Introduction to Volume 1 and Instructions for the Use of this Book and its Indexes	1
Chapter I. Organometallic Reagents, Solvents and Laboratory Equipment	3
1. Strongly Basic Reagents used in Organic Synthesis	3
2. Solvents and Some Reagents: Their Analysis, Purification and Storage	6
3. Laboratory Equipment and Some General Remarks Concerning Performance of the Procedures	8
4. Safety, Handling and Methods of Disposal	11
4.1 Introduction	11
4.2 Organoalkali Reagents	11
4.3 Alkali Metals	14
4.4 Alkali Metal Amides	16
5. Experimental Procedures	17
5.1 <i>n</i> -Butyllithium in Diethyl Ether	17
5.2 <i>n</i> -Butyllithium · TMEDA (in Hexane).	18
5.3 <i>n</i> -Butyllithium, Complexed with Potassium <i>t</i> -Butoxide in THF	18
5.4 <i>n</i> -Butyllithium, Complexed with Sodium- or Potassium <i>t</i> -Butoxide and TMEDA in Hexane or Pentane	19
5.5 Lithium Diisopropylamide	19
5.6 Lithium Amide in Liquid Ammonia	20
5.7 Sodamide in Liquid Ammonia	21
5.8 Potassium Amide in Liquid Ammonia	22
Chapter II. Reactivity of Polar Organometallic Intermediates	25
1. Introduction	25
2. General Remarks About Reactivity	25
3. Alkylation Reactions	26
3.1 Reactivity of the Various Types of Alkylation Reagents	26
3.2 Possible Influence of the Thermodynamic Basicity and Polarisability	29
3.3 Reactivity of Some <i>ortho</i> -Lithiated Benzene Derivatives	30
4. Acylation Reactions	30
5. Carboxylation	33
6. Additions to Carbonyl Compounds	34
7. Additions to Heterocumulenes	34
8. Reactions with Sulfenylating Reagents	36
9. Reactions with Elemental Sulfur, Selenium and Tellurium	37
10. Reactions with Sulfur Dichloride	38

11.	Trimethylsilylation	38
12.	Introduction of Chlorine, Bromine and Iodine	38
13.	Protonation and Deuteration	40
14.	Exchange Between Counter Ions	41

Chapter III. Metallated Olefinic and Allenic Hydrocarbons 43

1.	Deprotonation with Strongly Basic Reagents	43
2.	Halogen-Lithium and Tin-Lithium Exchange	45
3.	Direct Preparation from Halogen Compounds and Metal	46
4.	Experimental Procedures	47
4.1	Vinylmagnesium Bromide	47
4.2	Trimethylsilylethene	48
4.3	Tetravinyltin	49
4.4	Reaction of Alkenylmagnesium Bromide with Benzaldehyde	49
4.5	1-Cyclohexenyl- and 1-Cycloheptenyllithium	50
4.6	1-Cyclohexenecarboxaldehyde and 1-Cycloheptenecarboxaldehyde	51
4.7	Metallation of Norbornene and Norbornadiene	52
4.8	Norbornadienecarboxaldehyde	53
4.9	Reaction of Norbornenyllithium with Methyl Chloroformate	54
4.10	Metallation of Cyclopentene and Subsequent Methylthiolation	54
4.11	2-Hexyl-1-Methylcyclopropene	55
4.12	Lithiation of 1-Methylcyclopropene and Subsequent Reaction with Benzaldehyde	57
4.13	1,3-Dimetallation of Vinylacetylene and Subsequent Reaction with two Equivalents of Me_3SiCl and one Equivalent of $n\text{-C}_7\text{H}_{15}\text{Br}$	58
4.14	Metallation of Allene with Butyllithium	61
4.15	1,2-Decadiene from Allenyllithium	61
4.16	2,3-Butadienoic Acid from Allenyllithium	62
4.17	Allenylmagnesium Bromide	63
4.18	Lithiation of 1.1-Dimethylallene	64
4.19	Metallation of 2-Alkynes with Butyllithium	64
4.20	1-Chlorocyclohexene and 1-Chlorocycloheptene	65
4.21	1-Bromo-2-Methylpropene	66
4.22	Vinylacetylene	67
4.23	1-Methylcyclopropene	67
4.24	Metallation of Ethene	69
4.25	Metallation of Norbornene and Norbornadiene with $\text{BuLi} \cdot t\text{-BuOK} \cdot \text{TMEDA}$	70
4.26	Z-2-Lithio-1-Ethoxyethene	70
4.27	1-Lithio-1-Phenylethene	72

Chapter IV. Metallation of Hetero-Substituted Unsaturated Systems 75

1.	Introduction	75
2.	α -Metallation of 1-Alkenyl Ethers, -Thioethers and Related Systems	76
3.	α -Metallation of 1.3-Dienyl Ethers and -Thioethers	78
4.	α -Metallated Haloalkenes	78

5.	α -Metallated Allenic Ethers, -Thioethers and -Amines	79
6.	Metallated 1,2,3-Butatrienyl Ethers, -Sulfides and -Amines	82
7.	Addendum: Metallation of <i>N,N</i> -Dialkylformamides and -Thioformamides	83
8.	Experimental Procedures	83
8.1	Metallation of Ethyl Vinyl Ether	83
8.2	Coupling of Metallated Ethyl Vinyl Ether with Nonyl Bromide and Acetone	84
8.3	Metallation of 2,3-Dihydrofuran and 2,3-Dihydropyran and Subsequent Alkylthiolation	86
8.4	Metallation of 5-Chloro-2,3-Dihydropyran and Subsequent Methylthiolation	87
8.5	α -Metallation of Methyl Vinyl Sulfide	88
8.6	Reaction of Metallated Methyl Vinyl Sulfide with Oxirane, Acetone and Methyl Isothiocyanate	89
8.7	Lithiation of <i>Z</i> -1,2-bis (Methylthio)Ethene and Subsequent Methylation	90
8.8	Lithiation of 1,4-Dithiin and Subsequent Functionalization	91
8.9	Metallation of <i>E</i> - and <i>Z</i> -1-Methoxy-1,3-Butadiene and 1-Methylthio- 1,3-Butadiene	92
8.10	Metallation of 2H-Thiopyran	93
8.11	Metallation of <i>E</i> -Dichloroethene and Subsequent Alkylation with Bromohexane	94
8.12	Conversion of 2-Chloro-1,1-bis(Dimethylamino)Ethene into bis(Dimethylamino)Ethyne	95
8.13	Metallation of Methoxyallene	96
8.14	Metallation of 1-Alkynyl Sulfides in Organic Solvents	96
8.15	Metallation of Allenic Amines and Acetylenic Amines	97
8.16	Trimethylsilylation of Metallated Diethylaminoallene	98
8.17	Conversion of a 2-Alkynyl Ether into an 1-Alkylated Allenyl Ether	99
8.18	Conversion of a Tertiary Acetylenic Amine into the Allenic Isomer <i>via</i> the Metallic Intermediates	100
8.19	Preparation of Dimethylaminobutatriene <i>via</i> the Metallic Intermediate	102
8.20	Preparation of a Metallated Cumulenenic Amine <i>via</i> 1,4-Elimination, and Subsequent Reaction with Trimethylchlorosilane	104
8.21	Lithiation of 1-Ethylthio-3-Buten-1-Yne and Subsequent Hydrolysis to Ethylthiobutatriene	105
8.22	5-Chloro-2,3-Dihydropyran	106
8.23	Vinyl Alkyl and Vinyl Aryl Sulfides	107
8.24	<i>Z</i> -bis(Methylthio)Ethene	108
8.25	2H-Thiopyran	109
8.26	1,2-Chloro-1,1-Bis(Dimethylamino)/Ethene	110
8.27	3-Methoxy 3-Methyl-1-Butyne and 1-(Dimethylamino)-4-Methoxy-4- Methyl-2-Pentyne	111
8.28	Lithiation of <i>N,N</i> -Dimethylformamide and <i>N,N</i> -Dimethyl- thioformamide	112
8.29	<i>N,N</i> -Dimethylthioformamide	113

Chapter V. Metallated Hetero-Aromatic Compounds	114
1. Introduction	114
2. Metallated Furans, Pyrroles, Thiophenes, Selenophenes and Tellurophenes	114
2.1 Direct Metallation by Strong Bases	114
2.2 Halogen-Lithium Exchange	117
2.3 Grignard Derivatives	118
3. Metallated Pyridines	119
3.1 Direct Metallation	119
3.2 Halogen-Lithium Exchange	120
4. Metallated Hetero-Aromatics with more than one Hetero Atom	120
5. Experimental Procedures	121
5.1 2-Methylthiophene	121
5.2 3-Allylthiophene	123
5.3 2-Butylthiophene	124
5.4 2-(2-Thienyl)Ethanol	125
5.5 2-Furancarboxaldehyde Diethylacetal and 2-Thiophenecarbox- aldehyde Diethylacetal	126
5.6 2-Octylfuran	127
5.7 2-Benzylfuran and 2-Benzylthiophene	128
5.8 2-Butyl-1-Methylpyrrole	129
5.9 3-Bromo-2-Ethylthiophene and 3-Bromo-2-(1-Hydroxyethyl)- Thiophene	130
5.10 5-Ethyl-2-(Methylthio)Thiazole	132
5.11 2-Methyl-2H-Thieno[2,3-b]Thiopyran	133
5.12 2-Bromofuran	134
5.13 2-Iodofuran	135
5.14 1-Methylpyrrole-2-Carboxylic Acid	136
5.15 1-Methyl-2-(Methylthio)Imidazole	138
5.16 2-Trimethylsilyl-1,3-Thiazole	138
5.17 2-(Trimethylsilyl)Benzothiazole	140
5.18 Reaction of Benzothiazole with Sodamide in Liquid Ammonia and Subsequent Ethylation and Methylthiolation. Formation of 2-(Ethylthio)Phenyl Isocyanide and 2-(Methylthio)benzothiazole	141
5.19 4-Methyl-2-Thiazolecarboxaldehyde	142
5.20 2-Tellurophenecarboxaldehyde	143
5.21 2-Selenophenecarboxaldehyde	144
5.22 Methyl 2-Thiophenecarboxylate	145
5.23 <i>N,N</i> -Dimethyl-2-Furancarboxamide and <i>N,N</i> -Dimethyl-2- Thiophenecarboxamide	146
5.24 Methyl-2-Thiophenecarbodithioate	148
5.25 Methyl-2-Furancarbodithioate	149
5.26 3-Thiophenethiol	150
5.27 2-(Methylseleno)Thiophene and 2-(Methyltelluro)Thiophene	151
5.28 Reaction of Metallated Hetero-Aromates with Methyl Isothiocyanate Phenyl Isothiocyanate, Phenyl Isocyanate and Phenyl Sulfinylamine	152

5.29	Regiospecific Vicinal Metallation of 3-Bromothiophene and Preparation of Derivatives	154
5.30	Lithiation of 2-Bromofuran and 2-Bromothiophene in the 5-Position; Preparation of 2-Bromo-5-(Methylthio)Furan and -Thiophene	156
5.31	3-Iodothiophene	157
5.32	3- <i>t</i> -Butoxythiophene	158
5.33	3-Substituted Thiophenes from 3-Bromothiophene	160
5.34	2-Formyl-3-(Methoxymethyl)Thiophene	161
5.35	Di(2-Furyl)Sulfide, di(2-Thienyl)Sulfide and di(3-Thienyl)Sulfide	162
5.36	2,2'-Bifuryl, 2,2'-Bithienyl and 3,3'-Bithienyl	163
5.37	2,5-Dimetallation of Thiophene. Preparation of 2,5-bis(Trimethylsilyl)Thiophene	164
5.38	2,5-Dimetallation of Furan. Preparation of 2,5-bis(Methylthio)Furan	165
5.39	1-Methyl-2-(Methylthio)Pyrrole	166
5.40	2-Iodo-1-Methylpyrrole	167
5.41	2-Chlorobenzo(b)Thiophene	168
5.42	2-Fluoro-3-Methylthio-Pyridine	169
5.43	3-Chloro-4-Trimethylsilyl-Pyridine	170
5.44	3-Deuterio- and 3-Methylthio-Pyridine	172
5.45	3-Trimethylsilyl-Quinoline	174
5.46	4-Iodopyridine	175
5.47	3-Bromothiophene	176
5.48	2-Bromothiophene	177
5.49	3-Bromoquinoline	177
5.50	2-Thienyl Propargyl Sulfide 2H-Thieno(2,3-b)Thiopyran and 2-Methylthieno(2,3-b)Thiophene	178
5.51	Methyl Dithiocarbamate	179
5.52	2-Methylthio-Thiazole and 4-Methyl-2-Methylthio-Thiazole	180
5.53	Thiazole and 4-Methylthiazole	181
5.54	Selenophene and Tellurophene	182
5.55	Methyl Thiocyanate	183
5.56	Sulfur Dichloride	184

Chapter VI. Metallated Aromatic Compounds 185

1.	Metallated Aromatic Hydrocarbons	185
1.1	Deprotonation by Strongly Basic Reagents	185
1.2	Bromine-Lithium Exchange	186
1.3	Reaction of Arene Derivatives with Metals	187
2.	Metallated Hetero-Substituted Arenes	187
2.1	Deprotonation by Strongly Basic Reagents	187
2.2	Halogen-Lithium Exchange	188
3.	Experimental Procedures	189
3.1	General Procedure for Bromine-Lithium Exchange	189
3.2	Derivatization Reactions with Aryllithium, Obtained by Br-Li Exchange	190

3.3	Reaction of Aryllithium with Carbon Disulfide and Subsequent Methylation	191
3.4	Reaction of <i>p</i> -Fluorophenyllithium with Epoxyethane and Paraformaldehyde	192
3.5	Phenyllithium from Benzene and BuLi · TMEDA in Hexane	192
3.6	Phenylpotassium from Benzene, BuLi · <i>t</i> -BuOK and TMEDA in Hexane	193
3.7	Metallation of Naphthalene with BuLi, <i>t</i> -BuOK · TMEDA and Subsequent Methylthiolation	194
3.8	Preparation of 1,8-Dilithionaphthalene	195
3.9	Reaction of Phenyllithium · TMEDA with Elemental Selenium and Tellurium	197
3.10	<i>ortho</i> -Metallation of Hetero-Substituted Benzene and Naphthalene with BuLi · TMEDA in Hexane	198
3.11	Ring-Metallation of Benzyl Dimethylamine, <i>N,N</i> -Dimethylaniline and Benzylalcohol	200
3.12	Metallation of Phenyl Ethers with BuLi in THF	203
3.13	Metallation of Fluorobenzene with BuLi · <i>t</i> -BuOK and BuLi · TMEDA	205
3.14	Dimetallation of Phenylacetylene with BuLi · <i>t</i> -BuOK in THF-Hexane and with BuLi · <i>t</i> -BuOK · TMEDA in Hexane	207
3.15	Lithiation of <i>N,N</i> -Dimethyl-Benzenesulfonamide and Subsequent Methylation	208
3.16	Metallation of <i>N</i> -Methyl Benzenecarbothioamide and Subsequent Trimethylsilylation	209
3.17	Protection of the Formyl Group in Benzaldehyde and Subsequent <i>ortho</i> -Lithiation and Trimethylsilylation	210
3.18	Reaction and Phenylmagnesium Bromide with 1,2-Dibromodiethyl Ether, Preparation of 1-Ethoxy-1-Phenylethene	212
3.19	Generation of <i>o</i> -Lithiochlorobenzene from 2-Bromochlorobenzene	213

Appendix

1.	Generation of Polar Organometallic Intermediate by Deprotonation with Strongly Basic Reagents	215
2.	Metallation-Functionalization Index	218
3.	Index of Reaction Types	230
	References	235
