VOLUME I PART E

ALIPHATIC COMPOUNDS

Trihydric alcohols, their oxidation products and derivatives

ELSEVIER SCIENTIFIC PUBLISHING COMPANY

AMSTERDAM OXFORD NEW YORK

1976

CONTENTS

VOLUME I E

Aliphatic Compounds. Trihydric alcohols, their oxidation products and derivatives

PREFACE	VII
OFFICIAL PUBLICATIONS; SCIENTIFIC JOURNALS AND PERIODICALS	XIV
LIST OF COMMON ABBREVIATIONS AND SYMBOLS USED	XV

*Chapter 18. Trihydric Alcohols, their Analogues and Derivatives and their
Oxidation Products: Trihydric Alcohols to Triketones*
by P. W. KENT AND K. R. WOOD

1. Trihydric alcohols and their derivatives	2
a. Glycerol, glyceritol, propane-1,2,3-triol	2
b. Glycerol esters of inorganic acids	11
(i) Halogen esters; halo- or halogeno-hydrins, 11 – (ii) Esters of nitric acid and nitrous acid, 17 – (iii) Glycerol sulphates, 18 – (iv) Carbonates of glycerol, 18 – (v) Borates of glycerol, 18 – (vi) Glycerol phosphates (glycerophosphoric acids), 19 –	
c. Glycerol esters of the fatty acids. Glycerides; lipids	23
(i) Esters of formic acid, formins, 24 – (ii) Esters of acetic acid, acetins, 24 – (iii) Esters of butyric acid, butyrins, 25 – (iv) Glycerides of the higher fatty acids, 25 – (v) Esters of other organic acids, 30 –	
d. Glycerol ethers	30
(i) Lower glycerol monoethers, 30 – (ii) Lower glycerol diethers, 32 – (iii) Glycerol triethers, 33 – (iv) Higher alkyl ethers of glycerol, 33 – (v) Polyglycerols, 35 –	
e. Cyclic alkylidene ethers. Acetals and ketals	36
(i) Methyleneglycerols, 37 – (ii) Ethyleneglycerols, 37 – (iii) Isopropylidene-glycerols, 38 – (iv) Cycloalkylidene- and aralkylidene-glycerols, 38 –	
f. Glycide compounds	39
(i) Glycidol, glycide, epihydrin alcohol, 2,3-epoxypropan-1-ol, 39 – (ii) Epihalohydrins, 40 – (iii) Glycide esters, 42 – (iv) Glycide ethers, 42 –	
g. Sulphur analogues of glycerol	43
h. Nitrogen analogues of glycerol	47
i. Homologous trihydric alcohols; alkyl-substituted derivatives of glycerol	50
(i) Monoalkylglycerols, 50 – (ii) Dialkyl glycerols, 51 – (iii) Trialkylglycerols, 52 – (iv) Tetra-alkyl glycerols, 52 – (v) Penta-alkyl glycerols, 52 –	
j. Triprimary glycerols; trimethylolalkanes	53
k. Other triols	54
l. Derivatives of homologous trihydric alcohols	58
(i) Halogen esters of homologous trihydric alcohols and ethers, 58 – (ii) Fatty acid esters and alkyl ethers of homologous trihydric alcohols, 59 – (iii) Epoxides of homologous trihydric alcohols, 59 –	
m. Sulphur analogues of homologous trihydric alcohols	60
n. Nitrogen analogues of homologous trihydric alcohols	60

2. Dihydroxyaldehydes and related compounds	61
a. Glyceraldehydes	61
(i) DL-Glyceraldehyde and its derivatives, 61 – (ii) D- and L-Glyceraldehydes and their derivatives, 65 – (iii) Dihydroxybutyraldehydes, 68 –	
3. Dihydroxyketones and related compounds	69
a. Dihydroxyacetone and its derivatives	69
(i) Dihydroxyacetone, 1,3-dihydroxypropan-2-one, oxantin, 69 – (ii) Derivatives of dihydroxyacetone, 70 – (iii) N- and S-Analogues of dihydroxyacetone, 72 –	
b. Homologous dihydroxyketones	72
(i) Oxetones, 72 –	
4. Monohydroxydialdehydes; reductones and related compounds	74
a. Hydroxymalondialdehydes and their derivatives	74
b. Analogues of hydroxymalondialdehyde	75
5. Monohydroxyaldehydoketones and related compounds	76
6. Monohydroxydiketones and related compounds	76
7. Dialdehydoketones	79
8. Aldehydodiketones and related compounds	79
9. Triketones and related compounds	80

Chapter 19. Trihydric Alcohols and their Oxidation Products (continued).

Dihydroxycarboxylic Acids and Trihydroxycarboxylic Acids and Related Compounds
by B. J. COFFIN AND C. N. C. DREY

1. Dihydroxycarboxylic acids and related compounds	83
a. Dihydroxycarboxylic acids	83
(i) Occurrence, 83 – (ii) General methods of formation, 84 – (iii) C ₃ -dihydroxycarboxylic acids, 84 – (iv) C ₄ -dihydroxycarboxylic acids; dihydroxybutanoic acids, 88 – (v) C ₅ -dihydroxycarboxylic acid, 92 – (vi) C ₆ -dihydroxycarboxylic acids, 92 – (vii) Higher dihydroxycarboxylic acids, 107 –	
b. Anhydrides of the dihydroxycarboxylic acids	113
(i) Epoxycarboxylic acids, 113 – (ii) Hydroxycarboxylic acid lactones; hydroxylactones, 125 –	
c. Aminohydroxycarboxylic acids	127
d. Aminomercaptocarboxylic acids	145
e. Derivatives of dimercaptocarboxylic acids	164
f. Diaminocarboxylic acids and related compounds	167
2. Hydroxyoxocarboxylic acids and related compounds	192
a. Hydroxyoxocarboxylic acids with adjacent OH and CO groups	193
b. Hydroxyoxocarboxylic acids with non-adjacent OH and CO groups	194
(i) 2,4-(α,γ)-Acids, 194 – (ii) Hydroxyoxocarboxylic acid lactones; tetronic acids, 195 –	
3. Dioxocarboxylic acids	206
a. Diformylcarboxylic acids	206
b. Formylloxocarboxylic acids	208
c. Diketonic dioxocarboxylic acids	210
(i) Dioxocarboxylic acids with adjacent oxo groups, 210 – (ii) Dioxocarboxylic acids with the oxo groups on alternate carbon atoms, 212 – (iii) Diacylcarboxylic acids in which the acyl and carbonyl groups are separated by two or more carbon atoms, 215 –	

*Chapter 20. Trihydric Alcohols and their Oxidation Products (continued).
Dihydroxycarboxylic Acids and Trihydroxycarboxylic Acids and Related Compounds
(second part)*

by B. J. COFFIN AND C. N. C. DREY

4. Hydroxy- and amino-dicarboxylic acids	217
a. The hydroxymalonic acid series	217
(i) The tarttronic acids, 217 – (ii) Alkyltarttronic acids; α -alkyl- α -hydroxymalonic acids, 219 – (iii) Hydroxyalkylmalonic acids, 220 – (iv) γ -Hydroxyalkylmalonic acids; 4-butanolide-2-carboxylic acids, 220 – (v) Aminomalonic acids, 222 –	
b. The succinic acid series	224
(i) α -Hydroxysuccinic acids, 224 – (ii) Thiomalic acid, 232 – (iii) Homologues of malic acid, 233 – (iv) Paraconic (4-butanolide-3-carboxylic) acids and related compounds, 237 – (v) Aminosuccinic acids, 250 –	
c. The hydroxyglutaric acid series	262
(i) α -Hydroxyglutaric acids, 262 – (ii) Aminoglutaric acids, 264 –	
d. Higher hydroxy- and amino-dicarboxylic acids	281
5. Oxodicarboxylic acids and their derivatives	284
a. Formyldicarboxylic acids	284
(i) Formylmalonic acid derivatives, 284 – (ii) Formylsuccinic acids, 287 – (iii) Unsaturated lactonic acids derived from formyldicarboxylic acids, 291 –	
b. Ketonic oxodicarboxylic acids and their derivatives	291
(i) The oxomalonic acid group, 292 – (ii) The oxosuccinic acid group, 302 – (iii) The oxoglutaric acid group, 317 – (iv) Higher oxoalkanedicarboxylic acids, 326 – (v) Olefinic oxodicarboxylic acids, 330 –	
6. Alkane- and alkene-tricarboxylic acids	330
a. Saturated tricarboxylic acids	330
(i) Tricarboxylic acids with two or three carboxyl groups attached to the same carbon atom, 330 – (ii) Tricarboxylic acids with the carboxyl groups attached to three different carbon atoms, 338 – (iii) Higher tricarboxylic acid derivatives, 343 –	
b. Alkenetricarboxylic acids	343

Chapter 21. Phospholipids and Glycolipids

by R. H. GIGG

General references, 350 –

1. Phospholipids and glycolipids based on glycerol	352
a. Acyl derivatives of glycerophosphoric acids	352
(i) Phosphatidic acids, 353 – (ii) Lysophosphatidic acids, 355 – (iii) Cytidine diphosphate diglyceride, 355 –	
b. Acyl derivatives of <i>sn</i> -glycerol 3-(2-aminoethyl phosphate) and its <i>N</i> -methyl derivatives	356
(i) Acyl derivatives of <i>sn</i> -glycerol 3-(2-aminoethyl phosphate), 356 – (ii) Phosphatidyl- <i>N</i> -methylethanolamines and - <i>N,N</i> -dimethylethanolamines, 361 – (iii) Acyl derivatives of <i>sn</i> -glycerol 3-(choline phosphate), 361 –	

c. Acyl derivatives of <i>sn</i> -glycerol 3-(L-serine phosphate) and other amino acid phosphates	369
(i) Phosphatidylserines, 369 – (ii) Phospholipids containing other amino acids, 370 –	
d. Acyl derivatives of <i>sn</i> -glycerol 3-(L-myoinositol 1-phosphate) and related compounds	371
(i) Phosphatidylinositols, 371 – (ii) Phosphate esters of phosphatidylinositols, 373 – (iii) Mannosides of phosphatidylinositols, 375 –	
e. Acyl derivatives of <i>sn</i> -glycerol 3-(<i>sn</i> -glycerol 1-phosphate) and related compounds	375
(i) Phosphatidylglycerols, 375 – (ii) Diphosphatidylglycerols. Cardiolipins, 378 –	
f. Glycosyl derivatives of diacylglycerols	380
(i) Galactosyl-diglycerides, 380 – (ii) Glucosyl-diglycerides, 382 – (iii) Other glycosyl-diglycerides, 384 – (iv) Plant sulpholipid, 385 –	
g. Phospholipids derived from glycerol ethers	386
(i) Plasmalogens, phosphatidal derivatives, 386 – (ii) Saturated ether lipids, 390 –	
2. Phospholipids and glycolipids based on sphingosine and related bases. Sphingolipids	394
a. Sphingosine bases and ceramides	394
(i) Sphingosine bases, 394 – (ii) Ceramides, 401 –	
b. Glycosides of ceramides	402
(i) Monoglycosyl-ceramides and derivatives, 403 – (ii) Neutral oligoglycosyl-ceramides, 409 – (iii) Glycosyl-ceramides containing sialic acids. Gangliosides, 418 –	
c. Sphingophospholipids. Derivatives of ceramide 1-phosphate	425
(i) Sphingomyelin, ceramide 1-(choline phosphate), 425 – (ii) Ceramide 1-(2-aminoethyl phosphonate), 428 – (iii) Ceramide 1-(2-aminoethyl phosphate), 429 – (iv) Ceramide 1-(glycerol 1-phosphate), 429 – (v) Phytoglycolipids, 430 –	
3. Miscellaneous phospholipids and glycolipids	431
