Handbook of Microscopy

Applications in Materials Science, Solid-State Physics and Chemistry

Edited by
S. Amelinckx, D. van Dyck,
J. van Landuyt, G. van Tendeloo

Methods I

VCH Weinheim · New York · Basel · Cambridge · Tokyo

Outline

Volume 1: Methods I

I Light Microscopy
- 1 **Fundamentals of Light Microscopy**
  F. Mücklich
- 2 **Optical Contrasting of Microstructures**
  F. Mücklich
- 3 **Raman Microscopy**
  P. Dhamelincourt, J. Barbillat
- 4 **Three-Dimensional Light Microscopy**
  E. H. K. Stelzer
- 5 **Near Field Optical Microscopy**
  D. Courjon, M. Spajer
- 6 **Infrared Microscopy**
  J. P. Huvenne, B. Sombret

II X-Ray Microscopy
- 1 **Soft X-Ray Imaging**
  G. Schmahl
- 2 **X-Ray Microradiography**
  D. Mouze
- 3 **X-Ray Microtomography**
  J. Cazaux
- 4 **Soft X-Ray Microscopy by Holography**
  D. Joyeux
- 5 **X-Ray Diffraction Topography**
  M. Schlenker, J. Baruchel

III Acoustic Microscopy
- 1 **Acoustic Microscopy**
  A. Briggs

IV Electron Microscopy

1 Stationary Beam Methods

1.1 Transmission Electron Microscopy

1.1.1 Diffraction Contrast Transmission Electron Microscopy
S. Amelinckx

1.1.2 High-Resolution Electron Microscopy
D. Van Dyck

1.2 Reflection Electron Microscopy
J. M. Cowley

1.3 Electron Energy-Loss Spectroscopy Imaging
C. Colliex

1.4 High Voltage Electron Microscopy
H. Fujita

1.5 Convergent Beam Electron Diffraction
D. Cherns, J. W. Steeds, R. Vincent

1.6 Low-Energy Electron Microscopy
E. Bauer

1.7 Lorentz Microscopy
J. P. Jakubovics

1.8 Electron Holography Methods
H. Lichte

Volume 2: Methods II

IV Electron Microscopy

2 Scanning Beam Methods

2.1 Scanning Reflection Electron Microscopy
D. C. Joy

2.2 Scanning Transmission Electron Microscopy
J. M. Cowley

2.3 Scanning Transmission Electron Microscopy: *Z* Contrast
S. J. Pennycook

2.4 Scanning Auger Microscopy (SAM) and Imaging X-Ray Photoelectron Microscopy (XPS)
R. De Gryse, L. Fiermans

2.5 Scanning Microanalysis
R. Gijbels

2.6 Imaging Secondary Ion Mass Spectrometry
P. van Espen, G. Janssens

V Magnetic Methods
1 Nuclear Magnetic Resonance
D. G. Cory, S. Choi
2 Scanning Electron Microscopy with Polarization Analysis (SEMPA)
J. Unguris, M. H. Kelley, A. Gavrin, R. J. Celotta, D. T. Pierce, M. R. Scheinfein
3 Spin-Polarized Low-Energy Electron Microscopy
E. Bauer

VI Emission Methods
1 Photoelectron Emission Microscopy
M. Mundschau
2 Field Emission and Field Ion Microscopy (Including Atom Probe FIM)
A. Cerezo, G. D. W. Smith

VII Scanning Point Probe Techniques
General Introduction
1 Scanning Tunneling Microscopy
R. Wiesendanger
2 Scanning Force Microscopy
U. D. Schwarz
3 Magnetic Force Microscopy
A. Wadas
4 Ballistic Electron Emission Microscopy
J. DiNardo

VIII Image Recording, Handling and Processing
1 Image Recording in Microscopy
K.-H. Herrmann
2 Image Processing
N. Bonnet

IX Special Topics
1 Coincidence Microscopy
P. Kruit

2 **Low Energy Electron Holography and Point-Projection Microscopy**
J. C. H. Spence

Volume 3: Applications

I Classes of Materials

1 **Metals and Alloys**
J. Th. M. De Hosson
G. van Tendeloo
2 **Microscopy of Rocks and Minerals**
D. J. Barber
3 **Semiconductors and Semiconducting Devices**
H. Oppolzer
4 **Optoelectronic Materials**
I. Berbezier, J. Derrien
5 **Domain Structures in Ferroic Materials**
E. K. H. Salje
6 **Structural Ceramics**
M. Rühle
7 **Microscopy of Gemmological Materials**
J. van Landuyt, M. H. G. van Bockstael, J. van Royen
8 **Superconducting Ceramics**
G. van Tendeloo
9 **Non-Periodic Structures**
9.1 High-Resolution Imaging of Amorphous Materials
P. H. Gaskell
9.2 Quasi-Crystalline Structures
K. H. Kuo
10 **Medical and Dental Materials**
K. Yasuda, K. Hisatsune, H. Takahashi, K.-I. Udoh, Y. Tanaka
11 **Carbon**
D. Bernaerts and S. Amelinckx
12 **Composite Structural Materials**
O. Van der Biest, P. Lust, K. Lambrinou, J. Ivens, I. Verpoest, L. Froyen
13 **The Structure of Polymers and Their Monomeric Analogs**
I. G. Voigt-Martin

14 **Nuclear Materials**
H. Blank, Hj. Matzke, H. Maußner, I. L. F. Ray
15 **Magnetic Microscopy**
A. Hubert

II Special Topics

1 **Small Particles (Catalysis, Photography, Magnetic Recording)**
H. W. Zandbergen, C. Træholt
2 **Structural Phase Transformations**
H. Warlimont
3 **Preparation Techniques for Transmission Electron Microscopy**
A. Barna, G. Radnóczi, B. Pécz
4 **Environmental Problems**
W. Jambers, R. E. Van Grieken
5 **Quantitative Hyleography: The Determination of Quantitative Data From Micrographs**
P. J. Goodhew

Contents

Volume 1: Methods I

General Introduction 1

I Light Microscopy

Introduction 5

1 **Fundamentals of Light Microscopy** 7
F. Mücklich
1.1 Light Characteristics 7
1.1.1 Wave Propagation 7
1.1.2 Coherence and Interference 9
1.2 Light Interaction with Solids 11
1.2.1 Remarks on Transparency, Luster, and Color of Matter 12
1.2.2 Reflection 15
1.2.3 Refraction 17
1.2.4 Absorption 22
1.2.5 Polarization 25
1.3 Imaging 27
1.3.1 Imaging as a Scattering Phenomenon 27
1.3.2 Beam Paths 28
1.4 References 30

2 **Optical Contrasting of Microstructures** 33
F. Mücklich
2.1 Transmission Microscopy 33
2.1.1 Bright Field 34
2.1.2 Dark Field 35
2.1.3 Phase Contrast 35
2.1.4 Polarization Microscopy 36
2.1.5 Differential Interference Contrast 44
2.2 Reflection Microscopy 45
2.2.1 Bright Field 45
2.2.2 Dark Field 46

2.2.3 Phase Contrast 46
2.2.4 Polarized Light 47
2.2.5 Differential Interference Contrast 48
2.2.6 Interferometers 49
2.2.7 Interference Layer Contrasting 51
2.3 Remarks on Sample Preparation 52
2.4 References 53

3 **Raman Microscopy** 55
P. Dhamelincourt, J. Barbillat
3.1 Introduction 55
3.2 Principles of Raman Spectroscopy 55
3.3 Confocal Raman Microspectrometry 56
3.3.1 Instrumentation 56
3.3.2 Confocal Raman Microscopy 58
3.4 Raman Imaging 61
3.4.1 Basic Principles 61
3.4.2 Various Mapping Configurations 62
3.4.2.1 Wide-Feld Laser Illumination and the Direct Image Forming Procedure 62
3.4.2.2 Digital Image Restoration Techniques 63
3.4.2.3 Line Laser Illumination 64
3.4.3 Future Developments 68
3.5 Conclusion 68
3.6 References 69

4 **Three-Dimensional Light Microscopy** 71
E. H. K. Stelzer
4.1 Introduction 71
4.2 Thin and Thick Objects 71
4.3 Telecentricity 72
4.4 Theory of Three-Dimensional Imaging 73
4.5 Confocal Reflection Microscopy 74
4.5.1 Position of the Scanning System 75
4.5.2 Resolution 76
4.5.3 Interference 77
4.6 Confocal Fluorescence Microscopy 78
4.7 New Developments in Fluorescence Microscopy 79
4.7.1 Multipoton Illumination 79
4.7.2 Multiple Lenses 79
4.8 References 81

5 Near Field Optical Microscopy 83
D. Courjon, M. Spajer
5.1 Introduction 83
5.2 Principle of Near Field Microscopy 83
5.3 Basic Families of Near Field Microscopes 84
5.3.1 Background 84
5.3.2 Detection Techniques in Near Field Microscopy 84
5.3.3 Collection Mechanism in Near Field Microscopy 85
5.3.3.1 Role of the Subwavelength Extremity of the Collector 85
5.3.3.2 Role and Efficiency of the Propagating Part of the Collector 86
5.3.4 Emission Mechanism in Near Field Microscopy 86
5.4 Perturbation Mode 87
5.5 Main Configurations 87
5.5.1 Transmission Near Field Microscope 88
5.5.2 Reflection Microscopy 89
5.5.3 Total Internal Reflection Microscopy 90
5.5.4 Hybrid Techniques 90
5.5.4.1 Near Field Microscopy by Shear Force Control 91
5.5.4.2 Contact Total Internal Reflection Microscopy 91
5.5.5 Distance Control by Measurement of the Electron Tunneling Current Between Tip and Sample 93
5.6 Near Field Microscopy Applications 94
5.7 References 95

6 Infrared Microscopy 97
J. P. Huvenne, B. Sombret
6.1 Infrared Spectroscopy 97
6.1.1 Molecular Vibration Spectroscopy 97
6.1.2 Instrumentation 98
6.2 Infrared Microspectrometry 101
6.2.1 Principles 101
6.2.1.1 Optical Design 101
6.2.1.2 Operational Modes 102
6.2.1.3 Imaging Capabilities 105
6.2.2 Limitations 106
6.2.2.1 Spatial Resolution 106
6.2.2.2 Optical Aberrations 108
6.2.2.3 Signal-to-Noise Ratio 108
6.2.3 Specific Accessories 108
6.2.3.1 Sample Preparative Accessories 108
6.2.3.2 Infrared Objectives 109
6.3 FTIR Microsampling 109

6.3.1 Transmission Studies 109
6.3.1.1 Characterization of Polymers and Contaminants 109
6.3.1.2 Direct Structural Identification of Polysaccharides from Red Algae 111
6.3.2 Reflection Studies 113
6.4 References 115

II X-Ray Microscopy

1 Soft X-Ray Imaging 119
G. Schmahl
1.1 Introduction 119
1.2 Transmission X-Ray Microscopy 122
1.3 Scanning Transmission X-Ray Microscopy 126
1.4 References 128

2 X-Ray Microradiography 131
D. Mouze
2.1 Physical Principles 131
2.1.1 Interaction Processes Involved in Microradiography 131
2.1.2 Specimen Thickness and Sensitivity of X-Ray Microradiography 132
2.2 Contact Microscopy 133
2.2.1 Principle 133
2.2.2 Resolution 134
2.2.3 Instrumentation 135
2.2.3.1 Two-Dimensional Detectors 135
2.2.3.2 Resists: Processing and Readout 135
2.2.3.3 X-Ray Sources 136
2.2.3.4 Limitations of the Resist Method 137
2.2.3.5 Contact Photoelectron Microscope 138
2.2.4 Applications of X-Ray Contact Microradiography 138
2.2.5 Conclusion 140
2.3 X-Ray Projection Microscopy 140
2.3.1 Principle 140
2.3.2 Theoretical Considerations 140
2.3.2.1 Magnification and Resolution 140
2.3.3 Instrumentation 141
2.3.4 Discussion 143

2.3.4.1 Resolution 143
2.3.4.2 Microanalysis 144
2.3.5 Applications 144
2.3.6 Conclusion 145
2.4 References 146

3 **X-Ray Microtomography** 149
J. Cazaux
3.1 Introduction 149
3.2 Instrumental Details 152
3.3 Overview of Image Reconstruction Methods 155
3.3.1 General Principles 155
3.3.2 Practical Solutions 157
3.4 Conclusions 159
3.5 References

4 **Soft X-Ray Microscopy by Holography** 163
D. Joyeux
4.1 Introduction 163
4.2 Basics of Gabor Holography 164
4.3 Recording a Gabor X-Ray Hologram 165
4.3.1 Coherence Conditions 166
4.3.2 Spatial Coherence and the Hologram Illuminance 166
4.3.3 Realization of the Coherence Conditions 167
4.3.4 The Recording Medium 168
4.3.5 About the Practical Implementation 168
4.3.6 Further Comments 169
4.4 Reconstruction of Gabor Holograms 169
4.4.1 Reconstruction by Computer 170
4.4.2 Optical Reconstruction 170
4.4.2.1 Basics 170
4.4.2.2 The Limit of Resolution 172
4.4.2.3 Correcting the Holographic Aberrations 172
4.5 Fourier Transform Holography 174
4.6 Conclusion 175
4.7 References 176

5 **X-Ray Diffraction Topography** 177
M. Schlenker, J. Baruchel
5.1 Introduction 177

5.2 Interaction of X-Rays with Materials (Elastic Processes Only) 178
5.3 Principle of Bragg Diffraction Imaging 183
5.4 X-Ray Sources and Beams 184
5.5 Implementation of X-Ray Topography 187
5.6 Possibilities of X-Ray Topography 188
5.7 Neutron Topography 189
5.8 Conclusion 191
5.9 References 191

III Acoustic Microscopy

1 Acoustic Microscopy 195
A. Briggs
1.1 Introduction 195
1.2 Measure of R(q) by Inversion of V(z) 200
1.3 Rayleigh Wave Measurement 205
1.4 Anisotropy 209
1.5 Surface Layers 215
1.6 Surface Brillouin Spectroscopy 218
1.7 Time-Resolved Measurements 221
1.8 Crack Depth 228
1.9 Ultrasonic Force Microscopy 232
1.10 Conclusion 237
1.11 References 238

IV Electron Microscopy

1 Stationary Beam Methods 245
1.1 Transmission Electron Microscopy 247
1.1.1 Diffraction Contrast Transmission Electron Microscopy 247
S. Amelinckx
1.1.1.1 Introduction 247
1.1.1.2 Instrumentation 247
1.1.1.3 Electron Diffraction 251
1.1.1.4 Kinematical Diffraction Theory 262
1.1.1.5 Two-Beam Dynamical Theory 270

1.1.1.6 Absorption 273
1.1.1.7 Dynamical Equations Including Absorption 275
1.1.1.8 Rocking Curves for Perfect Crystals Taking into Account Anomalous Absorption 276
1.1.1.9 Dynamical Diffraction by Deformed or Faulted Crystals 277
1.1.1.10 Matrix Formulation for a Foil Containing a Translation Interface 280
1.1.1.11 Matrix Formulation for a Foil Containing a Domain Boundary 282
1.1.1.12 Matrix Formulation for a Crystal Containing a Non-reflecting Part: the Vacuum Matrix 282
1.1.1.13 Fringe Profiles at Planar Interfaces 283
1.1.1.14 Domain Fragmented Crystals: Microtextures 290
1.1.1.15 Diffraction Patterns of Domain Textures 291
1.1.1.16 Imaging of Microtextures 294
1.1.1.17 Dislocation Contrast 297
1.1.1.18 Dislocation Contrast: Dynamical Theory 311
1.1.1.19 Moiré Patterns 326
1.1.1.20 Applications of Diffraction Contrast 329
1.1.1.21 References 350

1.1.2 High-Resolution Electron Microscopy 353
D. Van Dyck
1.1.2.1 Introduction 353
1.1.2.2 Principles of Image Formation 353
1.1.2.3 The Electron Microscope 354
1.1.2.4 Resolution Limits 361
1.1.2.5 High-Resolution Electron Microscopy in Practice 366
1.1.2.6 Interpretation of the Images 369
1.1.2.7 Case Studies 382
1.1.2.8 Appendices 390
1.1.2.9 References 405

1.2 Reflection Electron Microscopy 407
J. M. Cowley
1.2.1 Introduction 407
1.2.2 Reflection High Energy Electron Diffraction Patterns 409
1.2.3 Image Contrast for Surface Steps and Projections 413
1.2.4 Dislocations and Stacking Faults 416
1.2.5 Surface Layers, Superlattices and Lattice Fringes 418
1.2.6 RHEED and REM Theory: Quantitative Interpretations 420
1.2.7 Applications of Reflection Electron Microscopy 422
1.2.8 References 423

1.3 Electron Energy-Loss Spectroscopy Imaging 425
C. Colliex
1.3.1 Introduction 425
1.3.2 Instrumentation and Methods 426
1.3.2.1 An Historical Survey 426
1.3.2.2 A New Dimension in EELS Imaging: From Point Analysis and Energy-Filtered Images to Spectrum Imaging 428
1.3.3 Understanding and Extracting the Information Contained in an EELS Spectrum 432
1.3.3.1 Anatomy of an EELS Spectrum 432
1.3.3.2 Methods Available for Data Processing and Specific Information Extraction 434
1.3.3.3 Alternative Approaches using Multiple Least-Squares Techniques 436
1.3.4 Applications of EELS Imaging 438
1.3.4.1 Advances in EELS Elemental Mapping 439
1.3.4.2 Beyond Elemental Analysis: Mapping of EELS Fine Structures 442
1.3.5 References 444

1.4 High Voltage Electron Microscopy 447
H. Fujita
1.4.1 Introduction 447
1.4.2 Voltage Dependence of Operational Features of Electron Microscopes 448
1.4.2.1 Electron Channeling at High Accelerating Voltages 449
1.4.2.2 The Objective Aperture Effect on the Maximum Observable Specimen Thickness 451
1.4.3 In Situ Experiments with High Voltage Electron Microscopes 452
1.4.3.1 Specimen Treatment Devices for In Situ Experiments 452
1.4.3.2 Applications to Materials Science 455
1.4.4 New Research Fields Using High Voltage Electron Microscopy 461
1.4.4.1 Crystalline–Amorphous Transition 461
1.4.4.2 Electron-Irradiation-Induced Foreign Atom Implantation 463
1.4.5 Conclusions 464
1.4.6 References 464

1.5 Convergent Beam Electron Diffraction 467
D. Cherns, J. W. Steeds, R. Vincent
1.5.1 Introduction 467
1.5.2 Geometry and Crystal Symmetry Determination 468

1.5.3 Bloch Wave Theory 471
1.5.4 Crystal Structure Determination by Convergent Beam Electron Diffraction 476
1.5.5 Quantitative Convergent Beam Electron Diffraction 479
1.5.6 Coherent Convergent Beam Electron Diffraction 480
1.5.7 Studies of Imperfect Crystals 482
1.5.8 References 485

1.6 Low-Energy Electron Microscopy 487
E. Bauer
1.6.1 Introduction 487
1.6.2 Theoretical Foundations 487
1.6.3 Instrumentation 490
1.6.4 Areas of Application 494
1.6.4.1 Clean Surfaces 494
1.6.4.2 Adsorption Layers 495
1.6.4.3 Thin Films 498
1.6.5 Discussion 501
1.6.6 Concluding Remarks 502
1.6.7 References 502

1.7 Lorentz Microscopy 505
J. P. Jakubovics
1.7.1 Magnetic Domains 505
1.7.2 The Effect of a Magnetic Specimen on Electrons 506
1.7.3 Methods of Observing Magnetic Domains in the TEM 506
1.7.4 Examples of Domain Images 508
1.7.5 Theory of Image Contrast 510
1.7.6 Interference Effects 511
1.7.7 Determination of Magnetization Distributions 511
1.7.8 Practical Implementation of Lorentz Microscopy 513
1.7.9 References 514

1.8 Electron Holography Methods 515
H. Lichte
1.8.1 Principle and Problems of Conventional Transmission Electron Microscopy 515
1.8.1.1 Modulation of the Electron Wave 515
1.8.1.2 Propagation of the Electron Wave through the Electron Microscope 516
1.8.1.3 Problems in Conventional Transmission Electron Microscopy 517
1.8.2 Holography: Basic Principles 519

1.8.3 Electron Holography: Aspects of Realization 520
1.8.3.1 Coherence 520
1.8.3.2 Geometries for taking Electron Holograms 521
1.8.3.3 In-Line Holography 522
1.8.3.4 Off-Axis Electron Holography 523
1.8.4 Off-Axis Image Plane Holography 524
1.8.4.1 Principles 524
1.8.4.2 Further Developments 525
1.8.4.3 Holography at Low and Medium Resolution 527
1.8.4.4 Holography at High Resolution: Surmounting the Point Resolution 528
1.8.5 Summary 533
1.8.6 References 533
