1. Introduction to applied social psychology 1

LINDA STEG AND TALIB ROTHENGATTER

Introduction: social problems, human cognition, and behaviour 1
Definition of applied social psychology 4
Correspondence between basic and applied social psychology 8
- Developing and testing theories 8
- Basic and applied social psychology as science 9
- Goals of science 10
- Causes of behaviour and cognitions 11

Features of applied social psychology 14
- The role of personal values 14
- The use of multiple theories, intervention techniques, and research methods 16
- Interdisciplinary research 17
- Field settings 18
- Social utility 18

Roles of applied social psychologists 21
- Researcher 21
- Consultant 22
- Policy advisor 22

Overview of the book 22
Conclusion 23
Glossary 24
Review questions 24

2. The use of theory in applied social psychology 27

MICA ESTRADA AND P. WESLEY SCHULTZ

Introduction 27

digitalisiert durch:
IDS Basel Bern

The role of theory in the field of applied social psychology 28
Theories, principles, and constructs 31
Social-psychological theories 33
Social thinking 33
Social influence 36
Social relationships 39
Things to consider when using theory in applied work 43
How basic, applied, and use-inspired researchers develop theory 45
Conclusion 47
Glossary 47
Review questions 49
Further reading 49
References 49

3. Applications of social psychology to increase the impact of behaviour-focused intervention 52

PHILIP K. LEHMAN, E. SCOTT GELLER, AND JAN WILLEM BOLDERDIJK

Introduction 52
A behavioural-science approach to intervention 52
Behavioural intervention strategies 54
Antecedent strategies 54
Education and training 54
Prompts 55
Modelling 56
Behavioural commitment 56
Consequence strategies 57
Penalties 57
Rewards 58
Feedback 60
Enhancing interventions through social influence 61
Principle 1: consistency 62
Foot in the door 62
Cognitive dissonance 63
Public commitment 63
Principle 2: social proof 66
Normative prompts 67
Correcting misperceived norms 67
Normative feedback 67
Make participation salient 69
Principle 3: authority 69
Principle 4: liking 70
Block-leader approach 71
Principle 5: reciprocity 71
Pre-behaviour rewards 72

Pay-what-you-want 72
Principle 6: scarcity 72
Avoid reactance 73
Make potential losses salient 73
Fear appeals 74
Conclusion 74
Glossary 75
Review questions 77
Further reading 77

4. The dilemmatics approach to applied research design: a case study of violent video game effects and aggression 82

MELISSA BURKLEY AND HART BLANTON

Research designs in applied social psychology 82
Selecting a research design 82
True experiments: maximizing precision 84
Defining features of true experiments 84
Advantages of true experiments 86
Disadvantages of true experiments 88
Minimizing the disadvantages of true experiments 89
Correlational research: generalizing to situations 91
Defining features of correlational research 91
Advantages of correlational research 92
Disadvantages of correlational research 93
Minimizing the disadvantages of correlational studies 93
Quasi-experiments: compromising between precision and generalizability to situations 96
Defining features of quasi-experimental research 96
Advantages of quasi-experimental research 99
Disadvantages of quasi-experimental research 99
Survey research: generalizing to people 100
Defining features of survey research 100
Advantages of survey research 102
Disadvantages of survey research 102
Minimizing disadvantages of survey research 103
Rules for deciding between research designs 104
Rule #1: Pursue programmatic research 104
Rule #2: Do what has not been done before 104
Rule #3: Construct the best research team 104
Conclusion 105
Glossary 105
Review questions 106

Further reading 107
References 107

5. The social psychology of consumer behaviour 109

WOLFGANG STROEBE AND KEES KEIZER

Introduction 109
The function of goods 109
Deliberate versus impulsive buying 112
Theories of deliberate behaviour 112
Impulse buying 114
Goal conflicts, self-control dilemmas, and impulsive actions 115
The impact of advertising on consumer attitudes and behaviour 118
The cognitive route: advertising as persuasive communications 118
The affective route: evaluative conditioning 120
The subliminal route 122
Applied social psychology in context 124
Conclusions 125
Glossary 126
Review questions 126
Further reading 127
References 127

6. Social psychology and development aid 130

NINA HANSEN

Introduction 130
The evaluation of development aid interventions 131
Testing the effectiveness of development aid interventions 133
Development aid and social psychology 136
Unanticipated cultural change through laptop usage 140
Applied social psychology in context 144
Conclusions 146
Glossary 146
Review questions 147
Further reading 147
References 148

7. Social psychology and economic behaviour: heuristics and biases in decision-making and judgement 150

W. FRED VAN RAAIJ

Introduction 150
Economic theory of utility maximization 150

Anomalies 151
Social-psychological factors 152
Personal, social, and situational reference 152
Personal reference 152
Social reference (social comparison) 153
Situational reference 154
Loss aversion 155
Introduction 155
Framing 157
Hedonic framing 157
Endowment effect 160
Status-quo bias 161
Sunk-costs effect 163
Time preference 164
Conclusions: towards a new 'rationality' of economic behaviour of consumers, investors, and entrepreneurs 166
Applied social psychology in context 166
Conclusion 167
Glossary 168
Review questions 169
Further reading 170
References 170

8. Applying social psychology to the classroom 172

PASCAL HUGUET AND HANS KUYPER

Introduction 172
Social comparison 173
Upward social comparison in the classroom 175
Students' 'theories' of intelligence and academic self-concept 177
Academic self-concept of failure and performance 178
Academic self-concept of success and the BFLPE 180
Stereotype threat: the role of negative stereotypes 183
Classroom climate 185
Applied social psychology in context 186
Final thoughts 186
Conclusion 187
Glossary 188
Review questions 189
Further reading 189
References 190

9. Social psychology and environmental problems 193

LINDA STEG AND ROBERT GIFFORD

Introduction 193
Environmental influences on well-being and behaviour 194
Environmental problems and human behaviour 195
Understanding behaviour that affects the quality of the environment 198
Values and environmental concern 198
Norm activation model and value-belief-norm theory of environmentalism 200
Morality and personal costs 201
Habit 202
Promoting pro-environmental behaviour 204
Changing perceptions, cognitions, motivations, and norms 204
Changing the incentives 207
Applied social psychology in context 208
Conclusion 209
Glossary 209
Review questions 210
Further reading 210
References 211

10. Social psychology of health and illness 214

ARIE DIJKSTRA AND ALEXANDER ROTHMAN

Introduction 214
The societal burden of unhealthy behaviours 214
The societal burden of chronic illnesses 215
Contributions of social psychology to prevent and solve health problems 216
Understanding health and illness behaviours 217
Motivation and self-efficacy expectations 217
Motivation 217
Self-efficacy expectations 218
Initiation and implementation of behaviour 220
Illness behaviour 221
Stage models 222
Research methods to assess changes over time 223
Promoting healthy behaviour 225
Tailoring messages 225
Framing messages 227
Changing the environment 229
Applied social psychology in context 229
Conclusion 230
Glossary 230

Review questions 231
Further reading 232
References 232

11. Social psychology and immigration: relations between immigrants and host societies 235

JAN PIETER VAN OUDENHOVEN, CHARLES JUDD, AND COLLEEN WARD

Introduction 235
Migration and cultural diversity in the twenty-first century 235
Acculturation theory and research 237
One-dimensional models of acculturation 237
Multidimensional models of acculturation 238
Social-psychological theories and research 242
Acculturation research and social-psychological theories 245
Interventions 247
Applied social psychology in context: the influence of globalization on host-immigrant relationships 248
Conclusion 250
Glossary 251
Review questions 252
Further reading 252
References 252

12. Social psychology and mental health 255

PIETERNEL DIJKSTRA AND ABRAHAM P. BUUNK

Introduction 255
Disturbed body image 255
Consequences of disturbances in body image 259
Theoretical explanations of disturbed body image 259
Social comparison theory 259
Self-discrepancy theory 260
Helping cope with body image disturbances 261
Depression 262
Theoretical explanations of depression 263
Coping with stress 263
Attributional model of depression 264
Preventing depression 265
Relationship problems 266
Theoretical explanations of relationship problems 267
Attachment theory 267

Social exchange theory 268
Preventing relationship problems 271
Applied social psychology in context 272
Conclusion 272
Glossary 273
Review questions 274
Further reading 274
References 274

13. Explaining crime over the life course 277

ARJAN BLOKLAND

Introduction 277
Explaining the age-crime curve 277
Stable individual differences and crime: criminal propensity 278
The dynamics of criminal development: the Dual Taxonomy 279
Life course persistent offending 280
Adolescence-limited offending 282
The onset of Adolescence-limited offending 282
Desistance from Adolescence-limited offending 285
Cumulative disadvantage and continuity of offending 287
Policy implications 288
Critiques of the Dual Taxonomy 291
Social psychology in context 293
Conclusion 293
Glossary 294
Review questions 295
Further reading 295
References 295

14. The social psychology of organizations 298

DICK DE GILDER AND NAOMI ELLEMERS

Introduction 298
Social psychology of organizations 299
A social identity perspective on organizations 300
Work motivation and commitment 302
Innovation and change in organizations 304
Diversity at work 307
Classical organizational issues and the social psychology of organizations 312
Applying social psychology in organizations 312
Applied social psychology in context 314
Conclusions 315
Glossary 315

Review questions 316
Further reading 316
References 317

15. Social psychology and political behaviour 319

MARTIN ROSEMA AND BERT N. BAKKER

Introduction 319
Political leadership 321
'Big Five' personality factors 321
Profiling political leaders 322
Crisis decision-making 323
Groupthink 325
Voting behaviour 326
To vote or not to vote? 326
Theory of reasoned action 327
The Michigan model of voting 330
Motivated political reasoning 332
Ideology 334
Does ideology (still) exist? 334
Ideology and values 335
Prejudice 336
Applied social psychology in context 336
Conclusion 337
Acknowledgement 338
Glossary 338
Review questions 339
Further reading 339
References 340

16. Social sport and exercise psychology 342

REMCO POLMAN, ERIKA BORKOLES, AND XAVIER SANCHEZ

Introduction 342
Explaining and promoting exercise behaviour 343
The self in exercise 345
Explaining and enhancing sport performance 345
The dynamics of teams in sport: cohesion and performance 345
How to build successful teams 349
Best individual athletes do not make the best team 350
Social facilitation 352
Choking under pressure 353
Environmental influences on sport performance: game location/home advantage 354

Applied social psychology in context 356
Conclusion 356
Glossary 357
Review questions 358
Further reading 358
References 358

17. Social psychology and driving behaviour 361

AYÇA BERFU ÜNAL AND BRYAN E. PORTER

Introduction 361
Theories and models to explain driving behaviour 362
The 'what' factor: behavioural and attitudinal factors 362
The 'who' factor: influence of personality and individual differences on driving behaviour 363
The 'why and how' factors: understanding the processes behind the regulation of driver behaviour 365
Risk Homeostasis Theory 366
Task Capability Interface Model 367
Methods in traffic psychology 370
Driving simulators 370
Direct and naturalistic observations 371
Digging into databases: archival studies 372
Interventions to promote safe driving behaviour 372
Enforcement 372
Driver education 373
Persuasive messages 375
Applied social psychology in context 375
Conclusions 377
Glossary 377
Review questions 378
Further reading 378
References 378

Figure 8.2	The complex figure used by Huguet *et al.* (2001b)	178
Figure 8.3	Memory recall score of students (max = 44 points) by task context and academic standing	179
Figure 8.4	The big-fish-little-pond effect (BFLPE): theoretical predictions (adapted from Marsh and Hau, 2003)	182
Figure 9.1	The level of noise annoyance depends on social-psychological factors	195
Figure 9.2	World energy consumption by fuel type, 1990–2040 (EIA, International Energy Outlook, 2013)	197
Figure 9.3	A schematic representation of the VBN theory of environmentalism (adapted from Stern, 2000)	200
Figure 9.4	Self-serving denial	202
Figure 10.1	Percentages of healthy years lost caused by health-related behaviours and risk factors (World Health Organization, 2002)	216
Figure 10.2	Increasing self-efficacy	219
Figure 10.3	A stage model of health behaviour change	223
Figure 10.4	Computer-tailored persuasion composes individualized output (on paper or on screen) based on an individual assessment	226
Figure 10.5	Computer-tailored information	228
Figure 11.1	One-dimensional model of acculturation	237
Figure 11.2	A two-dimensional model of acculturation strategies (Berry, 1997)	238
Figure 11.3	Integration	239
Figure 11.4	Assimilation	239
Figure 11.5	Separation	240
Figure 11.6	Marginalization	240
Figure 11.7	Liking (1 = little; 5 = much) of 'neighbours' dependent on nationality, religion, and employment status (N = 2389)	243
Figure 12.1	Disturbed body image	256
Figure 12.2	Stimuli presented to the participants in Fallon and Rozin's study (1985)	258

Figure 12.3	Possible feared selves	261
Figure 12.4	Attachment theory: the four-group model of attachment	268
Figure 12.5	Relationship inequity	270
Figure 13.1	Age-crime curve based on the number of registered crime suspects in 2009	278
Figure 13.2	Who is the fledgling career criminal?	278
Figure 13.3	Schematic representation of the two developmental pathways proposed by the Dual Taxonomy	280
Figure 13.4	Bridging the maturity gap	283
Figure 13.5	Peer influences on deviance	285
Figure 13.6	Social control may explain desistance from crime	287
Figure 13.7	Labeling theory's self-fulfilling prophecy	289
Figure 14.1	An organization is a social arrangement for achieving controlled performance in pursuit of collective goals Diego Rivera, 1932 – Mural Ford Factories, Detroit	299
Figure 14.2	In a sports team, distinctive personal features are less important. What matters is how individuals can contribute to achieving team goals. Kazimir Malevich, 1928 – *Sportsmen*	301
Figure 14.3	Organizational-level (or team-level) comparisons can be a source of pride for individual employees, regardless of their personal merits or contributions to this success	302
Figure 14.4	In larger or multinational organizations, employees are likely to self-categorize and identify in terms of lower level and more specific units	303
Figure 14.5	Socialization programmes can make new employees more reluctant to share their fresh perspective by conveying what procedures, practices, and rules of conduct are considered standard, common, or acceptable in the organization	306
Figure 14.6	Components of identification and commitment in organizations (based on Ouwerkerk, Ellemers, and De Gilder, 1999)	308
Figure 14.7	With citizens originating from all parts of the world, the workforce is becoming increasingly diverse	308
Figure 14.8	Increased diversity implies that the variety of goals, ambitions, and motives among workers is greater than ever. Organizations that seek to enhance the motivation and performance of their workers need to cater for these diverging concerns by offering different incentives, career paths and growth opportunities, as one size no longer fits all	309
Figure 15.1	Poster used to encourage people to vote	320
Figure 15.2	Psychological processes bring leaders support from their staff	325
Figure 15.3	Why some people do not bother to vote	327
Figure 15.4	The relevance of politics to the young	328
Figure 15.5	Facebook messages to encourage voting (Bond *et al.* 2012, p.296)	329
Figure 15.6	The Michigan model of voting	331
Figure 15.7	Candidate differences determine level of electoral turnout	332

Figure 16.1 Together Everyone Achieves More (TEAM) 346
