<b>1.</b>	<b>Introduction</b>	1
	Literature	4
<b>2.</b>	<b>Structure and Ultrastructure</b>	6
2.1.	Anatomical Aspects	6
2.2.	Ultrastructure of the Cell Wall	13
2.3.	Reaction Tissues	17
2.4.	Functional Elements of the Conducting System	19
	Literature	23
<b>3.</b>	<b>Chemical Composition and Analysis of Wood</b>	26
3.1.	Survey of the Chemical Components	26
3.1.1.	Macromolecular Substances	26
3.1.2.	Low-Molecular-Weight Substances	27
3.2.	Analysis of Wood	28
3.2.1.	Problems of Analysis	28
3.2.2.	Sampling and Preparation of Samples	29
3.2.3.	Determination of the Water Content	31
3.2.4.	Extractives	32
3.2.5.	Inorganic Material	34
3.2.6.	Delignification Methods (Preparation of Holocellulose)	35
3.2.7.	Isolation and Determination of Cellulose	39
3.2.8.	Isolation and Determination of Polyoses	43
3.2.9.	Isolation and Determination of Lignin	49
3.3.	Data of Wood Analyses	55
	Literature	59
<b>4.</b>	<b>Cellulose</b>	66
4.1.	Occurrence	66
4.2.	Molecular Properties	67
4.2.1.	Constitution and Configuration	67
4.2.2.	Cellulose in Solution	69
4.2.3.	Molecular Weight and Chain Length	73
4.2.4.	Hydrogen Bonds	76
4.3.	Supramolecular Structures	83
4.3.1.	The Crystalline Lattice of Cellulose I	83
4.3.2.	The Polymorphous Lattices of Cellulose	86

4.3.3.	Crystallinity and the Size of Crystallites	90
4.3.4.	The Fibrillar Structure	93
4.3.5.	The Internal Structure of Fibrils	97
	Literature	100
<b>5.</b>	<b>Polyoses (Hemicelluloses)</b>	<b>106</b>
5.1.	Nature and Classification	106
5.2.	Xylans	109
5.2.1.	Hardwood Xylans	109
5.2.2.	Softwood Xylans	111
5.2.3.	Xylans from other Plants	112
5.2.4.	Supramolecular Structures	112
5.3.	Mannans	115
5.3.1.	Hardwood Mannans	115
5.3.2.	Softwood Mannans	115
5.3.3.	Other Mannans	117
5.3.4.	Supramolecular Structures	118
5.4.	Glucans	122
5.5.	Galactans	124
5.6.	Pectins	126
	Literature	127
<b>6.</b>	<b>Lignin</b>	<b>132</b>
6.1.	Significance and Occurrence	132
6.2.	Lignification of the Cell Wall	133
6.2.1.	Synthesis of the Monomeric Lignin Units	133
6.2.2.	Formation of Lignin Macromolecules	135
6.2.3.	Aspects of Lignin Deposition in the Differentiating Cell Wall	139
6.3.	Structure and Constitution of Lignin	141
6.3.1.	Studies Elucidating Lignin Structure	141
6.3.2.	Structural Models of Lignin	143
6.3.3.	Lignin Heterogeneity	148
6.4.	Characterization and Properties of Lignins and Lignin Derivatives	151
6.4.1.	Chemical Composition and Molecular Weight	151
6.4.2.	Ultraviolet and Infrared Spectroscopic Behaviour	157
6.4.3.	Ultrastructural Appearance	164
6.5.	Lignin-Polysaccharide Complexes	167
	Literature	174
<b>7.</b>	<b>Extractives</b>	<b>182</b>
7.1.	Importance	182
7.2.	Extractives of Softwood	184

7.2.1.	Terpenes and Terpenoids . . . . .	184
7.2.2.	Fats, Waxes and Their Components . . . . .	192
7.2.3.	Phenolic Compounds . . . . .	194
7.2.4.	Various Compounds . . . . .	199
7.3.	Extractives of Hardwood . . . . .	200
7.3.1.	Terpenes and Terpenoids . . . . .	200
7.3.2.	Fats, Waxes and Their Components . . . . .	204
7.3.3.	Phenols, Lignans, Quinones . . . . .	205
7.3.4.	Tannins and Flavonoids . . . . .	207
7.3.5.	Various Compounds . . . . .	213
7.4.	Extractives from Foliage, Buds and Fruits . . . . .	214
7.5.	Inorganic Components . . . . .	217
7.6.	pH Values . . . . .	220
	Literature . . . . .	222
<b>8.</b>	<b>Distribution of the Components within the Wood Cell Wall . . . . .</b>	<b>227</b>
8.1.	Estimation and Calculation . . . . .	227
8.2.	Determination of the Lignin Distribution . . . . .	229
8.3.	Determination of the Polysaccharide Distribution . . . . .	232
8.4.	Models of the Internal Cell Wall Structure . . . . .	234
	Literature . . . . .	238
<b>9.</b>	<b>Constituents of Bark . . . . .</b>	<b>240</b>
9.1.	Anatomical Features . . . . .	240
9.2.	Chemical Composition . . . . .	244
9.2.1.	General Analysis . . . . .	244
9.2.2.	Cellulose . . . . .	246
9.2.3.	Polyoses . . . . .	247
9.2.4.	Lignin . . . . .	251
9.2.5.	Polyphenols . . . . .	253
9.2.6.	Suberin . . . . .	257
9.2.7.	Extractives . . . . .	258
9.2.8.	Inorganic Components and pH Value . . . . .	262
	Literature . . . . .	265
<b>10.</b>	<b>Reactions in Acidic Medium . . . . .</b>	<b>268</b>
10.1.	General Aspects of Wood Reactions . . . . .	268
10.2.	Reactions of Polysaccharides . . . . .	268
10.2.1.	Mechanism of Acidic Hydrolysis . . . . .	268
10.2.2.	Factors Influencing Hydrolysis . . . . .	270
10.2.3.	Dehydration . . . . .	274
10.2.4.	Oxidation . . . . .	276
