

# TABLE OF CONTENTS

Table of Contents.....	vii
Foreword .....	xiii
Preface.....	xv
Acknowledgements .....	xvii
Ross Scaife (1960-2008) .....	xxi
Cyberinfrastructure for Classical Philology .....	1
Terms and continuities .....	5
Wissenschaft and Philology .....	5
Classics and the Humanities .....	7
Infrastructure .....	10
Classics in 2008.....	12
Digital Incunabula: the <i>Thesaurus Linguae Graecae</i> (1972).....	20
Machine-actionable knowledge bases: the Perseus Digital Library (1987).....	24
Digital Communities: Stoa Publishing Consortium (1997) ....	27
Cyberinfrastructure .....	29
Producing new knowledge: ePhilology .....	30
Extending the intellectual reach of humanity: eClassics & eHumanities.....	39
Bibliography .....	46
Technology, Collaboration, and Undergraduate Research .....	57
Introduction .....	57
An Audience of More Than One.....	61
When All the Sources Are Online .....	66
From Each According. ....	73
Shaking the Foundations.....	76
Conclusion.....	84
Bibliography .....	85

Tachypaedia Byzantina: The Suda On Line as Collaborative	
Encyclopedia .....	89
Introduction .....	89
History of the Project .....	92
Technical and Social Interfaces .....	94
SOL and Other Projects .....	100
Conclusion .....	104
Bibliography .....	107
Exploring Historical RDF with Heml .....	111
Introduction .....	112
The Heml Data Model .....	115
Chronology .....	116
Similar Schemas .....	117
Visualizations .....	118
Areas For Improvement .....	121
RDF and Heml .....	122
Data-Entry for HemlRDF .....	124
RDF-Based Nested Events .....	124
HemlRDF and the CIDOC-CRM .....	127
Heml's Future .....	129
Projected Work .....	131
Conclusion .....	132
Acknowledgements .....	132
Bibliography .....	132
Digitizing Latin Incunabula: Challenges, Methods, and	
Possibilities .....	135
Introduction .....	136
Methods .....	138
Data Entry Methodology .....	142
Possibilities .....	145
Conclusion .....	147
Bibliography .....	150
Citation in Classical Studies .....	151
Overview .....	151
Changing Technologies and the Fate of Homer's	
Commentators .....	153
Citation as a Heuristic .....	155
Identification: What We Cite .....	156
How We Cite Objects .....	162

Syntax of a CTS URN .....	166
Beyond Citation: Architecture.....	169
Conclusion.....	170
Glossary of Technical Terms and Abbreviations.....	170
Bibliography .....	171
Digital Criticism: Editorial Standards for the Homer Multitext ...	173
Digital Criticism: Editorial Standards for the Homer Multitext.....	174
Textual Criticism of an Oral Poem in a Digital Medium.....	176
The <i>Iliad</i> and <i>Odyssey</i> as Oral Poetry .....	178
Variation in the Homeric Corpus: Two Examples .....	179
Representing Multiformity.....	182
Fluidity vs. Rigidity and a Diachronic Approach to Homeric Poetry.....	187
Foundational principles of the Homer Multitext.....	194
Bibliography .....	197
Epigraphy in 2017 .....	203
1. Background .....	204
1.1 Leiden .....	207
1.2 Digital Epigraphy Projects.....	209
1.3 Epidoc.....	210
2. Digital Leiden.....	213
3. Epigraphical Databases and Digital Publication .....	217
4. The Scholar and Digital Texts.....	219
Bibliography .....	221
Digital Geography and Classics.....	223
The View From 2017.....	223
The View, Explained (and what we have left out) .....	225
The Primacy of Location: A Recent Example Drawn from Google.....	229
Prelude to Geographic Search: Web-based Mapping.....	237
Web-mapping the Geographic Content of Texts: Example of the Perseus Atlas.....	239
The Geo-Library, the Web and Geographic Search.....	240
Big Science, Repositories, Neo-geography and Volunteered Geographic Information .....	244
The Electronic Cultural Atlas Initiative.....	247
The Stoa Waypoint Database and the Register of Ancient Geographic Entities .....	247

The Pleiades Project.....	250
Conclusion.....	253
Bibliography .....	254
What Your Teacher Told You is True: Latin Verbs Have Four	
Principal Parts .....	263
Introduction .....	264
Benefits.....	265
A Realizational KATR Theory for Latin .....	266
The Conjugation-1 Verb <i>laudāre</i> "Praise" .....	267
The VerbA Node.....	270
The Verb Node.....	272
Auxiliary Nodes .....	272
The Sandhi Node .....	275
Strategies for Building KATR Theories.....	276
An Implicative KATR Theory for Latin .....	277
The Paradigm Chart.....	277
Deriving the Essence of the Paradigm.....	282
Principal Parts .....	284
Grouping.....	288
Generating a KATR Theory.....	290
Conclusion.....	292
Acknowledgments .....	293
Glossary .....	293
Bibliography .....	294
Computational Linguistics and Classical Lexicography .....	297
Where are we now? .....	300
Where do we want to be?.....	302
How do we get there?.....	306
Word Sense Induction.....	306
Word Sense Disambiguation .....	310
Parsing.....	312
Beyond the lexicon.....	315
Searching by word sense .....	316
Searching by selectional preference.....	317
Conclusion.....	317
Bibliography .....	318
Classics in the Million Book Library .....	323
Introduction .....	325
From Curated Collections to Dynamic Corpora.....	329

Services for the humanities in very large collections .....	336
Fourth-Generation Collections .....	340
The Classical <i>Apographeme</i> .....	345
Three Technical Challenges .....	349
Conclusion.....	354
Appendix: Sample Page Images .....	354
Primary Sources .....	354
Editions of Fragmentary Authors and Works .....	362
Reference works .....	363
Bibliography .....	372
Conclusion: Cyberinfrastructure, the Scaife Digital Library and Classics in a Digital age.....	375
Opportunities: ePhilology and eClassics.....	378
ePhilology and Memographies .....	380
eClassics and Plato's Challenge .....	388
Classics and Cyberinfrastructure.....	391
Services for eClassics .....	395
Metrical Analysis.....	400
Collections for ePhilology.....	403
Publication for a Cyberinfrastructure.....	414
Archives, Libraries and Intellectual Discourse .....	414
Features of Publication in a Digital World.....	421
The Scaife Digital Library (SDL) .....	424
The Work of Scholarship: New Divisions of Labor in the world of Google and Wikipedia.....	428
Conclusion: Blood for the Shades .....	437
Bibliography .....	439
Author Biographies .....	447
Index.....	455
