

PROGRESS IN COLLOID & POLYMER SCIENCE

Editors: F. Kremer (Leipzig) and G. Lagaly (Kiel)

Volume 105 (1997)

Trends in Colloid and Interface Science XI

Guest Editors:

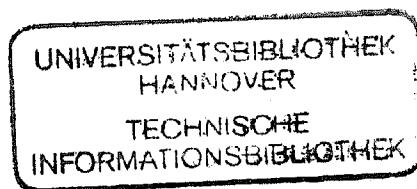

J. B. Rosenholm (Åbo), B. Lindman (Lund)
and P. Stenius (Espoo)

STEINKOPFF
DARMSTADT

Springer

	Preface	V
	Polymers at Interfaces	
F. Shojai, A. B. A. Pettersson, T. Mäntylä, J. B. Rosenholm:	Dispersibility of yttria-doped zirconia powders in aqueous media	1
Y. Chevalier, S. Brunel, P. Le Perchec, M. Mosquet, J.-P. Guicquero:	Polyoxyethylene di-phosphonates as dispersing agents	6
B. R. Saunders, B. Vincent:	Osmotic deswelling of microgel particles in the presence of free polymer .	11
G. E. Morris, B. Vincent, M. J. Snowden:	The interaction of thermosensitive, anionic microgels with metal ion solution species	16
W. M. Sigmund, J. Sindel, F. Aldinger:	AFM-studies of interparticle forces	23
G. A. Vliegthart, H. N. W. Lekkerkerker:	Measurement of the interfacial tension of demixed colloid-polymer sus- pensions	27
M. C. P. van Eijk, M. A. Cohen Stuart, G. J. Fleer:	Adsorption kinetics of a semi-flexible polymer	31
	Particle Dispersions Fibres and Solid Surfaces	
H. Amhamdi, F. Dumont, C. Buess-Herman:	The behaviour of ferric oxide hydrosols in the presence of urea	38
S. Heimer, D. Težak:	Dynamics and growth of silver iodide polydispersed particles determined by light scattering	41
H.-J. Jacobasch, K. Grundke, A. Augsburg, T. Gietzelt, S. Schneider:	Wetting of solids by liquids with low and high viscosity	44
L. G. Grönroos, A. B. A. Pettersson, T. A. Mäntylä, J. B. Rosenholm:	Pore structure characteristics of sintered TiO ₂ doped α -Al ₂ O ₃	55
J. R. Bartlett, D. Gazeau, Th. Zemb, J. L. Woodfrey:	Counter-ion adsorption and homogeneity of TiO ₂ /ZrO ₂ nanoparticles from SANS contrast variation	60
P. Ågren, J. B. Rosenholm:	Surface fractal dimension by nitrogen adsorption of microporous sol-gel processed SiO ₂ ceramics	66
S. Veittola, P. Nousiainen, R. Moilanen:	Effect of surfactants on zeta potential and static electricity of viscose fibres	72
B. J. Carroll:	The influence of capillarity on the location of liquid soils on textile fabrics	75
H. Watson, A. E. E. Jokinen, P. J. Mikkola, J. G. Matison, J. B. Rosenholm:	Silane treated glass fibers. Part 4: Ureido silane deposited from ethanol .	80
M. S. Sfiligoj, P. Zipper, S. Jeler:	Small angle x-ray diffraction studies of PET fibres	85
H. P. Huinink, A. de Keizer, F. A. M. Leermakers, J. Lyklema:	Nonionic surfactants in cylindrical hydrophilic pores	91
M. Zabat, M. Vayer-Besançon, R. Harba, S. Bonnamy, H. Van Damme:	Surface topography and mechanical properties of smectite films	96

Thin (Organic) Films

B. Korchowiec, M. Paluch:	Temperature and subphase influence on mixed biosurfactant monolayers formation	103
V. Bekiari, P. Lianos, S. Avramiotis, A. Xenakis:	Photophysical studies of aerosol-OT films loaded with biological macromolecules and made from reverse micelles	109
J. J. Benattar, A. Schalchli, D. Sentenac, F. Rieutord:	Study of the polymer-surfactant interaction in black films and monolayers	113
N. Cuvillier, M. Bonnier, F. Rondelez, D. Paranjape, M. Sastry, P. Ganguly:	Adsorption of multivalent ions on charged Langmuir monolayers	118
O. Senkel, R. Miller, V. B. Fainerman:	An apparatus for investigating dynamic surface properties of adsorption layers and spread monolayers	126
V. Melzer, D. Vollhardt:	Phase transitions in adsorption layers: comparison with Langmuir monolayers	130
P. Dynarowicz, W. Jawień, J. Miñones Trillo, N. Vila Romeu, O. Conde Mouzo:	Interaction between molecules in the mixed spread films at the water/air interface	138
A. Cebers, I. Drikis:	2D shape relaxation dynamics in amphiphile monolayers	142
A. Sokołowski, K. A. Wilk, B. Matuszewska, T. Koźlecki:	Alkane solubilization in soluble monolayers of 4(4'-alkylphenylazo) benzenesulfonates at the air-water surface	147
A. Chyla, M. Bieńkowski, J. Sworakowski, T. Koźlecki, K. A. Wilk:	Photochromic properties of anionic azobenzene amphiphiles in solution and Langmuir-Blodgett films	153
W. A. Goedel, R. Heger:	Hydrophobic polymers, tethered to the water surface I: fluid monolayers	160
R. Heger, W. A. Goedel:	Hydrophobic polymers, tethered to the water surface II: free-standing rubber-elastic LB-films	167
J. R. Seoane, N. Vila Romeu, J. Miñones, O. Conde, P. Dynarowicz, M. Casas:	The behavior of amphotericin B monolayers at the air/water interface .	173

Biocolloids and Emulsions

S. Avramiotis, H. Stamatis, F. N. Kollis, A. Xenakis:	<i>Pseudomonas cepacia</i> lipase localization in lecithin and AOT w/o microemulsions. A fluorescence energy transfer study	180
R. Angelico, G. Colafemmina, M. Della Monica, G. Palazzo, M. Giustini, A. Ceglie:	Polymerlike lecithin reverse micelles: a multicomponent self-diffusion study	184
A. de la Maza, L. Coderch, O. Lopez, J. Baucells, J. L. Parra:	Permeability changes in liposomes modelling the stratum corneum lipid composition caused by surfactants	192
I. Bivas, D. Georgescauld, N. Jeandaine, M. Winterhalter, P. Méléard, G. Marinov, P. Bothorel:	Elastic properties of lipid bilayer containing modified lipids	197
P. A. Cirkel, J. P. M. van der Ploeg, G. J. M. Koper:	Headgroup mobility in lecithin inverse worm-like micelles	204
M. Lindemann, M. Steinmetz, M. Winterhalter:	Rupture of lipid membranes	209
M. Bergström:	Reversibly formed bilayer vesicles: energetics and polydispersity	214
V. Arcolego, M. Goffredi, G. La Manna, V. Turco Liveri, F. Aliotta:	Study of lecithin reverse micelles by FT-IR spectroscopy	220

Y. Chevalier, S. Pourchet, S. Brunel, P. Le Perchec, B. Gallot:	Spontaneous formation of zwitterionic vesicles: chemical structure – vesicle formation relationships	224
P. Perrin, F. Lafuma, R. Audebert:	Emulsions stabilized with hydrophobically modified poly(acrylic acid)	228
H. Kunieda, E. Ogawa, K. Kihara, T. Tagawa:	Formation of highly concentrated emulsions in water/sucrose dodecanoate/oil systems	239
R. Pons, I. Llamas, G. Calderó, L. Pérez, M. J. Garcia-Celma, N. Azemar, I. Carrera, C. Solans:	Formation and stability of highly concentrated emulsions (gel emulsions): influence of aromatic aliphatic hydrocarbon interactions	244
Y. De Smet, J. Malfait, C. De Vos, L. Deriemaeker, R. Finsy:	Ostwald ripening of concentrated alkane emulsions: a comparison of fiber-optics dynamic light scattering and conventional dynamic light scattering	252
Microemulsions and Phase Equilibria of Surfactant Systems		
D. Fioretto, M. Freda, G. Onori, A. Santucci:	Dielectric study of Mg(AOT) ₂ reverse micelles	256
M. Chibowski, A. Soltys, M. Łazarz:	Model studies on the <i>n</i> -alkane emulsions stability	260
T.-L. Lin, Y. Hu, T.-T. Lee:	The effect of alcohols on the size of water-in-oil microemulsion droplets	268
G. Briganti, G. D'Arrigo:	Sound velocity and interaction energy in concentrated aqueous solutions of hexaoxyethylene dodecylether	272
R. Oda, P. Panizza, F. Lequeux:	A novel shear-induced phase transition of worm-like micelles: gemini surfactant 12-2-12	276
G. Colafemmina, G. Palazzo, E. Balestrieri, M. Giomini, M. Giustini, A. Ceglie:	Towards the comprehension of the cosurfactant role: a NMR self-diffusion and conductivity study of a four-components water-in-oil microemulsion	281
A. M. Bellocq:	Effect of PEG on the stability of AOT microemulsions	290
G. J. M. Koper, J. P. M. van der Ploeg, P. A. Cirkel:	Dynamics of living and dead polymers studied by electrooptical birefringence	294
F. Bordi, C. Cametti, P. Codastefano, F. Sciortino, P. Tartaglia, J. Rouch:	Dielectric properties of highly concentrated water-in-oil microemulsions	298
J. Lakatos-Szabó, I. Lakatos:	Effect of non-ionic surfactants on interfacial rheological properties of crude oil/water systems	302
A. Bienicki, K. A. Wilk, J. Gapinski:	Microenvironment characteristics of microemulsions stabilized by cyclic acetal-type cationic surfactants	311
G. Persson, B. Lindström:	Phase behavior of nine binary surfactant systems consisting of N-alkylpyridinium octanesulfonates	317
A. Ponton, D. Quemada:	Temperature effect on shear induced transition in surfactant solution	322
K. Busserolles, G. Roux-Desgranges, A. H. Roux:	Thermodynamic and transport properties of viscoelastic and gel-like solutions in micellar solutions: WATER+CTAB+PHENOL	326
F. Testard, Th. Zemb, R. Strey:	Excess solubilization of lindane in bincontinuous microemulsions	332
J. Eastoe, D. Sharpe, R. K. Heenan:	Bending elasticities of Di-chained surfactant films in microemulsions	340
F. Ravera, M. Ferrari, L. Liggieri, R. Miller:	Adsorption kinetics of alkyl phosphine oxides in water/alkane systems with transfer across the interface	346
F. Ricoul, M. Dubois, A. Vandais, J.-P. Noel, T. Zemb, M. Lefevre, D. Plusquellec, O. Diat:	Phase equilibria of charged lamellar phases: Effect of adding surfactants with sugar headgroups on interbilayer repulsions	351

M. Bydén, H. Edlund, P. Berglund, B. Lindström:	Phase equilibria in two aqueous chiral surfactant systems	360
D. Težak, N. Jalšenjak, S. Peukert, G. Platz:	Lyotropic liquid crystalline phases from symmetric double-tailed undecyl-, tridecyl-, and pentadecyl-benzenesulphonates	365
	Author Index	368
	Subject Index	370
