -IIB Element Bond	11
4.7.2.1.	From Ammonia and Hydrazine	13
4.7.2.1.1.	To Form Ammines.	13
4.7.2.1.2.	To Form Amido Complexes.	17
4.7.2.1.3.	To Form Hydrazine and Hydrazine and Hydrazido Complexes.	17
4.7.2.2.	From Primary, Secondary and Tertiary Amines	18

4.7.2.2.1.	To Form Amine Complexes.	18
4.7.2.2.2.	To Form Amido Complexes.	19
4.7.2.3.	From Diamines, Triamines, and Polyamines	21
4.7.2.3.1.	From Diamines.	21
4.7.2.3.2.	Triamines, Tetramines, Polyamines.	25
4.7.2.4.	From Pyridines and Other Aromatic Amines	27
4.7.2.4.1.	From Pyridines.	27
4.7.2.4.2.	From Imidazole Complexes.	30
4.7.2.4.3.	From Pyrazole Complexes.	34
4.7.2.5.	From Bipyridyl, Phenanthroline and Related Polyimines	36
4.7.2.5.1.	From Bipyridyl and Phenanthroline.	36
4.7.2.5.2.	From Terpyridyl and Naphthyridine.	38
4.7.2.6.	From Nitriles, Oximes and Imines	39
4.7.2.6.1.	From Nitriles.	39
4.7.2.6.2.	From Oximes.	40
4.7.2.6.3.	From Imines.	41
4.7.2.7.	From Oxides of Nitrogen	43
4.7.2.8.	From Corrins, Porphyrins and Other Related Macrocyclic Nitrogen Donor Ligands	44
4.7.2.8.1.	By Substitution Reactions with Complexes of the Metals.	44
4.7.2.8.2.	By Template Reactions.	46
4.7.2.9.	From Inorganic Nitrogen-Containing Anions (N_3^- , $[\text{NCO}]^-$, $[\text{NCS}]^-$, $[\text{NCSe}]^-$, $[\text{NO}_2]^-$, $[\text{CN}]^-$, etc.)	47
4.7.2.9.1.	In Homogeneous Monodentately Ligated Mononuclear Complexes.	47
4.7.2.9.2.	In Bridged Polynuclear Complexes.	49
4.7.2.9.3.	In Mixed-Ligand Complexes.	50
4.7.2.10.	From Organic Nitrogen Anions by Ligand Substitution Reactions with Complexes of the Metals	51
4.7.2.11.	From Metal Atom and Related Reactions	54
4.7.3.	Formation of the Phosphorus—Group-IB, or -IIB Element Bond	55
4.7.3.1.	From the Elements	55
4.7.3.2.	From Trialkyl and Triarylphosphines	57
4.7.3.2.1.	By Reaction with Metal Halides.	57
4.7.3.2.2.	By Reaction with Aquo Complexes of the Metals.	59
4.7.3.2.3.	By Reaction with Other Complexes of the Metals.	60

4.7.3.3.	From Other Organophosphorus(III) Compounds by Substitution Reactions with Complexes of the Metals	61
4.7.3.4.	From Bi- and Polydentate Phosphorus Ligands by Reactions with Complexes of the Metals	63
4.7.3.5.	From Organophosphorus Anions and Their Metallo Derivatives with Halides of the Metals	65
4.7.3.6.	From Metal Atom and Related Reactions	66
4.7.4.	Formation of the Arsenic—, Antimony— and Bismuth—Group-IB or Group-IIB Metal Bond	67
4.7.4.1.	From the Reaction of Monodentate Arsines, Stibines and Bismuthines with Compounds	67
4.7.4.2.	From the Reaction of Bi- and Polydentate Arsines, Stibines and Bismuthines with Compounds	68
4.7.4.3.	From Metal Atom and Related Reactions	69

4.8. Formation of Bonds Between the Elements of Group-VB (N, P, As, Sb, Bi) and the Transition- and Inner-Transition Metals 70

4.8.1.	Introduction	70
4.8.2.	The Formation of the Nitrogen—Transition and Inner-Transition-Metal Bond	70
4.8.2.1.	From the Elements	70
4.8.2.1.1.	The Nitrides of the Transition Metals.	70
4.8.2.1.2.	The Rare Earth and Group-IIIA Nitrides.	74
4.8.2.1.3.	From Metal Atom and Related Reactions.	78
4.8.2.2.	Formation of Complexes of Ammonia and Amines	79
4.8.2.2.1.	To Form Adducts.	80
4.8.2.2.2.	To Form Classical Coordination Complexes of the Later d-Block Metals.	80
4.8.2.3.	Complexes of N-Heterocyclic Ligands	83
4.8.2.3.1.	Pyridine.	83
4.8.2.3.2.	Bipyridyl, Terpyridyl, Phenanthroline.	83
4.8.2.3.3.	Other N-Heteroaromatic Ligands.	84
4.8.2.4.	Synthesis of Imine Complexes	85
4.8.2.5.	Synthesis of Organonitrile Complexes	86

4.8.2.6.	Synthesis of Amido Complexes	88
4.8.2.6.1.	By Ammonolysis.	89
4.8.2.6.2.	By Transamination.	90
4.8.2.6.3.	By Transmetallation.	90
4.8.2.6.4.	By Other Routes.	91
4.8.2.7.	Synthesis of Imido Complexes	92
4.8.2.7.1.	Occurrence and Bonding.	92
4.8.2.7.2.	By Deprotonation of NH_3 or RNH_2 .	92
4.8.2.7.3.	By Reacting $\text{Mo}=\text{O}$ with Silylamines.	93
4.8.2.7.4.	By Adding Organic Azides.	94
4.8.2.7.5.	By Electrophilic Attack on Coordinated Nitrides.	94
4.8.2.7.6.	By Oxo-Imido Exchange Reactions.	95
4.8.2.7.7.	From Disubstituted Hydrazines.	95
4.8.2.7.8.	By Other Methods.	95
4.8.2.8.	Synthesis of Metal—Nitrido Complexes	97
4.8.2.8.1.	Bonding Modes.	97
4.8.2.8.2.	By Ammonolysis.	97
4.8.2.8.3.	From Hydrazines.	98
4.8.2.8.4.	From Azides.	98
4.8.2.8.5.	From NCl_3 .	99
4.8.2.8.6.	From Nitrosyls.	99
4.8.2.8.7.	From C—N or Si—N Bond Cleavage.	100
4.8.2.9.	Hydrazine and Substituted Hydrazine Complexes	100
4.8.2.10.	Synthesis of Hydrazido (1–) Complexes	102
4.8.2.10.1.	From Diazonium Salts, from Hydrazines, and by Protonation of Hydrazido(2–) Ligands.	103
4.8.2.11.	Synthesis of Hydrazido(2–) Complexes	104
4.8.2.11.1.	From Diazonium Salts, from Hydrazines and by Protonation of N_2 and Diazenido Complexes.	105
4.8.2.12.	Synthesis of Diazene Complexes from Coordinated Hydrazines, Dinitrogen, Diazonium Salts, Azobenzene, and by Protonation of Diazenido Complexes	107
4.8.2.13.	Synthesis of Diazenido-Complexes, $-\text{NNH}$ and $-\text{NNR}$	108
4.8.2.13.1.	From Diazonium Salts.	109
4.8.2.13.2.	From Hydrazines and Triazenes.	110
4.8.2.13.3.	From Coordinated NO and N_2 .	111
4.8.2.13.4.	From Me_3SiNNPh .	113

4.8.2.14.	Synthesis of Dinitrogen Complexes	113
4.8.2.14.1.	From Gaseous N_2 .	114
4.8.2.14.2.	From Hydrazine and Coordinated Hydrazines.	116
4.8.2.14.3.	Via Miscellaneous Preparations.	117
4.8.2.15.	Synthesis of Nitrosyl Complexes	118
4.8.2.15.1.	From Nitric Oxide.	118
4.8.2.15.2.	From Nitrosonium Salts.	120
4.8.2.15.3.	From Nitrosyl Halides.	120
4.8.2.15.4.	From <i>N</i> -Nitrosamides.	121
4.8.2.15.5.	By Transfer of Coordinated NO.	121
4.8.2.15.6.	From Hydroxylamines.	121
4.8.2.15.7.	From Nitrites.	122
4.8.2.16.	Complexes Derived from Oximes and Hydroxylamines	123
4.8.2.17.	Synthesis of Coordinated Azides	124
4.8.2.18.	From Corrins, Porphyrins and Other Nitrogen-Containing Macrocyclic Ligands	125
4.8.2.18.1.	By Ligand Substitution Reactions.	125
4.8.2.18.2.	By Template Reactions.	128
4.8.2.19.	By Reacting N_2O and N_2O_4 with Transition- and Inner-Transition-Metal Compounds	129
4.8.2.20.	From Inorganic Nitrogen-Containing Anions (N_3^- , $[NCO]^-$, $[NCS]^-$, $[NCSe]^-$, $[NO_2]^-$, $[CN]^-$, etc.)	131
4.8.2.20.1.	In Homogeneous Monodentately Ligated Mononuclear Complexes.	131
4.8.2.20.2.	In Bridged Polynuclear Complexes.	132
4.8.2.20.3.	In Mixed Ligand Complexes.	134
4.8.2.21.	From Organic Nitrogen Anions or Their Metallo Derivatives by Metathesis with Transition-Metal Ligands	136
4.8.2.22.	From Metal Atom and Related Reactions	141
4.8.3.	Formation of the Phosphorus—Transition- and Inner-Transition-Metal Bond	144
4.8.3.1.	From Elemental Phosphorus with Transition- and Inner-Transition Metals and Their Complexes	144
4.8.3.1.1.	The Phosphides of the Group IV-VIII Transition Metals.	144
4.8.3.1.2.	The Phosphides of the Rare Earth and Actinide Metals.	146
4.8.3.1.3.	From Other Reactions.	151
4.8.3.2.	From Hydrido Derivatives of Phosphorus	153

4.8.3.2.1.	By Ligand Substitution Reactions with Transition- and Inner-Transition-Metal Complexes.	153
4.8.3.2.2.	By Cleavage of the Phosphorus—Hydrogen Bond.	156
4.8.3.3.	From Halo-Derivatives of Phosphorus	160
4.8.3.3.1.	By Ligand Substitution Reactions of Transition- and Inner-Transition-Metal Complexes.	160
4.8.3.3.2.	By Cleavage of the Phosphorus—Halide Bond.	161
4.8.3.3.3.	From Metal Atom and Relation Reactions.	162
4.8.3.4.	From Triorganophosphines	164
4.8.3.4.1.	By Reaction with Transition- and Inner-Transition-Metal Halides.	164
4.8.3.4.2.	By Reaction with Transition- and Inner-Transition-Metal Aquo Complexes.	166
4.8.3.4.3.	By Reaction with Transition- or Inner-Transition-Metal Carbonyl, Organometallic and Cluster Compounds.	167
4.8.3.4.4.	By Ligand Substitution Reactions with Transition- and Inner-Transition-Metal Complexes.	168
4.8.3.4.5.	From Metal-Atom and Related Reactions.	169
4.8.3.5.	From Alkoxy and Amino Phosphorus Compounds	171
4.8.3.5.1.	By Reaction with Transition- and Inner-Transition-Metal Halides and Aquo Complexes.	171
4.8.3.5.2.	By Reaction with Transition- or Inner-Transition-Metal Complexes.	172
4.8.3.6.	From Bidentate and Polydentate Phosphorus Ligands	173
4.8.3.6.1.	By Reactions with Transition- and Inner-Transition-Metal Carbonyl and Organometallic Complexes.	173
4.8.3.6.2.	By Reactions with Transition- and Inner-Transition Halides.	175
4.8.3.7.	From Phospholes by Reactions with Transition- and Inner-Transition Complexes	176
4.8.3.7.1.	From Neutral Phospholes.	176
4.8.3.7.2.	From Phosphole Ions and Phosphametalloenes.	178

4.8.3.8.	From Organophosphorus Anions and Metallophosphorus Compounds	179
4.8.4.	Formation of the Arsenic—, Antimony—, and Bismuth—Transition- and Inner-Transition-Metal Bonds	180
4.8.4.1.	From the Elements	180
4.8.4.2.	From Hydrido Derivatives of As, Sb, Bi	181
4.8.4.3.	From Halo Derivatives of As, Sb, Bi	182
4.8.4.3.1.	By Ligand Substitution and Ligand Halogenation.	182
4.8.4.3.2.	By Cleavage of the Group VB—Halogen Bond.	183
4.8.4.4.	From Trialkyl—and Triaryl—Arsines, Stibines and Bismuthines	184
4.8.4.4.1.	By Reaction with Transition- and Inner-Transition-Metal Halides.	184
4.8.4.4.2.	By Reaction with Transition- and Inner-Transition-Metal Aquo Complexes.	185
4.8.4.4.3.	By Reaction with Organometallic and Cluster Compounds.	185
4.8.4.4.4.	From Metal Atom and Related Reactions.	186
4.8.4.5.	From Other Organo Derivatives of As, Sb, Bi and Their Reactions with Transition- and Inner-Transition-Metal Complexes	187
4.8.4.6.	From Bi- and Polydentate As, Sb and Bi Donors	189
4.8.4.6.1.	By Reaction with Transition- and Inner-Transition-Metal Halides.	189
4.8.4.6.2.	By Reaction with Transition- and Inner-Transition-Metal Aquo Complexes.	190
4.8.4.6.3.	By Reaction with Organometallic and Cluster Compounds.	190
4.8.4.6.4.	By Other Ligand Substitution Reactions.	192
4.8.4.7.	From Other Organo-Group-VB and Metallo-Group-VP Compounds	192
4.8.4.7.1.	By Reaction with Transition- and Inner-Transition-Metal Halides and Their Complexes.	192
4.8.4.7.2.	By Reaction with Transition- and Inner-Transition-Metal Organometallic Complexes.	192

4.9.	Formation of the Group-VB—Group-0 Element Bond	194
4.9.1.	Introduction	194
4.9.2.	Substitution Reactions	194
4.9.3.	Van der Waals Complexes	196
4.10.	Formation of Group-VB (N, P, As, Sb, Bi)– Group-IIIB (B, Al, Ga, In, Tl) Compounds and Alloys	197
4.10.1.	Introduction	197
4.10.2.	Direct Synthesis of Bulk Group-IIIB–Group-VB Compounds	197
4.10.2.1.	General Reaction Techniques	197
4.10.2.1.1.	Introduction.	197
4.10.2.1.2.	Liquid-Vapor Reactions.	197
4.10.2.1.3.	Liquid-Liquid Reactions.	200
4.10.2.2.	Nitrides	201
4.10.2.2.1.	Boron Nitride.	201
4.10.2.2.2.	Aluminum Nitride.	201
4.10.2.2.3.	Gallium Nitride.	202
4.10.2.3.	Phosphides	202
4.10.2.3.1.	Boron Phosphide.	202
4.10.2.3.2.	Aluminum Phosphide.	202
4.10.2.3.3.	Gallium Phosphide.	203
4.10.2.3.4.	Indium Phosphide.	205
4.10.2.4.	Arsenides	206
4.10.2.4.1.	Aluminum Arsenide.	206
4.10.2.4.2.	Gallium Arsenide.	207
4.10.2.4.3.	Indium Arsenide.	209
4.10.2.5.	Antimonides	209
4.10.3.	Epitaxial Synthesis	210
4.10.3.1.	Liquid-Phase Epitaxy	211
4.10.3.2.	Vapor-Phase Epitaxy	214
4.10.3.2.1.	Chemical Vapor Deposition by the Arsine System.	214
4.10.3.2.2.	Arsenic Trichloride Deposition.	216
4.10.3.3.	Metal Organic Chemical Vapor Deposition	218
4.10.3.4.	Molecular Beam Epitaxy	220
4.10.3.5.	Ion Implantation	222
4.10.3.6.	Ion Cluster Beam	223
