

MICROTUBULES AND CENTROSOMES

Review Articles

Measuring microtubule dynamics	725–735
Alexander James Zwetsloot, Gokhan Tut and Anne Straube	
Microtubule structure by cryo-EM: snapshots of dynamic instability	737–751
Szymon W. Manka and Carolyn A. Moores	
Trafficking of ciliary membrane proteins by the intraflagellar transport/BBSome machinery	753–763
Jenna L. Wingfield, Karl-Ferdinand Lehtreck and Esben Lorentzen	
Microtubule nucleation by γ-tubulin complexes and beyond	765–780
Corinne A. Tovey and Paul T. Conduit	
TAPping into the treasures of tubulin using novel protein production methods	781–792
Nuo Yu and Niels Galjart	
Bridging centrioles and PCM in proper space and time	793–801
Ramya Varadarajan and Nasser M. Rusan	
Context-dependent spindle pole focusing	803–813
Lori Borgal and James G. Wakefield	
Composition, structure and function of the eukaryotic flagellum distal tip	815–828
Jacob T. Croft, Davide Zabeo, Radhika Subramanian and Johanna L. Höög	
Coordination of eukaryotic cilia and flagella	829–838
Kirsty Y. Wan
