

Contents

Introduction	1
I Growth Factors and Proto-Oncogenes in Development and Differentiation	
The Expression of Growth Factors and Growth Factor Receptors During Mouse Embryogenesis A. JAKOBOVITS (With 1 Figure)	9
A Role for Proto-Oncogenes in Differentiation? E. F. WAGNER and R. MÜLLER	18
Tissue-Specific Expression and Possible Functions of pp60 ^{c-src} L. R. ROHRSCHEIDER	27
II Growth Factors, Receptors, and Related Oncogenes	
The Granulocyte-Macrophage Colony-Stimulating Factors N. M. GOUGH	35
Role of PDGF-Like Growth Factors in Autocrine Stimulation of Growth of Normal and Transformed Cells C.-H. HELDIN and B. WESTERMARK (With 1 Figure) ...	43
Transforming Growth Factor- β H. L. MOSES and E. B. LEOF	51
Transforming Growth Factor- α R. DERYNCK (With 1 Figure)	58
The Physiology of Epidermal Growth Factor G. CARPENTER, L. GOODMAN, and L. SHAVER	65

Structural Relationships Between Growth Factor Precursors and Cell Surface Receptors S. PFEFFER and A. ULLRICH (With 2 Figures)	70
Regulation of Cell Growth by the EGF Receptor J. SCHLESSINGER (With 2 Figures)	77
Mutational Analysis of <i>v-erbB</i> Oncogene Function H. BEUG, M. J. HAYMAN, and B. VENNSTRÖM (With 1 Figure)	85
The <i>c-fms</i> Proto-Oncogene and the CSF-1 Receptor C. J. SHERR and E. R. STANLEY	93
Activation of the <i>c-src</i> Gene H. HANAFUSA	100
Normal and Transforming N-Terminal Variants of <i>c-abl</i> Y. BEN-NERIAH and D. BALTIMORE (With 3 Figures) ...	106
Transformation by the <i>v-abl</i> Oncogene A. GEBHARDT and J. G. FOULKES	115
<i>mos</i> D. G. BLAIR	121
Structure and Function of the Human Interleukin-2 Receptor M. HATAKEYAMA, S. MINAMOTO, H. MORI, and T. TANIGUCHI (With 1 Figure)	128
III Signal Transduction and <i>ras</i> Oncogenes	
Phosphorylation in Signal Transmission and Transformation T. HUNTER	138
Inositol Lipids and Cell Proliferation M. J. BERRIDGE (With 2 Figures)	147
Protein Kinase C P. J. PARKER and A. ULLRICH (With 2 Figures)	154
The Relevance of Protein Kinase C Activation, Glucose Transport, and ATP Generation in the Response of Haemopoietic Cells to Growth Factors T. M. DEXTER, A. D. WHETTON, and C. M. HEYWORTH (With 1 Figure)	163

Cytoplasmic pH and Free Ca ²⁺ in the Action of Growth Factors W. H. MOOLENAAR	170
Epidermal Growth-Factor Mediation of S6 Phosphorylation During the Mitogenic Response: A Novel S6 Kinase G. THOMAS (With 1 Figure)	177
Role of G Proteins in Transmembrane Signaling: Possible Functional Homology with the <i>ras</i> Proteins S. B. MASTERS and H. R. BOURNE (With 1 Figure)	184
The <i>ras</i> Gene Family C. J. MARSHALL (With 1 Figure)	192
<i>RAS</i> Genes and Growth Control in the Yeast <i>Saccharomyces cerevisiae</i> O. FASANO (With 2 Figures)	200
IV Gene Expression and Nuclear Oncogenes	
Regulation of Human Globin Gene Expression P. CHARNAY	211
Regulation of Gene Expression by Steroid Hormones M. BEATO	219
Enhancers as Control Elements for Tissue-Specific Transcription U. SCHLOKAT and P. GRUSS (With 2 Figures)	226
The Effect of DNA Methylation on DNA-Protein Interactions and on the Regulation of Gene Expression W. DOERFLER	235
<i>Trans</i> -Acting Elements Encoded in Immediate Early Genes of DNA Tumor Viruses L. PHILIPSON (With 1 Figure)	241
Transactivator Genes of HTLV-I, II, and III W. A. HASELTINE, J. SODROSKI, C. ROSEN, W. C. GOH, A. DAYTON, and D. CELANDER (With 2 Figures)	247

Involvement of Proto-Oncogenes in Growth Control: The Induction of <i>c-fos</i> and <i>c-myc</i> by Growth Factors R. BRAVO and R. MÜLLER	253
Oncogenes and Interferons: Genetic Targets for Animal Cell Growth Factors J. ZULLO, D. HALL, B. ROLLINS, and C. D. STILES (With 1 Figure)	259
Regulation of <i>c-myc</i> Expression in Normal and Transformed Mammalian Cells P. D. FAHRLANDER and K. B. MARCU (With 1 Figure) .	264
Properties of the <i>myc</i> and <i>myb</i> Gene Products K. MOELLING	271
The <i>fos</i> Oncogene and Transformation T. JENUWEIN and R. MÜLLER (With 1 Figure)	278
p53: Molecular Properties and Biological Activities M. OREN	284
V Malignant Transformation as a Multistep Process	
Oncogene Cooperativity in Stepwise Transformation of Rodent Embryo Fibroblasts by Polyoma Virus E. MOUGNEAU and F. CUZIN	294
Role of the Middle T: pp60 ^{c-src} Complex in Cellular Transformation by Polyoma Virus S. H. CHENG, W. MARKLAND, and A. E. SMITH	298
Oncogenes Cooperate, but How? H. LAND	304
Individual and Combined Effects of Viral Oncogenes in Hematopoietic Cells P. KAHN, A. LEUTZ, and T. GRAF (With 2 Figures)	312
Multiple Factors Involved in B-Cell Tumorigenesis G. KLEIN	320
Molecular Events Associated with Tumor Initiation, Promotion, and Progression in Mouse Skin A. BALMAIN	326

Amplification of Proto-Oncogenes and Tumor Progression M. SCHWAB (With 1 Figure)	332
Suppression of the Neoplastic Phenotype J. A. WYKE and A. R. GREEN	340
VI Oncogenesis in Transgenic Mice	
Oncogenesis in Transgenic Mice D. HANAHAN (With 2 Figures)	349
Subject Index	365
