

Contents

Preface iv–vi

Part A Introduction

- Chapter 1** **The Science of Decision Making** 1
Chapter 2 **Getting Started with Spreadsheets (Ch. 1)*** 17

Part B Using Linear Programs

- Chapter 3** **Analyzing Solutions of Linear Programs (Ch. 2)** 47
Chapter 4 **A Survey of Linear Programs (Ch. 3)** 97
Chapter 5 **Networks (Ch. 4)** 150
Chapter 6 **Integer Programs (Ch. 4)** 194

Part C Probability for Decision Making

- Chapter 7** **Introduction to Probability Models (Ch. 2)** 215
Chapter 8 **Discrete Random Variables (Ch. 7)** 244
Chapter 9 **Decision Trees and Generalizations (Ch. 8)** 283
Chapter 10 **Utility Theory and Decision Analysis (Ch. 9)** 321
Chapter 11 **Continuous Random Variables (Ch. 10)** 342

Part D Stochastic Systems

- Chapter 12** **Inventory (Ch. 11)** 399
Chapter 13 **Markov Chains (Ch. 11)** 442

*Within parentheses is the prerequisite chapter or chapters.

Chapter 14	Queueing (Ch. 13)	482
Chapter 15	Simulation (Ch. 11)	521

Part E Game Theory

Chapter 16	Game Theory (Ch. 9)	545
-------------------	----------------------------	------------

Part F Solving Linear Programs

Chapter 17	Solving Linear Equations (Ch. 2)	569
Chapter 18	The Simplex Method (Chs. 3, 17)	588
Chapter 19	Duality (Chs. 4, 18)	637

Appendix:	Note on Excel	693
------------------	----------------------	------------

Index	704
--------------	------------
