

CONTENTS

Part 1	Ionic Polymerization	1
1.1	Control of Polymerization for Molecular Design	3
	<i>by Shohei Inoue</i>	
	Abstract	4
	Introduction	4
	Synthesis of Polymer with Narrow Molecular Weight Distribution	4
	Addition Polymerization	4
	Ring-Opening Polymerization	6
	Copolymerization	7
	Control of Copolymer Sequence	8
	Synthesis of Block Copolymer	8
	Synthesis of Macromonomer for Graft Copolymer	9
	Asymmetric Polymerization	11
	Conclusion	12
	References	12
1.2	Cationic Ring-Opening Polymerization of Bicyclic Acetals in Relation to the Synthesis of Polysaccharides	15
	<i>by Hiroshi Sumitomo and Masahiko Okada</i>	
	Abstract	16
	Introduction	16
	Steric Control in the Cationic Ring-Opening Polymerization of Bicyclic Acetals	17
	Direction of Monomer Addition to Active Site	18
	Enantiomer Selection at Growing Chain End	20
	Synthesis of Structurally Controlled (1→6)-Polysaccharides	21
	3,4-Dideoxy-(1→6)- α -DL- <i>erythro</i> -hexopyranan	22
	3,4-Dideoxy-(1→6)- α -DL- <i>threo</i> -hexopyranan	22
	4-Deoxy-(1→6)- α -D,L- <i>xylo</i> -hexopyranan	23
	Water Sorption of Dextran-Type Synthetic Polysaccharides	23
	4-Deoxy-(1→6) β -DL- and -L- <i>ribo</i> -hexopyranan	24
	Regioselectively Deoxygenated (1→6)- α -D-Glucopyranan	25
	Regioselectively Substituted (1→6)- α -D-Glucopyranans	25
	(1→6)- α -D-Glucopyranans Having Long Alkyl Group in Position 3	26
	Related Current Topics on the Synthesis of Polysaccharides by the Ring-Opening Polymerization of Anhydrosugar Derivatives	26
	Selective Ring-Opening Polymerization of Di- <i>O</i> -substituted 1,4-Anhydro- α -D-pyranoses	26
	Ring-Opening Polymerization of 1,6-Anhydro-2,3,4-tri- <i>O</i> -benzyl- β -D-allopyranose	27
	Ring-Opening Polymerization of Anhydro-Deoxy-Sugar Derivatives	27
	Conclusion	28

1.3	Asymmetric Polymerization of Bulky Methacrylates. Optically Active Polymers Based on Helicity	31
	<i>by Yoshio Okamoto, Haruhiko Mohri, Motoshi Ishikura and Koichi Hatada</i>	
	Abstract	32
	Introduction	32
	Polymerization of TrMA	33
	Polymerization of D2PyMA	37
	Polymerization of D4PyMA	40
	Conformational Stability of Polymers	41
	Polymerization of Other Methacrylates	41
	Resolution of Enantiomer on the Polymers	42
	Acknowledgement	42
	References	43
1.4	Macrocyclic Polystyrenes	45
	<i>by J. Roovers</i>	
	Abstract	46
	Introduction	46
	Experimental	47
	Synthesis	47
	Properties	48
	Results and Discussion	48
	Synthesis and Characterization	48
	Dilute Solution Properties	50
	Melt Properties	52
	Conclusions	53
	References	54
Part 2	Polymers in Biological Systems	55
2.1	Recent Trends in the Development of Biocompatible Polymers	57
	<i>by Yukio Imanishi</i>	
	Abstract	58
	Introduction	58
	Hybridization of Synthetic Polymers with Biologically Derived Substances	59
	Hybridization of Synthetic Polymers with Collagen	59
	Hybridization of Synthetic Polymers with Fibrin	61
	Hybridization of Synthetic Polymers with Albumin	62
	Hybridization of Synthetic Polymers with Secretory Cells	63
