Preface	v
1 Multilayer Networks	1
<i>Sergio Gómez, Manlio De Domenico, Elisa Omodei, Albert Solé-Ribalta, and Alex Arenas</i>	
1.1 Multilayer, multiplex, and interconnected networks	1
1.2 Mathematical description of multilayer networks	4
1.3 Random walks in multiplex networks	10
1.4 Centrality and versatility	19
2 Reconstructing Random Jigsaws	31
<i>Paul Balister, Béla Bollobás, and Bhargav Narayanan</i>	
2.1 Introduction	31
2.2 Preliminaries	34
2.3 Proof of the 0-statement	35
2.4 Towards the 1-statement: Reconstructing large neighborhoods	36
2.5 Proof of the 1-statement	46
2.6 Conclusion	49
3 Classifying Networks with dk-Series	51
<i>Marija Mitrović Dankulov, Guido Caldarelli, Santo Fortunato, and Dmitri Krioukov</i>	
3.1 Introduction	51
3.2 dk -Series for single-layer networks	53
3.3 dk -Series in multilayer networks	66
3.4 Discussion and conclusion	71
4 Economic Specialization and the Nested Bipartite Network of City–Firm Relations	74
<i>António Garas, Céline Rozenblat, and Frank Schweitzer</i>	
4.1 The nested structure of links between cities and economic activities	76
4.2 Learning from ecology: Contribution to nestedness and economic well-being	78
4.3 Conclusion	82
5 Multiplex Modeling of Society	84
<i>János Kertész, János Török, Yohsuke Murase, Hang-Hyun Jo, and Kimmo Kaski</i>	
5.1 Introduction	84
5.2 A weighted multilayer model	88

5.3	Modeling channel selection and sampling bias	93
5.4	Summary and discussion	98
6	Data Summaries and Representations: Definitions and Practical Use	101
	<i>Alain Barrat and Ciro Cattuto</i>	
6.1	Introduction	101
6.2	Data and representations of data	102
6.3	Putting the data representations to concrete use	109
6.4	Conclusions and perspectives	115
7	Multilevel News Networks	116
	<i>Borut Šluban, Jasmina Smailović, Miha Grčar, and Igor Mozetič</i>	
7.1	Introduction	116
7.2	Methods	120
7.3	Results and discussion	125
7.4	Conclusions	136
8	The Role of Local Interactions in Cities' Global Networking of Multinational Firms: An SIR Model Applied to Partial-Multiplex Directed Networks	138
	<i>Maria Tsouchnika, Michael Kanetidis, Celine Rozenblat, and Panos Argyrakis</i>	
8.1	Introduction	138
8.2	Data	139
8.3	The simulation method	141
8.4	Results	142
8.5	Conclusions	145
9	Self-Organization in Multiplex Networks	148
	<i>Nikos E. Kouvaris and Albert Diaz-Guilera</i>	
9.1	The multiplex structure and the dynamics of neural networks	148
9.2	Activator-inhibitor dynamics in multiplex networks	153
	References	159
	Index	175
