

Contents

<i>Preface</i>	v
<i>Contributors</i>	ix
1 Amplicon-Based Targeted Next-Generation Sequencing of Formalin-Fixed, Paraffin-Embedded Tissue	1
<i>Eric Strengman, Françoise A. S. Barendrecht-Smouter, Carmen de Voijs, Paula de Vree, Isaac J. Nijman, and Wendy W. J. de Leng</i>	
2 Library Preparation Using FFPE-Derived Tumor DNA for High-Throughput Hybridization-Based Targeted or Exome Sequencing	19
<i>John A. Thorson and Sarah S. Murray</i>	
3 Bioinformatics Basics for High-Throughput Hybridization-Based Targeted DNA Sequencing from FFPE-Derived Tumor Specimens: From Reads to Variants	37
<i>Shulei Sun and Sarah S. Murray</i>	
4 Annotation of Variant Data from High-Throughput DNA Sequencing from Tumor Specimens: Filtering Strategies to Identify Driver Mutations.....	49
<i>Shulei Sun, John A. Thorson, and Sarah S. Murray</i>	
5 Biological Interpretation of Complex Genomic Data	61
<i>Kathleen M. Fisch</i>	
6 Clinical Validation of Targeted Solid Tumor Profiling	73
<i>Guy Froyen and Brigitte Maes</i>	
7 Whole-Genome Single Nucleotide Polymorphism Microarray for Copy Number and Loss of Heterozygosity Analysis in Tumors	89
<i>Ross Rowsey, Iya Znoyko, and Daynna J. Wolff</i>	
8 Genome-Wide Copy Number Variation Detection Using NGS: Data Analysis and Interpretation	113
<i>Wei Shen, Philippe Szankasi, Jacob Durtschi, Todd W. Kelley, and Xinjie Xu</i>	
9 Overview of Fusion Detection Strategies Using Next-Generation Sequencing.....	125
<i>Jan Schröder, Amit Kumar, and Stephen Q. Wong</i>	
10 Clinical Application of Fusion Gene Detection Using Next-Generation Sequencing and the NanoString Technology	139
<i>Anna Karlsson and Johan Staaf</i>	
11 Pipeline for Integrated Microarray Expression Normalization Tool Kit (PIMENTo) for Tumor Microarray Profiling Experiments	153
<i>Thomas Nash, Matthew Huff, W. Bailey Glen Jr., and Gary Hardiman</i>	
12 Molecular Profiling of RNA Tumors Using High-Throughput RNA Sequencing: Overview of Library Preparation Methods	169
<i>Sean M. Courtney, Willian A. da Silveira, E. Starr Hazard, and Gary Hardiman</i>	

13 Molecular Profiling of RNA Tumors Using High-Throughput RNA Sequencing: From Raw Data to Systems Level Analyses 185
Willian A. da Silveira, E. Starr Hazard, Dongjun Chung, and Gary Hardiman

14 Methylation Analysis Using Microarrays: Analysis and Interpretation..... 205
Teresia Kling and Helena Carén

15 High-Throughput Targeted Repeat Element Bisulfite Sequencing (HT-TREBS)..... 219
Arundhati Bakshi, Muhammad B. Ekram, and Joomyeong Kim

16 A Pipeline for ctDNA Detection Following Primary Tumor Profiling Using a Cancer-Related Gene Sequencing Panel 229
Satoshi S. Nishizuka, Kei A. Sato, and Tsuyoshi Hachiya

17 Single-Cell Analysis of Circulating Tumor Cells 243
Jana- A. Thiele, Pavel Pitule, James Hicks, and Peter Kuhn

Index 265
