
CONTENTS

Acknowledgments	xii
Preface to the Second Edition	xiii
Preface to the First Edition	xv
Glossary of Symbols	xix
Chapter 1 Introduction	1
Chapter 2 The Use of Statistical Tests in Research	6
2.1 The Null Hypothesis	7
2.2 The Choice of Statistical Test	8
2.3 The Level of Significance and the Sample Size	8
2.4 The Sampling Distribution	11
2.5 The Region of Rejection	14
2.6 The Decision	15
2.7 Illustrative Example	15
2.8 References	18
Chapter 3 Choosing an Appropriate Statistical Test	19
3.1 The Statistical Model	20
3.2 Efficiency	21
3.3 Measurement	23
3.4 Parametric and Nonparametric Statistical Tests	33
Chapter 4 The Single-Sample Case	37
4.1 The Binomial Test	38
4.2 The Chi-Square Goodness-of-Fit Test	45
4.3 The Kolmogorov-Smirnov One-Sample Test	51
4.4 Test for Distributional Symmetry	55
4.5 The One-Sample Runs Test for Randomness	58
	ix

4.6	The Change-Point Test	64
4.7	Discussion	71
Chapter 5	The Case of One Sample, Two Measures or Paired Replicates	73
5.1	The McNemar Change Test	75
5.2	The Sign Test	80
5.3	The Wilcoxon Signed Ranks Test	87
5.4	The Permutation Test for Paired Replicates	95
5.5	Discussion	100
Chapter 6	Two Independent Samples	102
6.1	The Fisher Exact Test for 2×2 Tables	103
6.2	The Chi-Square Test for Two Independent Samples	111
6.3	The Median Test	124
6.4	The Wilcoxon-Mann-Whitney Test	128
6.5	Robust Rank-Order Test	137
6.6	The Kolmogorov-Smirnov Two-Sample Test	144
6.7	The Permutation Test for Two Independent Samples	151
6.8	The Siegel-Tukey Test for Scale Differences	156
6.9	The Moses Rank-Like Test for Scale Differences	161
6.10	Discussion	166
Chapter 7	The Case of k Related Samples	168
7.1	The Cochran Q Test	170
7.2	The Friedman Two-Way Analysis of Variance by Ranks	174
7.3	The Page Test for Ordered Alternatives	184
7.4	Discussion	188
Chapter 8	The Case of k Independent Samples	190
8.1	The Chi-Square Test for k Independent Samples	191
8.2	The Extension of the Median Test	200
8.3	The Kruskal-Wallis One-Way Analysis of Variance by Ranks	206
8.4	The Jonckheere Test for Ordered Alternatives	216
8.5	Discussion	222
Chapter 9	Measures of Association and Their Tests of Significance	224
9.1	The Cramér Coefficient C	225
9.2	The Phi Coefficient for 2×2 Tables: r_ϕ	232
9.3	The Spearman Rank-Order Correlation Coefficient r_s	235
9.4	The Kendall Rank-Order Correlation Coefficient T	245
9.5	The Kendall Partial Rank-Order Correlation Coefficient $T_{xy..}$	254
9.6	The Kendall Coefficient of Concordance W	262
9.7	The Kendall Coefficient of Agreement u for Paired Comparisons or Rankings	272

	The correlation between several judges and a criterion ranking T_C	281
9.8	Nominally Scaled Data and the Kappa Statistic K	284
9.9	Ordered Variables and the Gamma Statistic G	291
9.10	Asymmetrical Association and the Lambda Statistic L_B	298
9.11	Asymmetrical Association for Ordered Variables: Somers' d_{BA}	303
9.12	Discussion	310
	References	313
Appendix I	Tables	317
Appendix II	Programs	375
	Author Index	387
	Example Author Index	389
	Subject Index	391
