How to Use this Book

Preface to the Series

Editorial Consultants to the Series

Contributors to Volume 12B

<b>5.</b>	<b>The Formation of Bonds to Elements of Group IVB (C, Si, Ge, Sn, Pb) (Part 4)</b>	<b>1</b>
<b>5.8.</b>	<b>Formation of Bonds between Elements of Groups IVB (C, Si, Ge, Sn, Pb) and Transition and Inner-Transition Metals</b>	<b>2</b>
5.8.1.	Introduction	2
5.8.2.	Formation of the Carbon-Transition and Inner Transition Metal Bond	2
5.8.2.8.	from Alkali-Metal Carbanions	2
5.8.2.8.1.	$\sigma$ -Alkyl- and Aryl-Metal Complexes by Reaction with the Corresponding Metal Halides	2
5.8.2.8.2.	$\pi$ -Allyl Metal Complexes by Reaction with the Corresponding Metal Halides	18
5.8.2.8.3.	$\eta^5$ $\pi$ -Cyclopentadienyl Metal Complexes by Reaction with the Corresponding Metal Halides	35
5.8.2.8.4.	$\eta^1$ $\sigma$ -Acyls from Alkali-Metal Carbanions and Metal Carbonyls.	68
5.8.2.8.5.	$\eta^1$ $\sigma$ -Acyl and Carbene Complexes by Reaction with Corresponding Metal-Carbonyl Complexes.	72
5.8.2.8.6.	$\eta^1$ $\sigma$ -Cyanide Complexes	87
5.8.2.8.7.	Ylide Complexes of the Transition Metals by Treating the Ylide with Transition-Metal Halide.	104
5.8.2.9.	from Organic Halides, Tosylates and Acetates.	108

5.8.2.9.1.	$\eta^1$ $\sigma$ -Alkyl, -Aryl and -Acyl Metal Complexes by Oxidative Addition.	108
5.8.2.9.2.	$(\eta^1)$ - $\sigma$ -Alkyl-, -Aryl-, and -Acyl-Metal Complexes by Reaction with Metal-Complex Anions.	121
5.8.2.9.3.	$\eta^1$ $\sigma$ -Alkyl-, -Aryl-, Acyl- and Silyl Metal Complexes by Reaction of Metal-Atom Vapors.	125
5.8.2.9.4.	$\eta^3$ $\pi$ -Allyl Transition-Metal Complexes by Oxidative Addition	131
5.8.2.9.5.	$\eta^4$ $\pi$ -Cyclobutadienyl Complexes from 3,4-Dihalocyclobutenes.	153
5.8.2.10.	from Aldehydes	156
5.8.2.11.	from Other Organometallics	160
5.8.2.11.1.	by Transmetallation from Boron and Tin	160
5.8.2.11.2.	by Transmetallation from Mercury	167
5.8.2.11.3.	by Transmetallation from Other Metal Organometallics to Metal Halides.	176
5.8.2.12.	from Carbon Monoxide	183
5.8.2.12.1.	Carbonyl Complexes by Direct Reaction of the Metals with Carbon Monoxide or by Reduction-Oxidation Procedures.	183
5.8.2.12.2.	Carbonyl Complexes by Ligand-Exchange Reactions.	190
5.8.2.12.3.	$\eta^1$ $\sigma$ -Acyl Complexes by Insertion of CO in $\sigma$ -Alkyl Complexes.	197
5.8.2.12.4.	Carbamoyl Complexes by Reaction of Metal Carbonyls with Amines.	201
5.8.2.12.5.	Alkoxy carbonyl Complexes by Reaction of Metal Carbonyls with Alcohols and Alkoxides.	204
5.8.2.13.	from Carbon Disulfide, Thioacid Chlorides, or Carbon Diselenide	206
5.8.2.13.1.	Thio- and Selenocarbonyl Complexes by Ligand-Exchange Reactions with Metal Complexes.	206
5.8.2.14.	from Carbon Dioxide	209
5.8.2.14.1.	by Ligand-Exchange Reactions with Metal Complexes.	209
5.8.2.15.	from Isonitriles	213

5.8.2.15.1.	Isonitrile Complexes by Ligand-Exchange Reactions.	213
5.8.2.15.2.	Iminoacyl Complexes by Isonitrile Insertion.	216
5.8.2.16.	from Miscellaneous Species	218
5.8.2.16.1.	Carbyne Complexes from Heterocarbene Complexes.	218
5.8.2.16.2.	Carbyne Complexes by Deprotonation of Cationic Carbene Complexes.	222
5.8.2.16.3.	Carbyne Complexes by Dehalogenation of Chlorocarbene Complexes.	224
5.8.2.16.4.	by Metal-Atom and Related Reactions.	225
5.8.3.	The Formation of the Silicon-Transition and Inner Transition-Metal Bond	227
5.8.3.1.	from the Elements.	227
5.8.3.2.	from Silicon Hydrides	227
5.8.3.2.1.	by Reaction with a Transition- or Inner Transition-Metal Halide Derivative in the Presence of Triethylamine.	227
5.8.3.2.2.	by Reaction with a Transition- or Inner Transition-Metal Hydride Complex.	228
5.8.3.2.3.	by Reaction with a Mononuclear Transition- or Inner Transition-Metal Carbonyl in the Presence of Ultraviolet Radiation.	229
5.8.3.2.4.	by Reaction with Di- or Trinuclear Transition- or Inner Transition-Metal Carbonyl Complexes.	230
5.8.3.2.5.	by Oxidative Addition to a Low-Valent Transition- or Inner Transition-Metal Complex.	234
5.8.3.2.6.	by Reaction with a Group-IVB Transition- or Inner Transition-Metal Derivative.	237
5.8.3.3.	from Silicon Halides	239
5.8.3.3.1.	by Reaction with a Reactive Metal Derivative of a Transition-Metal Complex (a Transition- or Inner Transition-Metal-Anion Complex).	239

---

5.8.3.4.	from Silyl-Alkali Metal Reagents	242
5.8.3.4.1.	by Reaction with a Transition- or Inner Transition-Metal Halide Complex.	242
5.8.3.4.2.	by Reaction with a Low-Valent Transition- or Inner Transition-Metal Complex.	243
5.8.3.5.	from Bis(silyl) Mercurials	244
5.8.3.5.1.	by Reaction with a Transition- or Inner Transition-Metal-Halide Complex.	244
5.8.3.5.2.	by Reaction with Low-Valent Transition- or Inner Transition-Metal Complexes.	245
5.8.3.6.	Miscellaneous Reactions	245
5.8.3.6.1.	by Oxidative Addition of $\text{Si}_2\text{X}_6$ and Strained Cyclic Disilanes to Low-Valent Transition- or Inner Transition-Metal Complexes.	245
5.8.3.6.2.	from Sila- and 1,3-Disilacyclobutanes by Reaction with $\text{Fe}_2(\text{CO})_9$ .	246
5.8.3.6.3.	by Reaction of $\text{SiR}_4$ with a Low-Valent Transition- or Inner Transition-Metal Complex.	248
5.8.3.6.4.	from Silyl Amides by Reaction with a Transition- or Inner Transition-Metal Hydride.	248
5.8.4.	The Formation of Germanium-Transition and Inner-Transition Metal Bond	249
5.8.4.1.	from the Elements.	249
5.8.4.2.	from Germanium Hydrides	250
5.8.4.2.1.	by Addition to Transition-Metal-Transition-Metal Bonds	250
5.8.4.2.2.	by Oxidative Addition to Low-Coordinate Transition-Metal Complexes	255
5.8.4.2.3.	by Reaction with Transition- or Inner-Transition-Metal Halide, Hydride and Related Complexes.	258
5.8.4.2.4.	by Proton Abstraction of Hydrogen To Form Unsaturated Ge-Metal Bonds.	260
5.8.4.2.5.	Miscellaneous Reactions of the Ge-H Bond.	261

5.8.4.3.	from Germanium Halides	262
5.8.4.3.1.	by Reaction with an Active Metal Derivative of a Transition- or Inner- Transition-Metal Complex (an Anion Complex).	262
5.8.4.3.2.	by Reaction of Germanium Tetrahalides with Neutral Mononuclear Metal Carbonyls and Related Species.	266
5.8.4.3.3.	by Reaction with a Silyl-Transition- or Inner-Transition-Metal-Metal Complex.	268
5.8.4.4.	from Germyl-Alkali-Metal Reagents	268
5.8.4.4.1.	by Reaction with Transition- or Inner-Transition-Metal-Halide Complexes.	268
5.8.4.5.	from Bis(germyl)mercury or -cadmium [NOTE: These substances are highly toxic and must be handled with care.]	271
5.8.4.5.1.	by Reaction with Transition- or Inner-Transition-Metal Halide Complexes.	271
5.8.4.5.2.	by Reaction with Low-Valent Transition- or Inner-Transition-Metal Complexes	272
5.8.4.6.	from Germanium(II).	273
5.8.4.6.1.	by Use of $\text{GeX}_2$ or $\text{GeR}_2$ .	273
5.8.4.6.2.	by Use of $[\text{GeX}_3]^-$ .	275
5.8.4.7.	from Germyl Amides by Reaction with Transition- or Inner-Transition-Metal Hydrides.	276
5.8.4.8.	from Species Containing Ge Bonded to Unsaturated Ligands.	277
5.8.5.	The Formation of the Tin-Transition- or Inner Transition-Metal Bond	277
5.8.5.1.	from the Elements.	278
5.8.5.2.	from Organotin Hydrides	278
5.8.5.2.1.	by Reaction with Mononuclear Transition- or Inner Transition-Metal Carbonyl Derivatives.	278
5.8.5.2.2.	by Reaction with Polynuclear Transition- or Inner Transition-Metal Carbonyl Derivatives.	279

---

5.8.5.2.3.	by Reaction with Transition- or Inner Transition-Metal–Halide and –Amide Complexes.	279
5.8.5.2.4.	by Reaction with Transition-Metal or Inner Transition-Metal–Olefin Complexes.	280
5.8.5.2.5.	by Reaction with Silyl–Transition-Metal or –Inner Transition-Metal Complexes.	280
5.8.5.3.	from Tin(IV) and Organotin Halides	280
5.8.5.3.1.	by Reaction with a Reactive Metal Derivative of a Transition-Metal Complex or Inner Transition-Metal Complex.	280
5.8.5.3.2.	by Reaction with a Transition- or Inner Transition-Metal–Hydride Complex.	283
5.8.5.3.3.	by Reaction with a Transition- or Inner Transition-Metal–Mercury Complex.	283
5.8.5.3.4.	by Reaction with Mononuclear Transition-Metal Carbonyl Derivatives.	283
5.8.5.3.5.	by Reaction with Polynuclear Transition- or inner Transition-Metal Carbonyl Derivatives.	284
5.8.5.3.6.	by Reaction with Transition- or Inner Transition-Metal–Olefin Complexes and Other Complexes with Readily Displaceable Ligands.	285
5.8.5.4.	from Organotin–Nitrogen Compounds	286
5.8.5.4.1.	by Reaction with an Organotin Amide with a Transition- or Inner Transition-Metal–Hydride Complex.	286
5.8.5.4.2.	by Reaction of an Organotin Azide with a Transition- or Inner Transition-Metal–Hydride Complex.	286
5.8.5.4.3.	by Reaction of Organotin–Nitrogen Compounds with Other Complexes of the Transition or Inner Transition Metals.	286
5.8.5.5.	from Stannyl–Active Metal Reagents	287
5.8.5.5.1.	by Reaction with Transition- or Inner Transition-Metal–Halide Complexes.	287

---

5.8.5.6.	from Tetraorganotin Compounds	288
5.8.5.6.1.	by Reaction of Alkynyltin Compound unit Transition- or Inner Transition-Metal–Carbonyl Complexes.	288
5.8.5.6.2.	by Reaction of Vinyltin Compounds with Transition- or Inner Transition- Metal–Carbonyl Complexes.	288
5.8.5.6.3.	by Reaction of Allyltin Compound with Transition- or Inner Transition- Metal–Carbonyl and Other Complexes.	289
5.8.5.6.4.	by Reaction of Aryltin Compound and Cyclopentadienyltin Compounds with Transition- or Inner Transition- Metal–Carbonyl and Other Complexes.	289
5.8.5.7.	from Hexalkylditin Compounds by Reaction with Low-Valent Transition- or Inner Transition-Metal Complexes.	290
5.8.5.8.	from Tin(II) Halides and Related Tin(II) Compounds	290
5.8.5.8.1.	by Reaction with Transition- or Inner Transition-Metal Halide Complexes.	290
5.8.5.8.2.	by Reaction with a Transition- or Inner Transition-Metal–Metal Akyl or Hydride Complex.	293
5.8.5.8.3.	by Reaction with Transition- or Inner Transition-Metal–Carbonyl and Similar Complexes.	293
5.8.5.8.4.	Miscellaneous Reactions of Sn(II) Compounds.	294
5.8.6.	The Formation of the Lead–Transition or Inner Transition-Metal Bond	295
5.8.6.1.	from the Elements.	295
5.8.6.2.	from Organolead Halides by Reaction with Transition- or Inner Transition- Metal–Anion Complexes.	295
5.8.6.3.	from Organolead Hydroxides and Other Organolead Salts.	297
5.8.6.4.	from Organolead Anion Reagents by Reaction with Transition- or Inner Transition-Metal–Halide Complexes.	297
5.8.6.5.	by Other Methods.	297

---

<b>5.9.</b>	<b>The Formation of the Group IVB–Group 0 Element Bond</b>	<b>298</b>
<b>5.10.</b>	<b>The Formation of Carbides, Silicides and Germides</b>	<b>299</b>
5.10.1.	Introduction	299
5.10.2.	The Formation of Carbides	299
5.10.2.1.	Formation of Group I Carbides	300
5.10.2.1.1.	Lithium Carbides.	300
5.10.2.1.2.	Sodium Carbides.	301
5.10.2.1.3.	Potassium, Rubidium and Cesium Carbides.	302
5.10.2.2.	Formation of the Group-II Carbides	302
5.10.2.2.1.	Beryllium Carbide.	302
5.10.2.2.2.	Magnesium Carbide.	302
5.10.2.2.3.	Calcium Carbide.	303
5.10.2.2.4.	Strontium Carbide.	303
5.10.2.2.5.	Barium Carbide.	304
5.10.2.3.	Formation of Group-IIIB Carbides	304
5.10.2.3.1.	Boron Carbides.	304
5.10.2.3.2.	Aluminium Carbide.	305
5.10.2.4.	Formation of Group-IVB Carbides	305
5.10.2.5.	Formation of Sc, Y and La Carbides	306
5.10.2.5.1.	Scandium Carbides.	307
5.10.2.5.2.	Yttrium Carbides.	307
5.10.2.5.3.	Lanthanum Carbides.	307
5.10.2.6.	Formation of the Rare-Earth Carbides	308
5.10.2.7.	Actinide Carbides	308
5.10.2.7.1.	Thorium Carbides.	308
5.10.2.7.2.	Uranium Carbides.	309
5.10.2.7.3.	Plutonium Carbides.	310
5.10.2.8.	The Formation of Transition-Metal Carbides	310
5.10.2.8.1.	Titanium, Zirconium and Hafnium Carbides.	311
5.10.2.8.2.	Vanadium, Niobium and Tantalum Carbides.	312
5.10.2.8.3.	Chromium Carbides.	313
5.10.2.8.4.	Molybdenum Carbides.	314
5.10.2.8.5.	Tungsten Carbides.	314
5.10.2.8.6.	Manganese Carbide.	315
5.10.2.8.7.	Technetium Carbide.	316
5.10.2.8.8.	Rhenium Carbide.	316

---

5.10.2.9.	Formation of Group-VIII Carbides	316
5.10.2.9.1.	Iron Carbides.	316
5.10.2.9.2.	Cobalt Carbides.	317
5.10.2.9.3.	Nickel Carbides.	318
5.10.2.9.4.	Ruthenium and Osmium Carbide.	318
5.10.2.9.5.	Carbides of Rhodium, Palladium, Iridium, and Platinum.	318
5.10.2.10.	The Formation of Complex Carbides	318
5.10.2.10.1.	Metal-Metal-Carbon Carbides	318
5.10.2.10.2.	Transition Metal–Nonmetal–Carbon Carbides.	319
5.10.2.10.3.	Multicomponent Carbides.	321
5.10.3.	The Formation of Silicides	323
5.10.3.1.	of Groups IA and IIA.	325
5.10.3.2.	of Transition-, Inner-Transition and Group-IB and -IIB Metal Silicides.	326
5.10.2.3.1.	Transition-Metal Silicides	326
5.10.3.2.2.	of Inner-Transition-Metal Silicides.	338
5.10.3.2.3.	of Silicides of Groups IB and IIB.	339
5.10.3.3.	of Ternary and Multicomponent Silicides.	339
5.10.4.	The Formation of Germanides	340
5.10.4.1.	Formation of Binary Germanides.	340
5.10.4.2.	Formation of Ternary Germanides.	343
List of Abbreviations		345
Author Index		351
Compound Index		423
Subject Index		625
