

CHAPTER 1	
Introduction and Overview	1
1.1 Translation and Interpretation	1
1.2 The Tasks of a Compiler	4
1.3 Data Management in a Compiler	7
1.4 Compiler Structure	8
1.5 Notes and References	12
CHAPTER 2	
Properties of Programming Languages	15
2.1 Overview	15
2.2 Data Objects and Operations	19
2.3 Expressions	28
2.4 Control Structures	30
2.5 Program Environments and Abstract Machine States	32
2.6 Notes and References	43
CHAPTER 3	
Properties of Real and Abstract Machines	46
3.1 Basic Characteristics	47
3.2 Representation of Language Elements	53
3.3 Storage Management	69
3.4 Mapping Specifications	78
3.5 Notes and References	81

CHAPTER 4	
Abstract Program Representations	85
4.1 Intermediate Languages	85
4.2 Global Tables	94
4.3 Notes and References	100
CHAPTER 5	
Elements of Formal Systems	102
5.1 Descriptive Tools	102
5.2 Regular Grammars and Finite Automata	112
5.3 Context-Free Grammars and Pushdown Automata	119
5.4 Notes and References	133
CHAPTER 6	
Lexical Analysis	135
6.1 Modules and Interfaces	135
6.2 Construction	138
6.3 Notes and References	146
CHAPTER 7	
Parsing	149
7.1 Design	149
7.2 LL (1) Parsers	155
7.3 LR Parsers	166
7.4 Notes and References	180
CHAPTER 8	
Attribute Grammars	183
8.1 Basic Concepts of Attribute Grammars	183
8.2 Traversal Strategies	189
8.3 Implementation Considerations	206
8.4 Notes and References	214
CHAPTER 9	
Semantic Analysis	220
9.1 Description of Language Properties via Attribute Grammars	220
9.2 Implementation of Semantic Analysis	242
9.3 Notes and References	249

CHAPTER 10	
Code Generation	253
10.1 Memory Mapping	254
10.2 Target Attribution	257
10.3 Code Selection	271
10.4 Notes and References	279
CHAPTER 11	
Assembly	282
11.1 Internal Address Resolution	283
11.2 External Address Resolution	288
11.3 Instruction Encoding	292
11.4 Notes and References	298
CHAPTER 12	
Error Handling	302
12.1 General Principles	303
12.2 Compiler Error Recovery	308
12.3 Run-Time Errors	318
12.4 Notes and References	322
CHAPTER 13	
Optimization	326
13.1 The Computation Graph	327
13.2 Local Optimization	332
13.3 Global Optimization	342
13.4 Efficacy and Cost	353
CHAPTER 14	
Implementing the Compiler	358
14.1 Implementation Decisions	358
14.2 Case Studies	364
14.3 Notes and References	381
Appendix A: Sample Programming Language LAX	383
A.1 Basic Symbols	384
A.2 Program Structure	385
A.3 Declarations	387
A.4 Expressions	390

Appendix B: Useful Algorithms for Directed Graphs	395
B.1 Terminology	395
B.2 Directed Graphs as Data Structures	400
B.3 Partitioning Algorithms	404
B.4 Notes and References	412
Bibliography	415
Index	435
