Preface x

Acknowledgments xiv

Chapter 1	Physical Activity, Health, and Chronic Disease	1
	Physical Activity, Health, and Disease: An Overview	2
	Cardiovascular Disease	10
	Hypertension.	11
	Hypercholesterolemia and Dyslipidemia	14
	Tobacco	16
	Diabetes Mellitus.	16
	Obesity and Overweight	18
	Metabolic Syndrome.	20
	Cancer.	21
	Musculoskeletal Diseases and Disorders	22
	Aging	24
	Cognitive Performance.	25
	Exercise as Medicine	26
	Review Material	27
Chapter 2	Preliminary Health Screening and Risk Classification	29
	Preliminary Health Evaluation	29
	Testing Procedures for Blood Pressure, Heart Rate, and Electrocardiogram.	38
	Review Material	53
Chapter 3	Principles of Assessment, Prescription, and Exercise Program Adherence	55
	Physical Fitness Testing	56
	Basic Principles for Exercise Program Design	64
	Exercise Program Adherence	67
	Using Technology to Promote Physical Activity	71
	Review Material	76

Chapter 4	Assessing Cardiorespiratory Fitness	79
	Definition of Terms	79
	Graded Exercise Testing: Guidelines and Procedures	80
	Maximal Exercise Test Protocols.	84
	Submaximal Exercise Test Protocols.	100
	Field Tests for Assessing Aerobic Fitness	112
	Exercise Testing for Children and Older Adults.	115
	Review Material	122
Chapter 5	Designing Cardiorespiratory Exercise Programs	125
	The Exercise Prescription	125
	Aerobic Training Methods and Modes	139
	Personalized Exercise Programs.	145
	Review Material	155
Chapter 6	Assessing Muscular Fitness	159
	Definition of Terms	159
	Strength and Muscular Endurance Assessment	161
	Muscular Power Assessment	174
	Sources of Measurement Error in Muscular Fitness Testing	177
	Additional Considerations for Muscular Fitness Testing	178
	Muscular Fitness Testing of Older Adults.	181
	Muscular Fitness Testing of Children.	185
	Review Material	186
Chapter 7	Designing Resistance Training Programs	189
	Types of Resistance Training.	189
	Developing Resistance Training Programs	202
	Common Questions About Resistance Training	211
	Effects of Resistance Training Programs	219
	Muscular Soreness	224
	Review Material	227
Chapter 8	Assessing Body Composition	229
	Classification and Uses of Body Composition Measures.	230
	Body Composition Models.	230
	Reference Methods for Assessing Body Composition	231
	Field Methods for Assessing Body Composition	247
	Review Material	278

Chapter 9	Designing Weight Management and Body Composition Programs	281
	Obesity, Overweight, and Underweight: Definitions and Trends	281
	Obesity: Types and Causes	283
	Weight Management Principles and Practices	288
	Designing Weight Management Programs: Preliminary Steps	288
	Designing Weight Loss Programs	294
	Designing Weight Gain Programs	303
	Designing Programs to Improve Body Composition	304
	Review Material	307
Chapter 10	Assessing Flexibility	309
	Basics of Flexibility	309
	Assessment of Flexibility	312
	Flexibility Testing of Older Adults	326
	Review Material	329
Chapter 11	Designing Programs for Flexibility and Low Back Care	331
	Training Principles	331
	Stretching Methods	332
	Designing Flexibility Programs: Exercise Prescription	337
	Designing Low Back Care Exercise Programs	340
	Review Material	346
Chapter 12	Assessing Balance and Designing Balance Programs	349
	Definitions and Nature of Balance	350
	Factors Affecting Balance and Risk of Falling	350
	Assessment of Balance	352
	Designing Balance Training Programs	364
	Review Material	373
Appendix A	Health and Fitness Appraisal	375
	A.1 Physical Activity Readiness Questionnaire for Everyone (PAR-Q+)	376
	A.2 Medical History Questionnaire	380
	A.3 Risk Factors, Signs, and Symptoms of Disease	382
	A.4 Electronic Physical Activity Readiness Medical Examination (ePARmed-X+)	384
	A.5 Lifestyle Evaluation	386
	A.6 Fantastic Lifestyle Checklist	388
	A.7 Informed Consent	389
	A.8 Websites for Selected Professional Organizations and Institutes.	391

Appendix B	Cardiorespiratory Assessments	393
	B.1 Summary of Graded Exercise Test and Cardiorespiratory Field Test Protocols394
	B.2 Rockport Fitness Charts.396
	B.3 Step Test Protocols398
	B.4 OMNI Rating of Perceived Exertion Scales.400
	B.5 Analysis of Sample Case Study in Chapter 5404
Appendix C	Muscular Fitness Exercises and Norms	407
	C.1 Standardized Testing Protocols for Digital Handheld Dynamometry408
	C.2 1-RM Squat and Bench Press Norms for Adults.409
	C.3 Isometric Exercises411
	C.4 Dynamic Resistance Training Exercises415
Appendix D	Body Composition Assessments	421
	D.1 Prediction Equations for Residual Volume422
	D.2 Standardized Sites for Skinfold Measurements423
	D.3 Skinfold Sites for Jackson's Generalized Skinfold Equations.428
	D.4 Standardized Sites for Circumference Measurements429
	D.5 Standardized Sites for Bony Breadth Measurements430
	D.6 Ashwell Body Shape Chart431
Appendix E	Energy Intake and Expenditure	433
	E.1 Food Record and RDA Profile434
	E.2 Physical Activity Log436
	E.3 Gross Energy Expenditure for Conditioning Exercises, Sports, and Recreational Activities.437
Appendix F	Flexibility and Low Back Care Exercises	441
	F.1 Selected Flexibility Exercises442
	F.2 Exercise Dos and Don'ts451
	F.3 Exercises for Low Back Care.456
	List of Abbreviations	461
	Glossary	465
	References	475
	Index	531
	About the Authors	545
