

# Contents

<b>1. The Protein Translocation Machinery of the Endoplasmic Reticulum: The Signal Hypothesis Ten Years Later</b> <i>Peter Walter, Vivian Siegel, Leander Lauffer, and Pablo D. Garcia</i> .....	1
<b>2. Mechanism and Structural Basis for Recognition of Signal Peptides</b> <i>Glen Hortin</i> .....	15
<b>3. Proteolytic Processing of Signal Peptides</b> <i>Henry C. Wu</i> .....	33
<b>4. The Posttranslational Processing of the Precursors of Secreted Peptides</b> <i>Günther Kreil</i> .....	61
<b>5. Assembly of Multisubunit Membrane Proteins</b> <i>Barry E. Carlin and John Paul Merlie</i> .....	71
<b>6. Structure, Function, and Biosynthesis of Fatty Acid-Acylated Proteins</b> <i>Eric N. Olson</i> .....	87
<b>7. Biosynthesis of Endoplasmic Reticulum Membrane Proteins</b> <i>Cecil B. Pickett and Claudia A. Telakowski-Hopkins</i> .....	103

<b>8. Import of Proteins into Mitochondria</b> <i>Richard Zimmermann</i> .....	119
<b>Index</b> .....	137
