

Contents

1	Introduction	1
	1.1 Perinatal HIV Prevention Trials	2
	1.2 The SUPPORT Study	4
	1.3 Hospital Quality Improvement Research	6
	1.4 Henrietta Lacks	7
	1.5 The Facebook Study	8
	1.6 Overview of This Book	9
2	Historical Background	13
	2.1 Research with Human Subjects Before World War II	16
	2.2 Research with Human Subjects During World War II	21
	2.3 Research with Human Subjects After World War II	22
	2.4 The Belmont Report	27
	2.5 The U.S. Federal Regulations	29
	2.6 Continuing Scandals and Controversies	34
	2.7 Concerns About Integrity in Biomedical Research	39
	2.8 Jesse Gelsinger's Death	42
	2.9 Concerns About Research on Human Biosamples	43
	2.10 Conclusion: Human Research Regulations and Guidelines in Historical Context	47
3	Moral Theory	53
	3.1 What Is a Moral Theory?	53
	3.2 Moral Subjectivism and Relativism	57
	3.3 Classifying Moral Theories	60
	3.4 Divine Command Theory	61
	3.5 Virtue Ethics	62
	3.6 Natural Law Theory	66
	3.7 Utilitarianism	67
	3.8 Kantianism	73
	3.9 Natural Rights Theories	77
	3.10 Pluralistic Theories	81
	3.11 Conclusion: Toward a Decision-Making Framework	84

4	Trust as a Foundation for Research with Human Subjects	87
4.1	What Is Trust?	87
4.2	Trust in Research Involving Research with Human Subjects	89
4.3	Trust as a Foundation for the Ethics of Research with Human Subjects: Some Alternative Views	92
4.4	Trust as a Foundation for the Ethics of Research with Human Subjects: My View	97
4.5	Promoting Trust in Research with Human Subjects	98
4.6	The Relationship Between Moral Principles and Research Regulations and Guidelines	101
4.7	The Role of Trust in Resolving Ethical Dilemmas in Research with Human Subjects	105
4.8	Objections to My View	107
4.9	Conclusion	110
5	Informed Consent	113
5.1	Trust and Informed Consent	113
5.2	The Elements of Consent	114
5.3	Disclosure Standards	117
5.4	Documentation	120
5.5	Consent by Parties Other than the Subject	122
5.6	Research Without Consent	123
5.7	Opt-Out Consent	130
5.8	General Consent	131
5.9	Deception in Research	133
5.10	Assent	135
5.11	Payment for Research Participation	136
5.12	The Right to Withdraw	144
5.13	Conclusion	147
6	Privacy and Confidentiality	149
6.1	Privacy, Confidentiality, and Trust	149
6.2	Sharing and Publishing Data and Samples	152
6.3	Justifiable Breaches of Privacy and Confidentiality	155
6.4	Harm to Self	155
6.5	Harm to Others	156
6.6	Suspected Abuse/Neglect	158
6.7	Communicable Disease Reporting	159
6.8	Informing Family Members About Genetic Diseases	160
6.9	Conclusion	162
7	Risks	165
7.1	What Is Risk?	165
7.2	Types of Risk Related to Research Participation	166
7.3	Risk and Trust	166
7.4	Assessing Risk	167

7.5	Minimizing Risk	169
7.6	Minimal Risk	171
7.7	Research on Healthy Volunteers	176
7.8	Phase I Trials on Patients	180
7.9	Randomized Controlled Trials	181
7.10	Placebo-Controlled Trials	183
7.11	Risks to Researchers and Third Parties	186
7.12	Compensation for Research-Related Injuries	188
7.13	Conclusion	190
8	Benefits	193
8.1	What Are Benefits?	193
8.2	What Are the Benefits of Research?	194
8.3	What Is the Relationship Between Research Design and Benefits?	194
8.4	Sources of Special Duties of Beneficence	195
8.5	Disclosing Individual Research Results to Human Subjects	195
8.6	Ancillary Care	201
8.7	Post-trial Access to Medications	204
8.8	Benefits in Placebo-Controlled Clinical Trials	209
8.9	Fair Benefits to Host Communities and Nations	211
8.10	Conclusion	213
9	Vulnerable Subjects	215
9.1	Who or What Is a Vulnerable Subject?	216
9.2	Research Involving Children	220
9.3	Research Involving Adults with Mental Disabilities or Diseases that Impair Decision-Making	227
9.4	Research Involving Pregnant Women	230
9.5	Conclusion: Protection vs. Access	232
10	Research Integrity	235
10.1	The Importance of Integrity in Research with Human Subjects	235
10.2	Misconduct in Research	238
10.3	Noncompliance	240
10.4	Whistleblowing in Research	241
10.5	Preventing Misconduct and Noncompliance	242
10.6	Conflict of Interest	243
10.7	Data Suppression	250
10.8	Dealing with Conflicts of Interest in Research	252
10.9	Conclusion	256
11	Regulatory Reform	257
11.1	Institutional Review Boards: A Time for Reform	257
11.2	Risk-Based Review	259
11.3	IRB Mission Creep	259

11.4	IRB Conflict of Interest	260
11.5	Difficulties with Measuring IRB Performance	260
11.6	Centralized IRB Review	260
11.7	Lack of Harmonization of Regulations	263
11.8	Gaps in the Regulations	263
11.9	Problems with Informed Consent	264
11.10	Compensation for Injury	264
11.11	Revisions to the Common Rule	264
11.12	Expanding Exemptions	265
11.13	Defining Some Activities as Not Research	266
11.14	Limiting Continuing Review	266
11.15	Single IRB Mandate.	267
11.16	Informed Consent Enhancements	267
11.17	Abridged Consent Process for Research Involving Biological Samples	268
11.18	Additional Changes to Informed Consent Requirements	269
11.19	Conclusion	269
12	Conclusion	271
12.1	Trust and Consent	272
12.2	Trust and Confidentiality	273
12.3	Trust and Risks.	274
12.4	Trust and Benefits	274
12.5	Trust and Vulnerable Subjects	275
12.6	Trust and Research Integrity	276
12.7	Regulatory Reform.	276
