Foreword	xi
Introduction	1
Basic Definitions, Assumptions and Randomised Experiments	3
1.1 Treatment Effects: Definitions, Assumptions and Problems	3
1.1.1 What Is a Treatment Effect?	5
1.1.2 Formal Definitions: ATE, ATET, ATEN	10
1.1.3 Stable-Unit-Treatment-Value Assumption	13
1.1.4 Conditional Independence Assumption and Selection Bias	15
1.2 Randomised Controlled Trials	17
1.2.1 Definition and Examples for Controlled Trials	18
1.2.2 Randomisation Methods and Statistical Properties	21
1.2.3 Difficulties and Remedies in Practice	29
1.3 Respecting Heterogeneity: Non-Experimental Data and Distributional	1
Effects	33
1.3.1 Non-Separability and Consequences	34
1.3.2 Distributional Effects	36
1.4 Bibliographic and Computational Notes	38
1.4.1 Further Reading and Bibliographic Notes	38
1.4.2 Computational Notes	40
1.5 Exercises	41
An Introduction to Non-Parametric Identification and Estimation	42
2.1 An Illustrative Approach to the Identification of Causality	43
2.1.1 Introduction to Causal Graphs and Conditional Independence	44
2.1.2 Back Door Identification	48
2.1.3 Front Door Identification	51
2.1.4 Total versus Partial Effects, Post-Treatment Covariates and	
Instruments	54
2.2 Non- and Semi-Parametric Estimation	60
2.2.1 A Brief Introduction to Non-Parametric Regression	61
2.2.2 Extensions: Bandwidth Choice, Bias Reduction, Discrete Covar	iates
and Estimating Conditional Distribution Functions	82

	2.2.3 A Brief Introduction to Semi-Parametric Regression	89
	2.2.4 A Note on Sieves: Series Estimators and Splines	104
2.3	Bibliographic and Computational Notes	111
	2.3.1 Further Reading and Bibliographic Notes	111
	2.3.2 Computational Notes	112
2.4	Exercises	113
Sele	ection on Observables: Matching, Regression and Propensity Score	
Esti	mators	116
3.1	Preliminaries: General Ideas	116
	3.1.1 How to Apply the CIA for Identification and Estimation	117
	3.1.2 Selection Bias and Common Support	121
	3.1.3 Using Linear Regression Models?	125
3.2	ATE and ATET Estimation Based on CIA	126
	3.2.1 Definition of Matching and Regression Estimators	127
	3.2.2 Statistical Properties of Matching	129
	3.2.3 Statistical Properties of Regression Estimators	133
3.3	Propensity Score-Based Estimator	140
	3.3.1 Propensity Score Matching	140
	3.3.2 Propensity Score Weighting	145
	3.3.3 Combination of Weighting and Regression: Double Robust	
	Estimators	149
3.4	Practical Issues on Matching and Propensity Score Estimation	153
	3.4.1 Summary of Estimators, Finite Sample Performance and Inference	153
	3.4.2 When Using Propensity Scores	157
	3.4.3 Testing the Validity of the Conditional Independence Assumption	162
	3.4.4 Multiple Treatment Evaluation	165
3.5	Bibliographic and Computational Notes	168
	3.5.1 Further Reading and Bibliographic Notes	168
	3.5.2 Computational Notes	171
3.6	Exercises	173
Sel	ection on Unobservables: Non-Parametric IV and Structural Equation	
Apr	proaches	175
4.1	Preliminaries: General Ideas and LATE	175
	4.1.1 General Ideas	176
	4.1.2 Local Average Treatment Effect: LATE	180
	4.1.3 Special Cases and First Extensions	187
4.2	LATE with Covariates	190
	4.2.1 Identification of the LATE by Conditioning	190
	4.2.2 A Feasible LATE Estimator with Confounders: The unconditional	
	LATE	195
	4.2.3 LATE Estimation with Propensity Scores	198
	4.2.4 IV with Non-Binary Instruments	201
	-	

3

vii

4.3 Marginal Treatment Effects	204
4.3.1 The Concept of Marginal Treatment Effects	204
4.3.2 Relating Other Treatment Effects to MTEs	208
4.3.3 Extensions: Identification of Distributions of Potential Outcom	mes
and Increasing the Identification Region	211
4.4 Non-Binary Models with Monotonicity in Choice Equation	213
4.4.1 Continuous Treatment with Triangularity	213
4.4.2 Ordered Discrete Treatment with Triangularity	218
4.5 Bibliographic and Computational Notes	221
4.5.1 Further Reading and Bibliographic Notes	221
4.5.2 Computational Notes	223
4.6 Exercises	224
Difference-in-Differences Estimation: Selection on Observables and	
Unobservables	227
5.1 The Difference-in-Differences Estimator with Two Time Periods	228
5.1.1 Diff-in-Diff, the Simple Case	229
5.1.2 Diff-in-Diff, Conditional on Confounders	234
5.1.3 Relationship to Linear Panel Models	237
5.2 Multiple Groups and Multiple Time Periods	239
5.2.1 Triple Differences and Higher Differences	242
5.3 The Changes-in-Changes Concept	244
5.3.1 Changes-in-Changes with Continuous Outcome Y	245
5.3.2 Changes-in-Changes with Discrete Outcome $Y$ and Interval	
Identification	251
5.3.3 Changes-in-Changes with Discrete Outcome $Y$ but Point	
Identification	255
5.3.4 Relationship to Panel Data Analysis and Selection on Observa	ibles 257
5.4 Bibliographic and Computational Notes	260
5.4.1 Further Reading and Bibliographic Notes	260
5.4.2 Computational Notes	261
5.5 Exercises	262
Regression Discontinuity Design	264
6.1 Regression Discontinuity Design without Covariates	267
6.1.1 Identification in the Regression Discontinuity Designs	267
6.1.2 Estimation of RDD-Based Treatment Effects	276
6.1.3 RDD with Multiple Thresholds	281
6.2 Regression Discontinuity Design with Covariates	285
6.2.1 Motivations for Including Covariates	285
6.2.2 Identification of Treatment Effect with RDD and Covariates	293
6.3 Plausibility Checks and Extensions	299
6.3.1 Manipulation of the Assignment Variable	299
6.3.2 Further Diagnostic Checks for RDD	302

5

6.4 Bibliographic and Computational Notes       309         6.4.1 Further Reading and Bibliographic Notes       309         6.4.2 Computational Notes       311         6.5 Exercises       311 <b>Distributional Policy Analysis and Quantile Treatment Effects</b> 311         7.1 A Brief Introduction to (Conditional) Quantile Analysis       317         7.1.1 What Is Quantile Regression and Where Is It Good For?       318         7.1.2 The Linear Regression Quantile Estimator       322         7.2 Quantile Treatment Effects       325         7.2.1 Quantile Treatment Effects under Selection on Observables       332         7.2.2 Quantile Treatment Effects under Endogeneity: Instrumental Variables       332         7.3 Quantile Treatment Effects under Endogeneity: RDD       344         7.4 Bibliographic and Computational Notes       355         7.4.2 Computational Notes       355         7.5 Exercises       355         8.1 Motivation and Introduction       355         8.2 Dynamic Potential Outcomes Model       366         8.2.3 Sequential Conditional Independence Assumptions       368         8.3.1 A Brief Introduction to Duration Analysis in Econometrics       378         8.3.2 From Competing Risks Models to Treatment Effects in Duration Analysis       388         8.4 Bibliographic and C	6.3.3 DiD-R	DD and Pseudo Treatment Tests	306
6.4.1       Further Reading and Bibliographic Notes       309         6.4.2       Computational Notes       311         6.5       Exercises       311         6.5       Exercises       312 <b>Distributional Policy Analysis and Quantile Treatment Effects</b> 315         7.1       A Brief Introduction to (Conditional) Quantile Analysis       317         7.1.1       What Is Quantile Regression and Where Is It Good For?       318         7.1.2       The Linear Regression Quantile Estimator       324         7.2       Quantile Treatment Effects under Selection on Observables       332         7.2.1       Quantile Treatment Effects under Endogeneity: Instrumental Variables       335         7.3       Quantile Treatment Effects under Endogeneity: RDD       344         7.4       Bibliographic and Computational Notes       352         7.4.1       Further Reading and Bibliographic Notes       352         7.5       Exercises       355         8.1       Motivation and Introduction       355         8.2       Dynamic Treatment Evaluation       355         8.2.3       Sequential Outcomes Model       366         8.2.2.3       Sequential Matching or Propensity Score Weighting       374         8.3.1       A	6.4 Bibliographic	e and Computational Notes	309
6.4.2 Computational Notes       312         6.5 Exercises       313 <b>Distributional Policy Analysis and Quantile Treatment Effects</b> 314         7.1 A Brief Introduction to (Conditional) Quantile Analysis       317         7.1.1 What Is Quantile Regression and Where Is It Good For?       318         7.1.2 The Linear Regression Quantile Estimator       324         7.2 Quantile Treatment Effects       325         7.2.1 Quantile Treatment Effects under Selection on Observables       332         7.2.2 Quantile Treatment Effects under Endogeneity: Instrumental Variables       335         7.3 Quantile Treatment Effects under Endogeneity: RDD       342         7.4 Bibliographic and Computational Notes       352         7.4.1 Further Reading and Bibliographic Notes       352         7.5 Exercises       353 <b>Dynamic Treatment Evaluation</b> 355         8.1 Motivation and Introduction       355         8.2 Dynamic Potential Outcomes Model       366         8.2.2 Sequential Conditional Independence Assumptions       368         8.3.1 A Brief Introduction to Duration Analysis in Econometrics       378         8.3.2 From Competing Risks Models to Treatment Effects in Duration Analysis       388         8.4 Bibliographic and Computational Notes       396         8.4.1 Further	6.4.1 Further	Reading and Bibliographic Notes	309
6.5 Exercises       311         Distributional Policy Analysis and Quantile Treatment Effects       315         7.1 A Brief Introduction to (Conditional) Quantile Analysis       317         7.1.1 What Is Quantile Regression and Where Is It Good For?       318         7.1.2 The Linear Regression Quantile Estimator       322         7.2 Quantile Treatment Effects       322         7.2.1 Quantile Treatment Effects under Selection on Observables       332         7.2.2 Quantile Treatment Effects under Endogeneity: Instrumental Variables       332         7.3 Quantile Treatment Effects under Endogeneity: RDD       344         7.4 Bibliographic and Computational Notes       350         7.4.1 Further Reading and Bibliographic Notes       352         7.5 Exercises       353         Dynamic Treatment Evaluation       355         8.1 Motivation and Introduction       355         8.2 Dynamic Potential Outcomes Model       366         8.2.3 Sequential Conditional Independence Assumptions       368         8.3 Duration Models and the Timing of Treatment Effects in Duration Analysis       388         8.4 Bibliographic and Computational Notes       376         8.5 Exercises       396         8.6 A Brief Introduction to Duration Analysis in Econometrics       377         8.3.1 A Brief Introduction to Duration	6.4.2 Compu	itational Notes	312
Distributional Policy Analysis and Quantile Treatment Effects       315         7.1 A Brief Introduction to (Conditional) Quantile Analysis       317         7.1.1 What Is Quantile Regression and Where Is It Good For?       318         7.1.2 The Linear Regression Quantile Estimator       324         7.2 Quantile Treatment Effects       325         7.2.1 Quantile Treatment Effects under Selection on Observables       332         7.2.2 Quantile Treatment Effects under Endogeneity: Instrumental Variables       335         7.3 Quantile Treatment Effects under Endogeneity: RDD       344         7.4 Bibliographic and Computational Notes       350         7.4.1 Further Reading and Bibliographic Notes       355         7.5 Exercises       353         Dynamic Treatment Evaluation       355         8.1 Motivation and Introduction       355         8.2 Dynamic Potential Outcomes Model       366         8.2.2 Sequential Conditional Independence Assumptions       368         8.3.2 From Competing Risks Models to Treatment Effects in Duration Analysis       378         8.3.4 Brief Introduction to Duration Analysis in Econometrics       377         8.3.5 From Competing Risks Models to Treatment Effects in Duration Analysis       388         8.4 Bibliographic and Computational Notes       396         8.4.1 Further Reading and Bibliographic Notes	6.5 Exercises		313
7.1 A Brief Introduction to (Conditional) Quantile Analysis       317         7.1.1 What Is Quantile Regression and Where Is It Good For?       318         7.1.2 The Linear Regression Quantile Estimator       324         7.2 Quantile Treatment Effects       325         7.2.1 Quantile Treatment Effects under Selection on Observables       332         7.2.2 Quantile Treatment Effects under Endogeneity: Instrumental Variables       335         7.3 Quantile Treatment Effects under Endogeneity: RDD       344         7.4 Bibliographic and Computational Notes       350         7.4.1 Further Reading and Bibliographic Notes       352         7.5 Exercises       353 <b>Dynamic Treatment Evaluation</b> 355         8.1 Motivation and Introduction       355         8.2 Dynamic Potential Outcomes Model       366         8.2.2 Sequential Conditional Independence Assumptions       368         8.2.3 Sequential Matching or Propensity Score Weighting       374         8.3 Duration Models and the Timing of Treatment Effects in Duration Analysis       388         8.4 Bibliographic and Computational Notes       396         8.4.1 Further Reading and Bibliographic Notes       396         8.4.2 Computational Notes       396         8.5.3 From Competing Risks Models to Treatment Effects in Duration Analysis       388	Distributional Poli	icy Analysis and Quantile Treatment Effects	315
7.1.1 What Is Quantile Regression and Where Is It Good For?       318         7.1.2 The Linear Regression Quantile Estimator       324         7.2 Quantile Treatment Effects       325         7.2.1 Quantile Treatment Effects under Selection on Observables       332         7.2.2 Quantile Treatment Effects under Endogeneity: Instrumental Variables       335         7.3 Quantile Treatment Effects under Endogeneity: RDD       344         7.4 Bibliographic and Computational Notes       350         7.4.1 Further Reading and Bibliographic Notes       352         7.4.2 Computational Notes       352         7.5 Exercises       353 <b>Dynamic Treatment Evaluation</b> 355         8.1 Motivation and Introduction       355         8.2 Dynamic Potential Outcomes Model       366         8.2.2 Sequential Conditional Independence Assumptions       368         8.2.3 Sequential Matching or Propensity Score Weighting       374         8.3 Duration Models and the Timing of Treatment Effects in Duration Analysis       388         8.4 Bibliographic and Computational Notes       396         8.4.1 Further Reading and Bibliographic Notes       396         8.4.2 Computational Notes       396         8.4.3 Divertion Models and the Timing of Treatment Effects in Duration Analysis       388         8.4 Bibliograph	7.1 A Brief Intro	duction to (Conditional) Quantile Analysis	317
7.1.2 The Linear Regression Quantile Estimator       324         7.2 Quantile Treatment Effects       329         7.2.1 Quantile Treatment Effects under Selection on Observables       332         7.2.2 Quantile Treatment Effects under Endogeneity: Instrumental Variables       332         7.3 Quantile Treatment Effects under Endogeneity: RDD       342         7.4 Bibliographic and Computational Notes       350         7.4.1 Further Reading and Bibliographic Notes       352         7.5 Exercises       352 <b>Dynamic Treatment Evaluation</b> 355         8.1 Motivation and Introduction       355         8.2 Dynamic Potential Outcomes Model       360         8.2.2 Sequential Conditional Independence Assumptions       368         8.2.3 Sequential Matching or Propensity Score Weighting       374         8.3 Duration Models and the Timing of Treatments       377         8.3.2 From Competing Risks Models to Treatment Effects in Duration Analysis       388         8.4 Bibliographic and Computational Notes       396         8.4.1 Further Reading and Bibliographic Notes       396         8.4.2 Computational Notes       397         8.5 Exercises       398	7.1.1 What I	s Quantile Regression and Where Is It Good For?	318
